

A: Install Cura360 APP

01. Scan the QR code, download the APP and install it

B: login ID

01. Log in with a GOOGLE account or APPLE ID

C: Add devices

01. When the power is inserted, the device will start automatically. The startup sound: the device is up and running, which lasts about 8 seconds.

02. Long press the RESET button on the device until you hear the voice: device resetting, then release the button. The entire button time lasts about 4 seconds. (Note: you need to hear the boot sound, and pressing RESET is effective after the boot is successful)

03. About 10 seconds after the device RESET, you hear the voice: the device is up and running, please setup the network

04. Click on the Cura360 APP on your phone and go to the APP home page.

05. Click the Add device button on the APP home page or the "+" in the upper right corner, and then scan the body QR code on the device or manually enter the ID number below the QR code.

06. Enter the 2.4G WI FI name and password, click start connection and the APP will pop up a QR code and the mobile phone will make a beep beep beep sound

07. The QR code popped up by the APP is placed about 30CM away from the camera lens. When you hear the voice: wifi connection in progress, please wait, it means that the device has entered the WI FI state. At this time, you can move the phone away, and the whole time is about 5 seconds.

When you hear the voice: wifi connected successfully, it means that the device is paired with the APP successfully. At this time, the beep sound on the mobile phone will disappear. If not, please repeat the operation steps 01-07, and focus on checking the 2.4G WI FI and password in step 06.

08. When you hear "wifi connection failed, please reconfigure the network" or the APP pops up "connection failed", please repeat the operation steps of 01-07 and check the 2.4G WI FI and password in step 06.

09. After the pairing is successful, this device will appear on the APP home page. You can rename the camera, live preview, cloud storage, Settings, and other operations.

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- - Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Statement

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance of 20cm the radiator your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.
