Supplementary Explanation

System Switching

1. Short press FN+4 to switch to MAC system mode, MAC indicator light on.

2. Short press FN+5 to switch to WIN system mode, MAC indicator light off.

Indicator Light Indication Method

Separate indicator lights on the keyboard, including NUM light, CAPS lock light, MAC system light, and low-voltage charging light.

(1). First indicator light: Num light (white).

(2). Second indicator light: Caps light (white).

(3). Third indicator light: MAC system light (white) turns on when switching to MAC system, off when switching to WIN.

(4). Fourth indicator light: Low voltage/charging light (or hide). Remains on during charging. Turns off when fully charged. Flashes slowly when voltage is below 2.3V to indicate low voltage. Flashes slowly for 5 seconds after button release when battery is low. Continuously flashes slowly until keyboard shuts down if button is kept pressed.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference that may be received, including interference from licensed radio stations.

Caution: Changes or modifications to this device without the express written approval of the manufacturer may void the user's authority to operate the equipment.

Do not attempt to disassemble, repair, or modify this device. The manufacturer is not responsible for any damage or injury caused by the use of this device.
