

Operation Manual

This manual is for reference only, and the specific functions are subject to actual conditions

RoHS CE FCC

FCC Statement

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Important: Change or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

Quick Configuration

STEP 1 Download APP

Scan the QR code on the right or search for "Eoolii" in major app markets, download and install.

STEP 2 Register and Log in

Register for an account in the app, and log in. If you have already registered, please log in directly.

STEP 3 Add Device

Open the app, tap the "Add Device" button, and follow the on-screen instructions or refer to the "Add Device" flow to add the device.

Wi-Fi Distribution Network Step 1 (Wi-Fi Version Only)

- Power on the camera, you will hear a voice prompt or see the indicator light flashing.
- Enter the homepage of the app, click "+", and select "Add Device". Scan the QR code on the device and then select "Wi-Fi Distribution Network".

Wi-Fi Distribution Network Step 2 (Wi-Fi Version Only)

- On the "Please power on the camera" interface, check "The above operations have been completed", and click "Next". On the "Wait for the beep from the camera" interface, check "The above operations have been completed", and click "Next".
- Make sure there are no obstructions among the router, the camera, and the mobile phone, and that the distance among them is within 2 meters. Then click "Next".

Wi-Fi Distribution Network Step 3 (Wi-Fi Version Only)

- After selecting the Wi-Fi and entering the Wi-Fi password, click "Next".
- Hold the mobile phone screen directly in front of the camera lens, keeping a distance of 15-20 cm between them. Try to keep the mobile phone steady during the process. Once you hear the voice prompt or see the indicator light change, click on "You hear a tone or indicator light flashes" and wait for the addition to be completed.

FAQ

Q: How to store video?

A: Cameras support two storage methods: local storage and cloud storage (requires a subscription).

Local Storage: Store the video recorded by the camera on a Micro SD card.

Cloud Storage: The video recorded by the camera is stored in the cloud. Depending on the video storage duration, three types of recent 3 days, 7 days, and 30 days can be stored cyclically, and online viewing and downloading of historical videos are supported.

Q: Why can't the camera connect to the Wi-Fi network?

A:

- Please ensure that the Wi-Fi signal of the wireless router connected to the camera is within coverage.
- Confirm that the purchased camera supports 2.4G & 5G dual-band Wi-Fi. If not, use 2.4G Wi-Fi with 802.11 b/g/n protocol to connect.

Q: The camera is abnormally offline, how to check it?

A:

- Check whether the power supply and network are normal;
- Re-plug the power supply to restart the device;
- Reconfigure the camera.

Note: This product has multiple models, and the actual product may vary.

This product is a networked device, and it is recommended to upgrade to the latest version for a better user experience.
