

Declaration on model difference

Product name: TPMS

Model: MT20, MT20A

Test Model: MT20

We the undersigned hereby confirm that:

They have same electrical. The differences in PCB layout are due to the varying market demands and usage environments with the aim of achieving better heat dissipation. They do not affect the radio frequency performance.

See below for details:

The resistance used in these two places is different, which results in the different PCB layouts for the two models.
