

User Manual

V1.0

A. APP Download

As shown in the figure, scan the QR code below with your phone to download the Y300P1 app, install it, and register to log in.

B. Introduction to buttons

C. QR code distribution network

Before adding a wireless camera, it is recommended to turn on your phone's Wi-Fi.

- 1. Open the Y300P1 app to complete account registration, and click the "+" button on the homepage.
- 2. Use your phone to scan the QR code of the camera label.

The label of the camera is usually located at the bottom or side of the lens.

- As the Y300P1 version is upgraded and improved, it may bring the differences between the actual situation and the manual description. Please refer to the actual situation.
- Set the Wi-Fi used by the device:
 - 1. Connect your phone to 2.4GHz Wi-Fi.
 - 2. Confirm the Wi-Fi name in the app and enter the correct password.

Completing the addition

- 1. The app will automatically add devices.
- 2. After adding, you can create groups for devices and set device names.

D. AP hotspot distribution network

- 1. Click the "Scan" button to scan the QR code. Please click "Scan" button.
- 2. Select "Scan the QR code" in the device "Please log in" button. Click on "AP hotspot connection".

Live Preview

- 1. In the device list, you can view the added camera and click to view the real-time preview camera.

Y300P1
Y300P1 is a small, portable, and easy-to-use wireless camera. It is suitable for home, office, and outdoor use. It has a high-resolution camera and a built-in microphone. It can be connected to a smartphone or tablet via Wi-Fi. It has a long battery life and a compact design. It is a great choice for anyone who wants to monitor their home or office remotely.
