At a Glance

Color Button

Press to cycle through 7 colors.

Power Button

Hold down for 5 seconds to turn off the LED string lights.

Installation Steps

Press to cycle through 20 Modes.

Pairing Your Device with Smart Life App

What You Need

- 1. A smartphone that supports Android 4.0 and iOS 8.0 or higher (functionality not supported).
- 2. A smartphone with stable internet (Wi-Fi or 4G/LTE).

Pairing Instructions

1. Download "Smart Life" App from App Store (iOS) or Google PlayMarket. Create an account and login with your account.
2. Log on the Bluetooth and select the device you want to connect.
3. Open the Smart Life App, tap the "+" icon to open the top right corner and search for "Indoor Light".
4. Add the device name and add the on-connect instructions to complete pair.

2. Wi-Fi disconnected or failed to connect.

- Check the Wi-Fi password.
- Ensure your Wi-Fi router is 2.4GHz capable (5G is not supported).
- Ensure you have the correct Wi-Fi Password during Wi-Fi connection process.
- If connecting the Wi-Fi with a smartphone, please try to check if your home network is working properly.
- Optimize the distance between the light and the Wi-Fi router to less than 20m, or try reconfiguring.

3. Lights fail to light up

- Check that the control box, power provider and all products connected.

If you have any questions about the device or functionality, please contact our customer service. We have a team of experts to help you with your questions.
