Product Functions

1. Left Button

2. Scroll Wheel

3. Bluetooth Indicator

4. Mode Switch Button

5. Power Switch

6. Right Button

7. DPI Button

8. USB Indicator

9. Battery Storage

10. USB Receiver

2.4G USB Connection

1. Insert an AA battery for the mouse and AAA battery for the keyboard, ensuring you correctly align the anode and cathode. Then, turn on the mouse. A power light will be automatically activated by inserting batteries. No physical power switch is required.

2. Press the Fn+Q, the white indicator light flashes slowly, keyboard enters the 2.4G mode.

3. Take out the USB receiver from the bottom of the mouse.

4. Plug the USB receiver into the USB port of the computer, then the keyboard and mouse can work normally.

Mouse Bluetooth Connection

1. Insert an AA battery, ensuring you correctly align the anode and cathode. Then, switch the power to ON.

2. Press the bottom mode switch button until the (BT) indicator light is on, and the mouse enters the Bluetooth channel. Long press the mode switch button for 3-5 seconds, (BT) indicator flashes rapidly, the mouse enters pairing mode.

3. Turn on the Bluetooth settings on your device, search or select "SEENDAA COE200 MS" and start Bluetooth pairing until the connection is completed.

Product Specification

Mouse:	
Engine	Optical
Mouse DPI	1000/1600/2400 DPI
Mouse Keystroke Life	More than 3 million
Operating Voltage	1.5V
Mouse Size	108*53*39.1mm (4.2*2.1*1.54 in)
Weight	62g±0.1g
2.4G Transmission Parameter	
Working distance	10m
Working voltage	1.5V
Working current	10mA
Working rate	2500Hz
Bluetooth Transmission Parameter	
Working distance	10m
Working voltage	1.5V
Working current	10mA
Working rate	125KHz
System Requirement	
Bluetooth enabled device. One available USB port. Windows 8/10 or above; Mac OS X 10.10 or above; Android 4.3 or above.	

Package Content

1 * Wireless Mouse

1 * USB Receiver

1 * User Manual

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates and can also receive radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general IF exposure requirement. The device can be used in portable exposure condition without restriction.

Frequently Asked Questions

How to deal with disconnection issues, keys repeating or typing & clicking delay?

- Low Battery: Ensure that the batteries have sufficient power. Low battery levels can impact the performance of the keyboard/mouse.
- Signal Interference: Keep the USB receiver/keyboard/mouse away from routers, microwaves, or metal surfaces to reduce signal interference.
- USB Mode Reconnect: If using a USB dongle to connect the keyboard/mouse to the device, unplugging and replugging the USB dongle, try using a different USB port if needed.
- Bluetooth Mode Reconnect: If connecting the keyboard/mouse to the device via Bluetooth, delete the Bluetooth name from your device's Bluetooth connection list, restart your device, and re-pair the keyboard/mouse by following the steps in the user manual.
- Distance Limit: Maintain a distance of within 10 meters [33 feet] between the receiver/computer for optimal signal strength.
- Try Other Devices: Test the keyboard/mouse with alternative devices to determine if the issue persists.

What should I do if keys/mouse buttons stop working or feel sticky?

- Basic Fixes: Clean debris with compressed air (for keys) or a cotton swab dipped in isopropyl alcohol (for buttons).
- Pro Tip: Avoid eating near the keyboard as crumbs are the primary cause of unresponsive keys!

Safety Warning

IMPORTANT: To reduce risk of fire, electric shock, or injury, follow these safety instructions.

Heat Exposure: Avoid leaving the item in high-temperature environments or in direct sunlight, which could result in a fire hazard.

Liquid Exposure: Keep the item away from water and liquids. Do not use if wet until thoroughly dried.

Damage and Leakage: Cease usage and consult customer service if the item is damaged or the battery leaks.

Corrosive Disposal: Follow local regulations for disposing of electronic devices and batteries. Do not dispose of with household waste.

Radio Frequency Interference: This device may cause interference with other electronics. Keep a safe distance from sensitive devices.

Child Safety: Keep the item and its components out of reach of children to avoid choking or battery ingestion hazards. Never allow children to handle the item unsupervised.

CAUTION: Non-compliance with the above warnings can lead to serious injury or property damage.

For further assistance or information, please contact our customer service.
