FCC warning

This device complies with Part 15 of the FCC Rules:
The following two conditions must be met:
1. The equipment shall not cause harmful interference;
2. the equipment must accept any interference received, including interference that may cause undesired operation.
Any changes or modifications that are not explicitly approved by the responsible party for compliance may deprive the user of permission to operate the equipment.
Note: According to Part 15 of the FCC Rules, this device has been tested to meet the restrictions for Class B digital devices. These restrictions are intended to provide reasonable protection against harmful disturbances in residential installations. This device generates, uses and radiates radio frequency energy, which, if not installed and used in accordance with the instructions, may cause harmful interference with radio communications.
However, there is no guarantee that interference will not occur in a particular installation. If the device does cause harmful interference with radio or television reception, this can be determined by turning the device off and on, and users are encouraged to try to correct the interference by one or more of the following measures:
-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.
The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
