5. If your camera model does not have a built-in LED, suggest you to turn on the license plate light when at night or in the dark ;
6. The Wireless camera device are applicable to vehicles with DC12V-24/ power output (Allowance is +/-10%)

SPECIFICATIONS

Monitor Parameters		Camera Parameters	
Display:	5 inch IPS full view angle	Image Sensor	CMOS
Resolution:	800*480	Angle	170°
Brightness:	500cd/m	Waterproof Rating	IP67
Operating Voltage:	DC 12V-32V	Operating Voltage	DC 12V-24V
Power consumption:	240 ±20mA@DC12V	Power Consumption	100MA
Operating temperature:	-20-+70°C	Minimum Illumination	0.01 Lux

Transmitting /Receiving Frequency 2400 · 2483.5 MHz

ON DIAGRAM

MONITOR OPERATION AND FUNCTION DESCRIPTION

Keystroke Instruction:

- A. "Button +": Move the cursor up or as increase button ;
- B. "Menu M": Click to enter the menu , (Without operation for 10S, will automatically exit). In submenu operation , press "Set" to confirm, press "M" for to return.
- C. "Button-": Move the cursor down or as decrease button -

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
