Charging Instruction

❶ When power is low, red low power indicator on the bottom will start flashing. Plug the Type-C charging cable into the mouse charging port.

❷ Connect the Type-C charging cable into a USB port. The charging indicator on the bottom will stay red until fully charged (4-6 hours). The light will switch off after that.

Specifications

Basic Specifications:

Chip: Nordic CX51861
Sensor: Optical
Li-ion capacity: 300mA
Mouse DPI: 1000-1600-2400DPI
Keystrokes Life: 3million +
Dimension: 4.3*2.4*1.2 (inches)
Weight: 82.5g

2.4Ghz Transmission Specification:

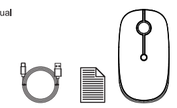

Transmission distance: 20m
Working voltage: 3.7V
Working current: 5mA
Reaction rate: 250hz

System Requirement:

Windows XP/Windows 7/ Windows 8/ Windows 10
Mac os X 10.10 or higher

Package included

- 1 x Wireless Mouse
- 1 x Type-C charging cable
- 1 x User manual

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.If this equipment does causeharmful interference toradio or televisionreception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
