Solder Board-Component View 4	 A photograph showing a green printed circuit board (PCB) component mounted on a blue textured surface. The component is positioned horizontally. A black ruler with white markings is placed vertically to the left of the component, showing measurements in millimeters. The component has several solder joints and components visible on its surface.
Solder Board-Component View 5	 A photograph showing the same green PCB component from a different angle (View 5). The component is mounted on the blue textured surface. A black ruler with white markings is placed vertically to the left of the component, showing measurements in millimeters. The component's solder joints and components are visible from this perspective.

Solder Board-Component View 8	 A photograph of a small green printed circuit board (PCB) component, labeled 'View 8'. The component is rectangular with several gold-plated pins on one side and two small gold pads on the other. It is positioned on a black surface with a white ruler for scale. The ruler shows measurements in millimeters, with the component's length being approximately 15 mm and its width about 5 mm. The background is a blue textured surface.
Solder Board-Component View 9	 A photograph of the same green PCB component, labeled 'View 9'. This view shows the component from the opposite side, revealing various electronic components including several electrolytic capacitors (one blue, one purple, and one silver), a small integrated circuit (IC) labeled '471', and other surface components. The component is placed on the same black surface with a white ruler for scale. The ruler shows measurements in millimeters, with the component's length being approximately 15 mm and its width about 5 mm. The background is a blue textured surface.

Solder Board-Component View 10	 A photograph of a small green printed circuit board (PCB) component, identified as a solder board component, placed on a blue textured surface. The component is rectangular with several surface-mounted components, including a small black chip and various passive components. It is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10). The component is oriented horizontally, and its length is approximately 60 mm.
Antenna View	WIFI/BT Antenna  A photograph of a larger green printed circuit board (PCB) component, identified as the antenna view. The component is rectangular with various surface-mounted components, including a large black chip and several smaller components. It is positioned on a blue textured surface. A red box highlights a specific area on the top edge of the component, labeled "WIFI/BT Antenna". A red line points from the label to the highlighted area.
