We therefore provide you with the following information to prevent releases of these substances and to improve the use of natural resources. Electrical and electronic equipments should never be disposed of in the usual municipal waste but must be separated according to their proper treatment. The crossed-out bin symbol, placed on the product and in this page, remind you of the need to dispose of properly the product at the end of its life. In this way it is possible to prevent that a not specific treatment of the substances contained in these products, or improper use, or improper disposal of their parts may be hazardous to the environment or to human health. Furthermore this helps to recover, recycle and reuse resources for environment protection in making of the internal parts. The electrical and electronic equipment producers and distributors set up proper collection and treatment systems for these products. At the end of life, please contact your distributor to have information on the collection and arrangements. A disposal of the product different from what described above is not liable to the penalties provided in the national provisions in the country where the product is disposed of. We also recommend you to adopt more resources for environment protection in making of the internal parts. The external packaging of the product and disposing properly used batteries if contained in the product. With your help, it is possible to reduce the use of natural resources used to produce electrical and electronic equipments, to minimize the use of land for the disposal of the products and to improve the quality of life by preventing that potentially hazardous substances are released in the environment.
ES Manual de usuario de auriculares inalámbricos Lea este manual de instrucciones antes de utilizar el dispositivo	Utilización del dispositivo (1) No intente desmontar ni sustituir ninguna pieza del interior de este dispositivo, o ser que especifique especialmente en este manual. FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
