

INTELLIGENT DETECTOR

The new generation of detectors adopts military quality,more accurately indicates the strength of the sianal sourceand adopts an efficient and convenient method, so that allproducts that violate your personal privacy have nowhere to hide. The device uses US military technology,andexclusively develops various market-oriented bugs, cartrackers, mobile phone undercover software,wirelesspinhole cameras,surveillance cameras, casino fraud andcheating equipment and other products. This product fullymeets the military and police reconnaissance functions inthis feld. At the same time, the amplitude detection ofelectrical radiation sources can protect you and your familyfrom electromagnetic wave radiation. This product takes the lead in adopting the digital receiving method, which isdifferent from the products on the market. It not onlybroadens the frequency of exploration, but also effectivelyavoids messy signals in life from interfering with products.

Product Schematics

全新一代探测器采用军工品质打造，能更加精准的提示信号源的强度，高效便捷的使用方法，让一切侵犯您个人隐私的产品无处可藏。设备采用美国军用技术，是独家研发的一款针对市场的各种窃听器，汽车跟踪器、手机卧底软件无线针孔摄像机、监控摄像头、赌场诈骗作弊器材等产品定向开发的安防类别仪器。产品完全满足这一领域的军用/警用侦查功能。同时对电器辐射源的量级探测可保护你及家人远离电磁波辐射的伤害，本产品率先采用数字接受模式，与市场上的产品不同，不仅拓宽了探索频率，并有效避开生活中无处不在的杂乱信号对产品的干扰。

产品功能示意图：

Product Schematics

A: Detection of radio waves (wireless cameras/ eavesdroppers, etc.)

- a. Press and hold the power switch for 3 - 5 seconds. Once you hear a "beep" sound, release your finger. The light will turn on, and when turned on, it defaults to detecting wireless cameras and wireless listeners.
- b. If the signal indicator light flashes and there is a sound prompt, prompt, it indicates the presence of an emission source. The more signal indicator lights there are, the stronger the signal.
- c. Click the sensitivity adjustment button. The more signal indicators there are, the higher the sensitivity, which can expand the search range.
- d. Cycle the adjustment of the sensitivity button. Reducing the number of indicator lights decreases the sensitivity and the detection range, ultimately helping to locate the emission source.

B: GPS magnetic field detection

Press the mode switch button , and the light will turn on. Bring the magnetic field induction probe closer to the magnetic field source. When the signal indicator light turns on and the buzzer alarm works, it indicates that there is a magnetic field or suspicious items with strong magnetic fields near the magnetic probe

C: Detecting hidden cameras (it is recommended to turn off room lighting)

- a. Short press the mode switch button to turn on the light and the 4 infrared lights behind will turn on. Short press the sensitivity adjustment button to control the flashing speed of the red light. Each time the LED sensitivity button is pressed, the flashing frequency will increase by one level to control the flashing speed of the red light. It can be adjusted in a loop to adapt to the preferences of various groups of people.
- b. Move the instrument up, down, left, and right to perform laser scanning on the surrounding environment, and observe with the eyes through the special filter attached to the machine. If there is a camera lens ahead, you will notice a very strong bright spot flashing.

D: Anti-Theft Alarms:

Short press the mode switch button to turn on the light and enter the anti - theft alarm mode. The anti - theft alarm will start after 10 seconds. When someone or an object triggers the machine, it will emit a beep alarm sound. The beep alarm sound will stop after 10 seconds, with an interval of 10 seconds, and so on.

E: Detecting night vision cameras (it is recommended to turn off room lighting)

- a. Short press mode switch button, and the light is on.
- b. Move the instrument up, down, left, and right to perform night vision scanning on the surrounding environment. When encountering infrared night vision equipment, it will emit a buzzing alarm sound.

Common problem

A.Why is the silent sleep tracker not detected?

Answer: The commonly used sleep locator works once a day, and only works for 5 - 7 minutes at a time. So when the detector is detecting wireless signals, the locator may not send a signal.

B.Why is the position of the real - time locator not accurately detected?

Answer: The real - time locator generally sends a signal every 10 seconds. Please do not move back and forth during detection. It is best to fix it in one position for more than 5 minutes, and then change to another position to continue detection.

