

Declaration Letter

To: Federal Communications Commission

Subject: Non-Router Device Declaration

Dear Sir/Madam,

We hereby declare that the following product:

Product: 300M WiFi REPEATER

FCC ID: 2BF65-Z03-300M

Model: Z03-300

Brand: N/A

The product itself is a WiFi repeater (signal amplifier). During the production and testing process, the Ethernet port is required for testing WiFi-related indicators and parameters. After the testing is completed and the factory settings are restored, the Ethernet port function is disabled (it no longer works).

Therefore, the Z03-300 Ethernet port is only used during the production and testing process and is not accessible to consumers.

The product function is a repeater (signal amplifier); the product itself does not come with TCP/IP protocol and does not have a complete data forwarding function. It only amplifies the signal from the upper-level router, expanding the coverage area of the upper-level router's signal. Therefore, it does not have routing functionality.
