| <div>Solder<br/>Board-Component<br/>View 6</div> |  A photograph of a small, green, L-shaped printed circuit board (PCB) component. The component is positioned on a blue textured surface. A black L-shaped ruler is placed next to it for scale, with the horizontal arm at the bottom and the vertical arm on the left. The ruler has white markings in millimeters and centimeters. The component is located approximately between the 10mm and 20mm marks on the horizontal axis and the 10mm and 20mm marks on the vertical axis. |
| <div>Solder<br/>Board-Component<br/>View 7</div> |  A photograph of the same green PCB component from a different angle. The component is shown with its top surface, which features a white rectangular area and several small electronic components. The same black L-shaped ruler is used for scale, showing the component's position relative to the 10mm and 20mm marks on both axes.                                                                                                                                             |