C.Why does the detector terminal beep "DiDi"?

Answer: Please clear the surrounding environment, because the surrounding interference signal is too strong. Lower one notch.

D.Why do the detectors near the windows of the house make uch a loud noise?

Answer: The window is made of aluminum alloy, which forms a loop antenna, and the signal reception is particularly good.

E.Why is the camera not detected?

Answer: It is possible that the camera is not working, or it is possible that the camera is a wired camera, and the infrared light detection is used instead.

Basic parameters

Volume	110X30X10mm
Weight	30G
Charging interface	Type-C
Working hours	Continuous 25 hours
Antenna gain	-56db
Charging power supply	DC5V/1A
Battery	3.7V/350mA polymer lithium battery
Sensitivity	Level 5 adjustable
Receiving frequency range	1MHz--6.5GHz
Signal detection range	5CM-8M
Optical lenses	Special dedicated filters
Laser detection distance	10CM-6M
Material quality	ABS

Applicable people (scope)

- 1. People who often use bank cards.
- 2. Business travelers who take hotels as their home.
- 3. Women who are at risk of being candidly photographed.
- 4. People who often go to public entertainment places for consumption.
- 5. People who often go to various shopping malls to try on clothes.
- 6. People who care about their own personal safety and the safety of others.
- 7. Persons who contact and keep business secrets.
- 8. Security personnel in places with commercial and technical secrets.
- 9. Professionals who prevent candid photography and eavesdropping.
- 10. Those concerned about whether the drone camera is quietly staring at their window.
- 11. Mortgage cars, used cars, guarantee companies, information finance companies.

探测器说明书

产品快速使用说明：

一.探测无线电波(无线摄像机/窃听器 etc)

- 1. 长按电源开关3-5秒，听到“滴”声后，松开手指灯亮，开机默认探测无线摄像头、无线监听器模式。
- 2. 信号指示灯若闪烁，有声音提示，表示有发射源。信号指示灯越多，表示信号越强。
- 3. 点击按钮+灵敏度调节按键，信号指示灯越多，灵敏度越高，可扩大搜索范围。
- 4. 循环调节灵敏度按键，减少探测范围，可最终找到发射源。

二.GPS磁场探测：

按下模式切换键灯亮，将磁场感应探头靠近磁场源，信号指示灯亮起，蜂鸣警报器也将工作，表明磁探头附近有磁场或带有强磁可疑物品存在，

三.探测隐藏摄像头(建议关闭房间灯光)

- 1. 短按模式切换键灯亮，后面四颗红外灯亮起，短按灵敏度调节键以控制红灯的闪烁快慢。每按一次LED灵敏度按键，闪烁频率会快一以控制红灯的闪烁快慢个级别，循环调节，可适应各类人群喜好。
- 2. 上下左右移动本仪器，对周围环境进行激光扫描，眼睛通过本机配件特殊滤光片观察。如前方有摄像机镜头，你会发现有极强的亮点在闪烁。

四:防盗报警：

短按模式切换键灯亮，进入防盗报警模式，防盗报警10秒后启动，当有人或者物体触发到机器时，机器会发出滴滴报警声，滴滴报警声10秒后停

止，间隔10秒，以此类推。

五:探测夜视摄像头(建议关闭房间灯光)

- 1. 短按模式切换键灯亮，
- 2. 上下左右移动本仪器，对周围环境进行夜视扫描，遇到红外夜视设备时，会发出蜂鸣报警声。

六.关于充电

使用TYPE-C口充电线进行充电，充电时亮红灯，充满电熄灭。

七.常见问题：

- 1. 为什么没有探测到静默休眠跟踪器？
答:常用休眠定位器一天工作一次，一次只工作5-7分钟，所以探测器正在探测无线信号时，定位器有可能没有发信号。
- 2. 为什么没有准确的探测到实时定位器的位置？
答:实时定位器一般10秒左右发一次信号，探测时请不要来回移动，最好固定在一个位置5分钟以上，再换一个位置继续探测。
- 3. 为什么探测器终端“滴滴”乱叫
答:请清空周边环境，由于周边干扰信号太多太强。低一档。
- 4. 为什么房子窗户边探测器叫得特别厉害？
答:窗户是铝合金，组成一个回路天线，接收信号特别好
- 5. 为什么没有探测到摄像头？
答:有可能摄像头没有在工作，有可能摄像头是有线摄像，这时候改用红外灯光探测，

