

5. What devices the product can support by the AC output?

AC output rated power is 3200W (JP), 3200W (USA), 3200W (EU). The corresponding load product should be less than the rated output power of the product.

6. How can we know the remain using time?

Please check the data on the screen, it will show the remain using time when you turn on.

7. How can we confirm the product is recharging?

When the product is under charging, the product screen will show the input wattage, and the power percentage indicator will blink.

8. How should we clean the product?

Please use a dry, soft, clean cloth or tissue to wipe the product.

9. How to storage?

Please turn off the product and place it in a dry environment. Do not place this product near water.

For long-term storage, we recommend to use the product every three months(Run out the remain power first and recharge it to the percentage you want, such as 50%).

10. Can we take this product on airplane?

NO, you can't.

11. Is the actual output capacity of the product the same as the target capacity in the user manual?

The capacity of the user manual is the rated capacity of the battery pack of this product. Because this product has a certain efficiency loss during the charging and discharging process, the actual output capacity of the product is lower than the capacity specified in the user manual.

12. What is the maximum output power of a single AC interface?

Each interface of the product has a maximum output current marked, and the maximum output power of the interface can be calculated according to the local output voltage and maximum current. The load power cannot be greater than the maximum output power that a single interface can withstand. Failure to do so will result in damage to the product.

Maintenance

1. It is recommended to use or store this product in an environment of 20°C to 30°C, away from water, heat, and other metal objects.
2. For safety reasons, please do not store this product in an environment higher than 45°C or lower than -10°C for a long time.
3. If it is not used for a long time, please charge it to 60% before storing. If the battery is left unused for a long time when the battery is seriously insufficient, it will cause irreversible damage to the battery and shorten the cycle life of the product.

FCC Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
