

A detailed line drawing of a turntable. It features a circular platter with a central spindle hole. A tonearm is mounted on the right side, with a dust cover that can be flipped up. The turntable is housed in a rectangular enclosure with two circular speaker ports on the front face. The drawing is a technical illustration, likely for a user manual.

01

The diagram illustrates the features of the portable CD player from three perspectives:

- Top View:** Shows the disc tray with the label "Disk placement area". On the right side, there is a "Sing pole (power switch)" with "OFF" and "ON" positions, a "Mode (indicator light)", and a "Volume control button" with a "VOLUME" label.
- Front View:** Shows two circular "Speaker" units and a "Laser head" at the top right.
- Rear View:** Shows the connection ports: "USB port", "Headphone port", "LINE IN", "DC IN", and "Indicator light".

Product Name: All-In-One CD phonograph
Product model: X100
Product material: plastic + wood grain
Product color: Brown, White
Packing list: CD machine x1, Charging cable x1, Remote control x1, Manual x1
Distortion limit output power: 5W+5W
Rated audio response range: 100Hz
Noise level: $\leq 25\text{dB}$ -15KHz
Power input: DC 5V/2A(Type-C power supply)
Power port: TYPE-C
Support format: CD/CD-R/CD-RW/VCD/DVD/MP3/ WMA/ infrared remote control
Product size: (L)205*(W)166*(H)63mm
Battery capacity: 2000MAH

indicator light on the audio system may also stop flashing as a sign of successful connection*
Play music* Now you can open the music playback application, select a song, and adjust the volume on your phone* Music should be played from the sound system*
Please note that both the phone and audio system support the same Bluetooth version, such as at least Bluetooth 4.0 or higher* In addition, different audio systems may have specific connection requirements or processes, so it is best to consult the user guide of the audio system for detailed information

FCC warning statements:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement.
