Board View 2**

Solder Board-Component View 1	 A top-down view of a circular solder board component. The component has a green solder mask with a central silver-colored circular area. There are several small rectangular components and solder joints on the board. A black ruler with white markings is placed next to the component for scale, showing measurements in millimeters and centimeters.
Solder Board-Component View 2	 A bottom-up view of the same circular solder board component. This view shows the underside of the board, which is green with gold-colored solder pads and traces. Several small components and solder joints are visible. A black ruler with white markings is placed next to the component for scale, showing measurements in millimeters and centimeters.

Solder Board-Component View 3	 A circular solder board component is shown against a blue background. A black ruler with white markings is placed to the left of the component, showing measurements in millimeters. The component has a green outer ring and a silver inner circle. It features several small rectangular components and solder joints. The ruler markings range from 0 to 100 mm.
Solder Board-Component View 4	 A rectangular solder board component is shown against a blue background. A black ruler with white markings is placed to the left of the component, showing measurements in millimeters. The component has a green outer ring and a silver inner circle. It features several small rectangular components and solder joints. The ruler markings range from 0 to 100 mm.

Solder Board-Component View 9	 A photograph of a green printed circuit board (PCB) with a complex, irregular shape. The board is populated with various electronic components, including a large central chip, several smaller integrated circuits, and surface-mount components. The board is placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
Solder Board-Component View 10	 A photograph of the same green PCB from a different perspective, showing the underside. The board features a large central rectangular area, likely a battery or a large component, and various other components and traces. The board is placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