Scope of application

- Detect if your car or office is installed with wireless eavesdrop ping devices.
- Detect whether the mobile phone is eavesdropped or abnormal (when standby, it emits a signal for no reason).
- Detect if your car is installed with GPS tracking eavesdropper, GPS location tracker.
- Detect whether your working environment and residential buildings have roof base station radiation.
- Detect mobile phone SMS sending and receiving signals, mobile Internet access signals, mobile phone switches and call signals.
- Detect wireless network signal, mobile phone base station signal, wireless monitoring system.
- Detect whether household appliances such as microwave ovens leak electromagnetic radiation that is harmful to the human body. human body.
- Detect whether there is strong radiation called "mobile phone killer" in the environment.
- Detect suspicious radio signals in the environment.
- Detect more concealed 5.8GHz wireless camera, wireless eavesdropper, wireless monitoring signal.
- Check wireless pinhole cameras in hotels, restrooms, guesthouses, entertainment venues, locker rooms.
- Use in business negotiation, school invigilation sites, factories, military facilities or government agencies to prevent candid photography and eavesdropping.
- Prevent wireless candid photography at ATM machine withdrawals, movie theaters, concerts, art galleries or museums, etc.
- When purchasing a building, first detect whether there is electromagnetic radiation that is harmful to human health.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.

Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. such modifications could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. This equipment complies with FCC's RF radiation exposure limits set forth for an uncontrolled environment. This device and its antenna(s) must not be co-located or conjunction with any other antenna or transmitter.

八.基本参数：

尺寸	110X30X10mm
重量	30克
充电口	Type-C
工作时长	连续使用25小时
天线增益	-56db
适配器	DC5V/1A
电池	3.7V/350mA 聚合物锂电池
灵敏度	5 档可调
接收频率范围	1MHz-6.5GHz
信号探测范围	5CM-8M
光学镜片	专用滤镜片
激光探测距离	10CM-6M
材质	ABS

九.适用人群(范围)

- 1. 经常使用银行卡的人群。
- 2. 以酒店为家的出差族人群。
- 3. 易被偷拍的美貌女子常去公共娱乐场所消费的人群。
- 4. 常去公共娱乐场所消费的人群。
- 5. 常去各种商场试穿的人群。
- 6. 尊重自己个人隐私与他人隐私的人群。
- 7. 接触、保管商业机密的人群。
- 8. 商业机密与技术机密场所的安保人群。
- 9. 反偷拍、反偷听的专业人群。
- 11. 无人机摄像头是否盯上你的窗口。
- 12. 抵押车，二手车，担保公司，信息金融公司。

十.适用范围：

- 1. 探测您的汽车或办公室是否被安装无线偷听器、无线窃听器。
- 2. 探测手机是否被窃听或异常(待机时无缘无故向外发射信号)。
- 3. 探测您的汽车是否被安装GPS跟踪偷听器，GPS定位跟踪器。
- 4. 探测您的工作环境、住宅楼宇是否有楼顶基站辐射。
- 5. 探测手机短信收发信号、手机上网信号、手机开关及通话信号。
- 6. 探测无线网络信号、手机基站信号、无线监视系统之场强。
- 7. 探测家用电器如微波炉等是否泄漏对人体有危害的电磁辐射。
- 8. 探测身处环境是否有被称为“手机杀手”的强辐射。
- 9. 探测身处环境是否有可疑的无线电信号。
- 10. 探测更隐蔽的5.8GHZ无线摄像头偷拍、无线偷听器、无线监控信号器。
- 11. 检查酒店、洗手间、宾馆、娱乐场所、更衣室无线针孔摄影机。
- 12. 商务谈判、学校监考场所、厂、军事设施或政府机关防偷拍偷听。
- 13. 在AM机取款、电影院、演奏会、美术馆或博物馆等防无线偷拍。
- 14. 购买楼房，先探测有无危害人体健康的电磁辐射。
