After-Sales Service

This product is made of high quality material and has been fully inspected before shipment. We offer a 6-month warranty. If there are any issues with the product, please contact us, and we will provide a refund or a replacement to ensure your satisfaction.

Product Parameters

Frequency Range	FM:87-108MHz	Time to Fully Charged	USB: 4H
	AM:520-1710KHz		Hand-Cranked: 40H
	WB:162.400-162.550		Solar:91H(UnderFull Sunlight)
Product Size	156*82.5*99mm	Function Usage Time After Fully Charged	Radio: 180H
Weight	732g		High Beam Flashlight: 58H
Battery Capacity	20000mAh		Low Beam Flashlight: 118H
Solar Power	5V/0.65W/130mAH		Bluetooth Playback: 89H
USB Output	5V/3A	Hand-Cranked Generator	Reading Lamp+Radio: 55H
USB Input	5V/3A		
LED Lighting Brightness	High Beam: 600LUX		
	Low Beam: 150LUX		
	Mixed Beam: 650LUX		

Frequently Asked Questions & Answers:

Q:Can I use the radio while it's charging my phone?

A:Yes, you can use the radio while charging your phone. However, charging may cause interference, leading to a weaker signal.

Q: Why is the compass not pointing accurately?

A: There are a couple of possible reasons:

- ① The compass may have lost its magnetism, which typically happens after exposure to high temperatures.
- ② The compass shaft might be stuck due to burrs, preventing it from moving.

Both issues can result in the compass not responding or moving. If the compass moves freely, these are not the causes.

Additionally, nearby magnetic fields from electrical appliances, magnetic materials, or even mines can interfere with the compass, causing it to malfunction.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
