FAQ

1. I have a lot of friends and friends to use my camera together?

1. Open the APP and select your camera in the home page. Click "Share" in the camera settings to enter the sharing page and add code will be automatically generated. Then you can share the code with your friends to use it.

2. Why doesn't the Wi-Fi camera appear when I connect to the Wi-Fi?

2. When connecting with iOS 11 and above, you need to turn on the "Location Services" of the app in the system settings and change it to "Allow when in use".

3. Why the camera display a red light after turning on the light vision function?

3. The red light is LED light, when the light vision is turned on, the camera will display some red light, but the photo quality will not be affected.

4. What are the requirements for Wi-Fi?

4. Please use 2.4GHz wireless network. The device does not support 5GHz wireless network. It is recommended that the Wi-Fi authentication method is WPA2-PSK or other home network security methods, and avoid using a password.

5. How far should the camera be from the router?

5. After setting, the Wi-Fi connection distance can normally reach 100 meters in an open area. But the actual distance depends on the strength of the Wi-Fi and its surroundings. When using wireless network, please make sure that the Wi-Fi router is powered on and the network is normal.

6. What should I do if the equipment fails?

6. Long press the power button to reset the camera. If there is no response, you can open the QR code scanner at the bottom of the camera, long press the reset button to reset, and then long press the reset button to reset the camera.

7. Can't add a camera for the first time?

7. When adding a camera for the first time, make sure the camera is powered on and the working status is normal. Please check the power supply and the Wi-Fi network.

8. The camera can't connect to the Internet?

8. The camera only supports 2.4GHz Wi-Fi and does not support 5GHz Wi-Fi. Please make sure the Wi-Fi is configured correctly.

9. After setting, the camera shows that the network is connected, but it cannot be connected to the Internet?

9. If the QR code network configuration is successful, it is recommended to restart the camera. If the mobile phone can be automatically updated after connecting to the Wi-Fi, please check the camera and ensure that the network is connected. If the two methods are not successful, and if the network is connected, please check the camera and ensure that the network is connected.

10. The camera can't connect to the Internet?

10. Please check the Wi-Fi network and ensure that the camera is connected to the Wi-Fi network. If the camera is connected to the Wi-Fi network, please check the camera and ensure that the network is connected.

11. The camera can't connect to the Internet?

11. Please check the Wi-Fi network and ensure that the camera is connected to the Wi-Fi network. If the camera is connected to the Wi-Fi network, please check the camera and ensure that the network is connected.

12. The camera can't connect to the Internet?

12. Please check the Wi-Fi network and ensure that the camera is connected to the Wi-Fi network. If the camera is connected to the Wi-Fi network, please check the camera and ensure that the network is connected.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm distance between the radiator and your body: Use only the supplied antenna.
