Ziccam Operation Manual

(Only for long powered equipment)

This manual is for reference only, and the specific functions are subject to actual conditions

⚠ATTENTION:

Before installing the product, please follow each of the instructions below to prepare for installation. This is crucial for us to ensure a smooth installation process.

1. Press and hold the "RESET" button for 5 seconds until you hear a "DING" sound. Wait for 30 seconds to complete the self-check process. This will reset the camera and put it in the optimal setup state for installation. (Figure 1)

2. Place your camera as close to the router as possible during the connection process. This ensures a stable signal. (Do not mount the camera on the wall before connecting the device.)

3. Make sure the location information on your smartphone is enabled. This will enable the camera to intelligently identify the appropriate app for the user's region and quickly locate the matching device and WIFI signals. (Figure 2)

4. Confirm that your router provides 2.4GHz WIFI signal. This camera is not compatible with 5GHz WIFI signals. (Figure 3)

5. Point the mobile phone screen directly in front of the camera lens, with an interval of 15 cm - 20 cm. Try not to let the mobile phone shake during the process. After hearing the device prompt tone or indicator light changing, click "Hearing the prompt tone or indicator light flashing?", and wait for the addition to succeed.

6. Make sure there is no obstruction between the router, the camera and the mobile phone, and the distance between them is within 2 meters, and then click "Next".
7. After entering the WIFI password, click "Next".

8. Point the mobile phone screen directly in front of the camera lens, with an interval of 15 cm - 20 cm. Try not to let the mobile phone shake during the process. After hearing the device prompt tone or indicator light changing, click "Hearing the prompt tone or indicator light flashing?", and wait for the addition to succeed.

9. Make sure there is no obstruction between the router, the camera and the mobile phone, and the distance between them is within 2 meters, and then click "Next".
10. After entering the WIFI password, click "Next".

11. Point the mobile phone screen directly in front of the camera lens, with an interval of 15 cm - 20 cm. Try not to let the mobile phone shake during the process. After hearing the device prompt tone or indicator light changing, click "Hearing the prompt tone or indicator light flashing?", and wait for the addition to succeed.

12. Make sure there is no obstruction between the router, the camera and the mobile phone, and the distance between them is within 2 meters, and then click "Next".
13. After entering the WIFI password, click "Next".

14. Point the mobile phone screen directly in front of the camera lens, with an interval of 15 cm - 20 cm. Try not to let the mobile phone shake during the process. After hearing the device prompt tone or indicator light changing, click "Hearing the prompt tone or indicator light flashing?", and wait for the addition to succeed.

15. Make sure there is no obstruction between the router, the camera and the mobile phone, and the distance between them is within 2 meters, and then click "Next".
16. After entering the WIFI password, click "Next".

17. Point the mobile phone screen directly in front of the camera lens, with an interval of 15 cm - 20 cm. Try not to let the mobile phone shake during the process. After hearing the device prompt tone or indicator light changing, click "Hearing the prompt tone or indicator light flashing?", and wait for the addition to succeed.

18. Make sure there is no obstruction between the router, the camera and the mobile phone, and the distance between them is within 2 meters, and then click "Next".
19. After entering the WIFI password, click "Next".

20. Point the mobile phone screen directly in front of the camera lens, with an interval of 15 cm - 20 cm. Try not to let the mobile phone shake during the process. After hearing the device prompt tone or indicator light changing, click "Hearing the prompt tone or indicator light flashing?", and wait for the addition to succeed.

21. Make sure there is no obstruction between the router, the camera and the mobile phone, and the distance between them is within 2 meters, and then click "Next".
22. After entering the WIFI password, click "Next".

23. Point the mobile phone screen directly in front of the camera lens, with an interval of 15 cm - 20 cm. Try not to let the mobile phone shake during the process. After hearing the device prompt tone or indicator light changing, click "Hearing the prompt tone or indicator light flashing?", and wait for the addition to succeed.

24. Make sure there is no obstruction between the router, the camera and the mobile phone, and the distance between them is within 2 meters, and then click "Next".
25. After entering the WIFI password, click "Next".

26. Point the mobile phone screen directly in front of the camera lens, with an interval of 15 cm - 20 cm. Try not to let the mobile phone shake during the process. After hearing the device prompt tone or indicator light changing, click "Hearing the prompt tone or indicator light flashing?", and wait for the addition to succeed.

