Proper disposal of the product Household waste at the end of its useful life - Prevent possible harm to the environment or human beings. - Health is associated with uncontrolled waste disposal, keep it separate. - Recycle from other types of waste and recycle responsibly to promote sustainable reuse of material resources Household users should contact the retailer from whom they purchased this product or their local government office to find out where and how they can recycle this item in an environmentally safe manner. - Business users should contact their supplier and check the terms and conditions of their purchasing contract, this product should not be mixed with other commercial waste for disposal.	FCC Statement Any changes or modifications not expressly approved by the party responsible for compliance may void the user's right to operate the equipment. This device complies with Part XV of the FCC Rules and operation is subject to the following two conditions: 1. This device must not cause harmful interference; 2. This device must accept any interference received, including interference that may cause undesired operation. FCC Radiation Exposure Statement This device meets the FCC radiation exposure limits established for uncontrolled environments. Contact Us Whatever you need, we're here to help. Just contact us and we'll do our best to respond within 24 hours!	FCC WARNING This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: —Reorient or relocate the receiving antenna. —Increase the separation between the equipment and receiver. —Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. —Consult the dealer or an experienced radio/TV technician for help. Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. such modifications could void the user's authority to operate the equipment. The device has been evaluated to meet general RF exposure requirement. This equipment complies with FCC's RF radiation exposure limits set forth for an uncontrolled environment. This device and its antenna(s) must not be co-located or conjunction with any other antenna or transmitter.
