

EXHIBIT 3 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a white test bench holds a spectrum analyzer. A long orange cable connects the analyzer to a small electronic device on the floor. The device is plugged into a power outlet on a wall with a red emergency stop button. To the right is a wooden workbench. The floor is a light-colored metal plate.
Radiation Emission Test View (30MHz to 1GHz)	 A photograph of a radiation emission test chamber. The walls are covered with white, cross-shaped electromagnetic interference (EMI) shields. In the center, a black test table is supported by two large white concrete blocks. The floor is marked with yellow and black hazard tape. A computer monitor and keyboard are visible on a desk to the right.
