OPERATION INSTRUCTIONS:

Problem encountered:
How to pull out the watch charging module?

Why can't the watch module be inserted?

1.When pressing down the watch charging module, make sure to press it flat.

iPhone 17,iPhone 17 Air,iPhone 17 Pro, iPhone 17 Pro Max

THE USE OF PRODUCT FOLDING

Precautions for Use

Please pay attention to the following issues, otherwise it may cause abnormal charging, high charging temperature, intermittent charging, or even not charging.

- 1.**Not compatible with devices other than Apple, such as Samsung.**
- 2.**Do not use the wireless charger after splashing with water, as it may damage or deform the product due to a short circuit.**
- 3.Do not disassemble the product, otherwise it will easily damage the precision components inside and affect the charging function.
- 4.Please put the phone/watch at the center of charge area.
5. We recommend using a 20V/1.75A fast charger adapter, which can charge three devices at the same time while maintaining the fastest speed. Chargers below 35W only support normal charging, which will be slower than fast charging, or may not charge at all.
6. The charging distance is 2-8 mm, please don't wear protective case which is over 3mm thick.
- 7.The watch has temperature control.When the temperature reaches 104 F, it will stop charging automatically. If the temperature is normal, it will continue to charge.

- 8.No metal or magnetic objects around 6cm of the back center of the phone during charging.
- 9.The lower temperature, the faster charging speed.The charging speed is faster in winter than in summer.
- 10.Please don't charge in high temperature and humid environments to avoid damage of circuit.
- 11.Put it at the place that children can't reach to avoid unnecessary accidents

Troubleshooting

- 1.Update the device to the latest system.
- 2.Make sure your device that supports wireless charging.
- 3.Make sure to use the original charging cable and adapter.
- 4.Avoid thick device covers
- 5.Avoid high ambient temperature optimal temperature is 82-86°F.

- 6.When the phone or watch cannot be fully charged,try the following:Open[Settings]-[Battery Health]-[Turn off battery optimization].
- 7.When the earphones are exhausted and cannot be charged, please take out the earphones and charge the storage compartment separately.
- 8.When the phone, earphones, and watch do not respond when placed, please check whether there are foreign objects around or if the adapter is plugged in correctly or not.

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and your body.
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC WARNING:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions may cause harmful interference to radio communications.
However there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.
