Product List

One pillow speaker main unit, one user manual.

How to use

Pillow speaker, a new must-have for listening to music while sleeping.
Simply press the pillow into the indentation, insert the speaker, and place it under your ear.

Basic Operations

Display Screen: Shows song title, lyrics, Bluetooth status, battery level, phone time, volume, etc.

Power Button: Press and hold for 1.5 seconds to power on, press and hold for 2 seconds to power off, single click for volume up, double click for previous track, triple click to turn the timer on/off.

Bluetooth Pairing: Power on - turn on your phone's Bluetooth - find "V08" and click to pair.

Minus Button: Single click for volume down, double click for next track, triple click for white noise (effective when Bluetooth playback is paused), long press to turn the screen on/off.

TF Card: The device supports local audio playback from a TF card, with MP3 as the default format. Connecting to a computer allows for easy management, adding, or retrieving of audio files.

Indicator Lights: Red light illuminates while charging, turns off when fully charged, blue light flashes when powered on (Bluetooth not connected), solid blue light indicates Bluetooth is connected.

Auto Power Off: Automatically powers off after 5 minutes if no songs are playing from the TF card, no white noise is playing, and no Bluetooth connection is established.

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
