

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

**EUT Housing and
Board View 1**

**EUT Housing and
Board View 2**

Solder Board-Component View 1	 A photograph showing a small, square, orange-colored component with a black wire attached, resting on a blue textured surface. A black ruler with white markings is placed next to the component for scale. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10). The component is positioned near the 10 mm mark on the ruler.
Solder Board-Component View 2	 A photograph showing the same component from a different angle. The component is now a dark, square shape with a black wire attached. The wire is longer and more visible than in View 1. The component is resting on the same blue textured surface. A black ruler with white markings is placed next to the component for scale. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10). The component is positioned near the 10 mm mark on the ruler.

Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) component, likely a power module, showing two large silver solder joints. The component is placed on a blue textured surface next to a black L-shaped ruler with white millimeter markings. The ruler indicates the component is approximately 40mm wide and 30mm high.
Solder Board-Component View 4	 A photograph of the same green PCB component from a different angle, showing its top surface with various electronic components like capacitors and a transformer. It is positioned next to the same black L-shaped ruler on a blue textured background. The component's dimensions are consistent with View 3, being about 40mm wide and 30mm high.

View 6**

Solder Board-Component View 7	 A photograph of a green printed circuit board (PCB) with various electronic components. A large black integrated circuit (IC) is visible in the center. The board is populated with numerous surface-mount components, including capacitors, resistors, and smaller ICs. The text "us-plug Gen4 v0.0.3" is printed on the right side of the board. The board is resting on a blue textured surface.
Antenna View	 A photograph showing the underside of a black plastic housing. A red rectangular box highlights a component labeled "ShellyPlugS". A red line points from a label "BT/WiFi/Zigbee Antenna" to a small antenna component located near the highlighted area. The background is a blue textured surface.
