

User's Guide of Power Bank with WiFi

Product description

Product description

Technical Parameters

Size: 144.5*66*15mm
WiFi protocol: IEEE 802.11 b/g/n
Battery: 6000mAh
Input interface: Type-C interface
Input: 5V=2A
Output: 5V=2A (Type-C, Micro-USB, Lightning)

Quick guide

1. Connect the power bank

- ④ Insert the charging head into the mobile phone to directly activate the discharge

2. Fast charging display

- ④ When the fast charging indicator light turns green, it indicates the fast charging status.
- ④ When the fast charging indicator light turns red, it means it is not in fast charging state.

Precautions

The functional description and pictures of the device in the manual or on the package are for reference only. Your device may be different from this, and the actual product shall prevail. Certain features and functions of the product and its accessories described in this manual depend on the design and capabilities of your local network, and on the software you have installed. Some features and functions may not be available because the local network operator or network service provider does not support it, or due to the settings of the local network, or the software you install does not support it. Therefore, the descriptions in this manual may not exactly correspond to the product or its accessories you purchased.
Hong Kong Liangfish Technology Co., Ltd. reserves the right to modify any information in this manual at any time without any prior notice.
Before using and operating this equipment, please read and follow the precautions below to avoid dangerous or illegal situations and to ensure optimum performance of this equipment.

Import and Export Control

If you need to export, re-export or import the products described in this product manual (including but not limited to software and technical data in the products, etc.), you should abide by the applicable import and export control laws and regulations.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

Precautions

Operating environment

Do not charge or use this device in places that are dusty, damp, dirty, or near magnetic fields to avoid causing internal circuit failure of the device. Do not use the device during thunderstorms to avoid lightning strikes or other injuries. In places where the use of wireless devices is expressly prohibited, please turn off the device. It is recommended to use it when the ambient temperature is 0°C~+35°C. Do not use this device in an environment where the temperature is too high or too low. Please place the device or its accessories in a ventilated, cool place without direct sunlight. Do not seal the device package or cover the device with towels or place other objects. Do not place the device in a box or box to avoid poor heat dissipation, causing equipment damage.

Children health

This device and its accessories may contain small parts, please keep them out of the reach of children. Children may inadvertently damage this device and its accessories, or swallow small parts that may present a choking or other hazard.

Traffic safety

Do not hold this device while driving, and follow the relevant regulations in your region or country. Do not place the device above or within the reach of a car air bag if the air bag is deployed. Otherwise, when the airbag is inflated, the equipment will be pushed by a strong external force and cause serious injury to the occupants of the vehicle. Wireless devices may interfere with the flight system of the aircraft, please follow the relevant regulations of the airline, and turn off the device where the use of wireless devices is prohibited.

Medical equipment

Please obey local ordinances regarding the disposal of your device, battery and its accessories, and support recycling efforts. Do not dispose of the device, battery and its accessories with normal household waste.

No commitment statement

The content in this manual is provided "as is", unless required by applicable law, Hong Kong Liangdian Technology Co., Ltd. does not provide any express or implied guarantee for all content in this manual, including but not limited to merchantability or fitness for a particular purpose guarantee.

To the extent permitted by law, Hong Kong Liangdian Technology Co., Ltd. shall not under any circumstances be liable for any special, incidental, indirect or consequential damages arising from the use of relevant contents of this manual, nor shall it compensation for loss of profits, data, goodwill or anticipated savings. Due to the continuous updating of software versions, the operating interface of the device will be slightly different from the instructions. Please refer to actual experience for details.

Electromagnetic radiation specific absorption rate (SAR)

The maximum specific absorption rate (SAR) of this product is less than 2.0W/kg, which meets the requirements of the national standard GB21289-2007.

Do not use this device at gas stations or near flammable materials or chemicals, and follow all graphic or written instructions. The device may explode or catch fire in and around fuel or chemical storage and transport areas or explosive atmospheres. Do not store or transport the device and its accessories in the same box as flammable liquids, gases or explosives.

Precautions

Maintenance and maintenance

Please keep the device and its accessories dry. Do not dry it with external heating equipment such as a microwave oven. Do not subject the device and its accessories to strong shocks or vibrations, as this may damage the device and its accessories, or cause the battery to burn or explode. Do not use harsh chemicals, cleaning agents or strong detergents to clean the device or its accessories. Please turn off the power and disconnect the charger from the device before cleaning and maintenance. Do not disassemble the equipment and accessories without authorization, otherwise the equipment and accessories will not be covered by our company's warranty.

Battery warning

Do not disassemble, do not short circuit, do not put in fire, do not put in high temperature environment, do not use the battery after soaking in water. **It** is forbidden to squeeze or hit the battery. **If** there is severe swelling, please do not continue to use it.

If consumers use a power adapter to charge, they should purchase a power adapter that meets the requirements of the corresponding safety standards or a power adapter that has obtained CCC certification. When charging is complete or not charging, disconnect the device and unplug the charger from the electrical outlet. Do not place batteries or equipment near heating appliances such as microwave ovens, ovens, or radiators. Batteries may explode **if** overheated. Do not disassemble or modify the battery to avoid battery leakage, overheating, fire or explosion. **If** the battery leaks, please do not let the skin or eyes come into contact with the leaked liquid; **if** it touches the skin or eyes, please rinse it with clean water immediately and go to the hospital for medical treatment. **If** the battery is damaged during use, charging or storage, please do not continue to use it to avoid electric shock or fire. Do not throw the device into a fire, as this can cause the battery to catch fire and burst. There is a risk of explosion **if** batteries are replaced by incorrect types, always dispose of spent batteries according to the instructions.

This operating system only supports official system updates. **If** the user flashes a third-party ROM system or uses any cracking method to modify the system software, it may cause system instability and may bring security risks or dangers. Users need to prepare for similar behavior. Take responsibility.
