

RVLock Scout Motion Sensor

Features

Wireless PIR detector adopt digital infrared dual-core fuzzy logic control processing technology and intelligent analysis algorithms, distinguish interference signals with human motion signals to prevent false alarms effectively, Built-in helical high frequency antenna, longer launch distance, environment saving, reliable, easy to install and so on.

Installation

- 1.Installation location need to avoid the place that temperature changing fast and air flowing fast like window, air conditioner, fluorescent lamp, electric heater, fridge, stove and so on.
- 2.Don't install two detectors in same place to avoid interference with each other.

Technical Parameters

Battery type: CR2450

Material : ABS plastic

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure statement

The device has been evaluatec to meel general RF exposure requirement. The device can be used in portable exposure condition without restriction.
