

Modular Approval Request FCC (KDB 996369 D01 & Part 15.212)

FCC ID: 2BF7W-VCNB1

Items to be covered by <i>Single modular transmitters</i>.	Answer from applicant
1. The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly.	The radio portion of the module is protected by a metallic shielding.
2. The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal.	The chipset CC115LRGPR has buffered modulation/data input.
3. The module must contain power supply regulation on the module	This module has a built-in TLV76033DBZR power regulator IC.
4. The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per §§ 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b).	Yes, the module use a PCB trace and permanently attached.
5. The module must demonstrate compliance in a stand-alone configuration.	The module was tested in a stand-alone configuration via a test fixture.
6. The module must be labeled with its permanently affixed FCC ID label, or use an electronic display (see KDB Publication 784748).	The module labeled with its permanently affixed FCC ID.
7. The module must comply with all specific rules applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee.	The module is compliant with all applicable rules. Furthermore, guidance for maintaining compliance is given in the user manual.
8. The module must comply with RF exposure requirements.	The module comply with RF exposure requirements with MPE evaluation.

Note: A limited modular approval (LMA) may be granted for *single* or *split* modular transmitters that comply partially with the requirements above.

Name and surname of applicant (or authorized representative): Leo Li
