7435 Oakland Mills Rd.
Columbia, MD 21046

September 1, 2026

Reference FCC ID: **2BEEUKH-P601**

Organization: Consumer Safety Technology, LLC.

Pursuant to the labeling requirements outlined in 47 CFR § 2.925 and the guidelines established under KDB 784748 D01, Consumer Safety Technology, LLC hereby requests to place the permanent FCC ID label inside the battery compartment of the device rather than on the exterior enclosure. We confirm that the device complies with all standard FCC compliance criteria for alternative label placement based on the following physical and operational technicalities:

User Accessibility: The battery compartment is fully accessible to the end-user during normal setup and everyday operation. It does not require any special tools, keys, or technical expertise to open.

Permanent Attachment: The FCC ID label is permanently affixed (via permanent adhesive or etching) inside the main body of the battery compartment. It is not placed on a removable part, such as the battery cover, battery pack, or any temporary packaging material.

The label is in the battery compartment due to the size of the device and the challenges with the permanence of a label on the curved surfaces of the exterior that is exposed to constant handling and rubbing. Moving the label to the interior battery compartment maintains compliance while preventing cosmetic degradation of the device layout.
