Photochromic Function of the Glasses:

The AiMB GLASSES V6 Max is equipped with UV photochromic lenses that automatically adjust based on UV intensity:
In outdoor bright light (strong UV) environments, the lenses darken quickly to block harmful UV rays and reduce eye discomfort caused by glare; when entering indoor or weak UV scenarios, the lenses automatically return to a transparent state to ensure clear vision.

No manual operation is required—it adapts to light changes automatically, balancing eye protection and daily visual needs, making it suitable for multi-scenario wear such as commuting and outdoor activities.
