Subject: Response to Inquiry to FCC (Tracking Number 923087)

Inquiry on 09/18/2025 :

Inquiry:

Hi,

We are looking to understand who we can talk to, to request an exemption for placing the label on our small product.

Welfare Tag Model 8000-1129 FCC ID: 2BF8K1129 HVIN: RC-28

This product is installed into an animal's ear and is exposed to extremely harsh conditions. The product quickly becomes covered with mud and manure in the feedlot environment which covers the label and degrades any indelible ink. Install a label on the exterior, one that is indelible, is very expensive and places an unnecessary cost burden on the product.

If this is not the correct contact please forward to the appropriate department/section.

Thanks,
Paul Hoffmeyer

FCC response on 09/21/2025

Please provide what specific label retirement you are taking about and provide details about the the device. Do you know what rule parts it will be authorized under.

---Reply from Customer on 09/22/2025---

Hi,

Label requirement Title 47 Part15: Section 15.19(a)(5).

Part 15 unlicensed transmitter.

This product is installed into an animal's ear and is exposed to extremely harsh conditions. The product quickly becomes covered with mud and manure in the feedlot environment which covers the label and degrades any indelible ink. Install a label on the exterior, one that is indelible, is very expensive and places an unnecessary cost burden on the product.

Thanks,
Paul Hoffmeyer

FCC response on 10/01/2025

Based on your description and your judgment and you interpret 7 CFR 2.925(f) that if a device is so small that it is impractical to label it with the FCC Identifier in a font that is four-point or larger, and the device does not have a display that can show electronic labeling, then the FCC Identifier shall be placed in the user manual and must also either be placed on the device packaging or on a removable label attached to the device. The fact that it becomes dirty in use is not enough. People can clean it. Just make sure that at time of sale, in user manual and at time of importation if applicable FCC Identifier shall be placed in the user manual and must also either be placed on the device packaging or on a removable label attached to the device.
