The antenna model HFA-13S and antenna cable connected to the RFID reader model HFR-4AM equipment are used in the smart factory. The antenna cable connects to the antenna with a pair of SMA connectors. These antennas are used in factory automation as industrial recognition devices, such as in semiconductor manufacturing plants or battery manufacturing plants. Therefore, only professional technicians can install, operate, and repair this equipment.

Sincerely,

RFEngine Co., Ltd.
President
Sangguk Ahn
