Intercom reset

I: wireless intercom connection operation (intercom connection is successful, the wireless music sound is off):

The first time the two machines connected to the intercom: after the machine is switched on, in the state of not connected to the wireless, both short press the intercom button to enter the intercom mode, the green light flashes quickly, and accompanied by a tone 'intercom pairing', start intercom pairing, pairing success will be prompted by a tone to indicate the success of the pairing 'intercom has been connected! After successful pairing, there will be a tone prompting successful pairing 'intercom has been connected', start intercom call, at this time, the intercom indicator green light will be on for a long time.

II: telephone priority answer

Telephone answer: two machines intercom connection is successful, wireless also connects to the mobile phone, when a call comes in, it automatically switches to the telephone to answer, after hanging up, the intercom is restored.

III: Clear the pairing and restore the factory settings

When turning on without connecting to wireless and intercom, music broadcasting or sharing, long press and hold the intercom button and the volume plus button for 5S at the same time. When you hear the "boom" sound, let go, that is, restore the factory settings and clear all pairing information.

IV: use the machine to connect the third-party helmet wireless headset for intercom calls

After booting, the two machines are not connected to the mobile phone wireless, the intercom machine boot long press the intercom button into the dating mode, wireless headset boot into the wireless mode, the two began to connect, connect successfully, there will be a prompt to the dating mode connection is successful, hear the 'thud' sound, that is, begin to talk to each other.

V: Music broadcasting (unlimited number of people within valid distance)

After the two devices are powered on, press the "Intercom key + Volume reduction key" at the same time to switch to the music broadcasting mode. A mobile phone is connected to the device to play music wirelessly and is accompanied by the prompt tone "Music broadcasting transmission mode" or "music broadcasting receiving mode" to start the music broadcasting and pairing: When one device is in the music broadcast transmission mode and other devices are in the music broadcast receiving mode, the music broadcast receiver will have a successful connection tone accompanied by the "Music Broadcast connection succeeded" tone. Note that the music broadcast transmitter will not have a successful connection tone. If two devices are connected to wireless music, they can only be shared by entering the music broadcast transmitter. In music broadcast mode: At the same time, long press hold the 'intercom button + volume down button' to switch between music broadcast reception mode and music broadcast transmission mode.

VI: music sharing and intercom at the same time

After the two devices are switched on and the intercom is connected successfully, one of the devices is connected to play music wirelessly, and the device connected to the mobile phone double-clicks the intercom button to open the music sharing function. At this point, you can enable both music sharing and intercom functionality simultaneously. Double-click again to disable the music sharing feature.

VII: Shutdown operation

Recorder power button: Only controls the power on/off of the recorder.

Wireless power button: Controls the power on/off of the wireless function and also controls the shutdown of the recorder (i.e., when the recorder is turned on and the wireless function is also turned on, long pressing and holding the wireless power button to shut down will also shut down the recorder).

Frequently Asked Questions

BLAISE S1 Pro use common problems:

1. boot connected to the wireless, play music without sound, please confirm that the mark line in the correct interface or mark line interface has been fully access to the corresponding interface;.
2. In the normal use of the process, due to the car recorder power consumption is higher than the wireless, the car recorder will first shut down, wireless normal work, is a normal phenomenon.
3. The mobile phone connects to the WIFI of the car recorder, and the mobile phone has no signal, which is a normal phenomenon.
4. Car recorder connection APP is not successful, confirm that the mobile phone WIFI connection is the name of the machine's WIFI; or mobile phone exit APP, machine switch to reconnect.
5. If the charging red light does not light, confirm that the charging cable is on the correct charging interface, or the voltage may be too low, need to charge for half an hour.
6. Insert the machine into the charging cable to charge, the wireless function will automatically shut down, the car recorder side will be on, is a normal phenomenon. Recommended in the charging process, turn off the car recorder, do not use the machine.
7. Car recorder memory card, due to high-definition video read and write into, such as the need to buy, it is recommended to buy a brand of high-speed memory card (V30 high-speed card).
8. In the process of using the car recorder, in case of crash, please long press the car recorder at the same time to reset the key and photo button, and then reboot to use.
9. For the recorder's WiFi connection, it is recommended to first connect to the WiFi port in the mobile phone settings, then enter the app.

Caveat

1. Do not put the product into open flame to avoid explosion;
2. Do not disassemble the product to avoid damage to the product's electronic components;
3. Please do not close to sharp objects to cause damage to the product;
4. Please place it in a dry place if it is not used for a long time;
5. Before using the wireless device, please fully charge it first.
6. If the red light does not come on when charging, the voltage may be too low;
7. In order to extend the life of the built-in polymer battery, please charge the device at least once a month.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures.

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions.

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

* RF warning for Portable device:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
