

ANNEX

EXHIBIT 1 - PRODUCT LABELING

Proposed FCC ID Label Format

FCC ID: 2BDC6-SHELLYPRO3EMS

Specifications: The label shall be securely affixed to a permanently attached part of the device, in a location where it is visible or easily accessible to the user, and shall not be readily detachable. The label shall be sufficiently durable to remain fully legible and intact on the device in all normal conditions of use throughout the device's expected lifetime.

Proposed Label Location on EUT

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

**EUT Housing and
Board View 1**

**Solder
Board-Component
View 1**

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) component, labeled 'View 2'. The component is rectangular with various electronic components, including a central microcontroller, several integrated circuits, and connectors. It is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
Solder Board-Component View 3	 A photograph of the same green PCB component, labeled 'View 3'. This view shows the component from a different angle, highlighting the solder joints and the components on the reverse side. It is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).

Solder Board-Component View 4	 A photograph of a small green printed circuit board (PCB) component, labeled 'DEMULite_AB_CT_input.v0.8.3', mounted on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler shows dimensions in millimeters, with the component's length being approximately 20 mm. The component has two gold-colored pins on the left and two larger, dark, rectangular components on the right.
Solder Board-Component View 5	 A photograph of the same green PCB component from a different angle, showing the top surface. The component is labeled '2023-04-24' and 'DEMULite_AB_CT_input.v0.8.3'. It is positioned next to a black ruler with white markings. The ruler shows dimensions in millimeters, with the component's length being approximately 20 mm. The component has two gold-colored pins on the left and two larger, dark, rectangular components on the right.

Solder Board-Component View 6	 A photograph showing a green printed circuit board (PCB) component with two gold-plated pins. The component is positioned on a blue textured surface. A black ruler with white markings is placed below the component, showing measurements in millimeters. The ruler has markings from 0 to 100 mm, with the component's length spanning approximately 40 mm.
Solder Board-Component View 7	 A photograph showing the same green PCB component from a different angle. The component is positioned on a blue textured surface. A black ruler with white markings is placed below the component, showing measurements in millimeters. The ruler has markings from 0 to 100 mm, with the component's length spanning approximately 40 mm.

Solder Board-Component View 8	
Solder Board-Component View 9	

Solder Board-Component View 10	 A photograph of a small green printed circuit board (PCB) component, identified as a solder board component. The component is rectangular with several surface-mounted components, including a small black chip and various passive components. It is placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the component, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The component is oriented horizontally, and its length is approximately 60 mm.
Antenna View	WIFI/BT Antenna  A photograph of a larger green printed circuit board (PCB) component, identified as the antenna view. The board is irregularly shaped and features various components, including a large black chip, several smaller chips, and various passive components. A red rectangular box highlights a specific area on the board, labeled "WIFI/BT Antenna". The board is placed on a blue textured surface.

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

**Conducted Emission
Test Setup**

**Radiation Emission Test
Setup (Below 30MHz)**

**Radiation Emission Test
Setup (30MHz to 1GHz)**

**Radiation Emission Test
Setup (1GHz to 18GHz)**

**Radiation Emission Test
Setup (Above 18GHz)**