27. Make sure there is no obstruction between the router, the camera and the mobile phone, and the distance between them is within 2 meters, and then click "Next".
28. After entering the WIFI password, click "Next".

29. Point the mobile phone screen directly in front of the camera lens, with an interval of 15 cm - 20 cm. Try not to let the mobile phone shake during the process. After hearing the device prompt tone or indicator light changing, click "Hearing the prompt tone or indicator light flashing?", and wait for the addition to succeed.

30. Make sure there is no obstruction between the router, the camera and the mobile phone, and the distance between them is within 2 meters, and then click "Next".
31. After entering the WIFI password, click "Next".

32. Point the mobile phone screen directly in front of the camera lens, with an interval of 15 cm - 20 cm. Try not to let the mobile phone shake during the process. After hearing the device prompt tone or indicator light changing, click "Hearing the prompt tone or indicator light flashing?", and wait for the addition to succeed.

33. Make sure there is no obstruction between the router, the camera and the mobile phone, and the distance between them is within 2 meters, and then click "Next".
34. After entering the WIFI password, click "Next".

35. Point the mobile phone screen directly in front of the camera lens, with an interval of 15 cm - 20 cm. Try not to let the mobile phone shake during the process. After hearing the device prompt tone or indicator light changing, click "Hearing the prompt tone or indicator light flashing?", and wait for the addition to succeed.

36. Make sure there is no obstruction between the router, the camera and the mobile phone, and the distance between them is within 2 meters, and then click "Next".
37. After entering the WIFI password, click "Next".

38. Point the mobile phone screen directly in front of the camera lens, with an interval of 15 cm - 20 cm. Try not to let the mobile phone shake during the process. After hearing the device prompt tone or indicator light changing, click "Hearing the prompt tone or indicator light flashing?", and wait for the addition to succeed.

39. Make sure there is no obstruction between the router, the camera and the mobile phone, and the distance between them is within 2 meters, and then click "Next".
40. After entering the WIFI password, click "Next".

41. Point the mobile phone screen directly in front of the camera lens, with an interval of 15 cm - 20 cm. Try not to let the mobile phone shake during the process. After hearing the device prompt tone or indicator light changing, click "Hearing the prompt tone or indicator light flashing?", and wait for the addition to succeed.

42. Make sure there is no obstruction between the router, the camera and the mobile phone, and the distance between them is within 2 meters, and then click "Next".
43. After entering the WIFI password, click "Next".

44. Point the mobile phone screen directly in front of the camera lens, with an interval of 15 cm - 20 cm. Try not to let the mobile phone shake during the process. After hearing the device prompt tone or indicator light changing, click "Hearing the prompt tone or indicator light flashing?", and wait for the addition to succeed.

45. Make sure there is no obstruction between the router, the camera and the mobile phone, and the distance between them is within 2 meters, and then click "Next".
46. After entering the WIFI password, click "Next".

47. Point the mobile phone screen directly in front of the camera lens, with an interval of 15 cm - 20 cm. Try not to let the mobile phone shake during the process. After hearing the device prompt tone or indicator light changing, click "Hearing the prompt tone or indicator light flashing?", and wait for the addition to succeed.

48. Make sure there is no obstruction between the router, the camera and the mobile phone, and the distance between them is within 2 meters, and then click "Next".
49. After entering the WIFI password, click "Next".

49. Point the mobile phone screen directly in front of the camera lens, with an interval of 15 cm - 20 cm. Try not to let the mobile phone shake during the process. After hearing the device prompt tone or indicator light changing, click "Hearing the prompt tone or indicator light flashing?", and wait for the addition to succeed.

50. Make sure there is no obstruction between the router, the camera and the mobile phone, and the distance between them is within 2 meters, and then click "Next".
51. After entering the WIFI password, click "Next".

51. Point the mobile phone screen directly in front of the camera lens, with an interval of 15 cm - 20 cm. Try not to let the mobile phone shake during the process. After hearing the device prompt tone or indicator light changing, click "Hearing the prompt tone or indicator light flashing?", and wait for the addition to succeed.

52. Make sure there is no obstruction between the router, the camera and the mobile phone, and the distance between them is within 2 meters, and then click "Next".

140. Make sure there is no obstruction between the router, the camera and the mobile phone, and the distance between them

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body
