5. Press the ON/OFF button to display 1-9 numbers corresponding to slower checkpoints speed.

Installation Instructions

1. The first installation method is to tear off the backing adhesive attached to the back of the machine and directly stick it to the position to be installed. The backing adhesive is divided into several sections, and according to the position that needs to be pasted, the backing adhesive template is selected, which is similar to a ceramic tile surface. The outermost circle is enough (as shown in Figure 3)
2. The second installation method is to tear off the adhesive sticker on the side of the fitting and stick it directly on the back of the machine, paying attention to the parallel direction of the machine when pasting (As shown in Figure 2)
3. Glue the Velcro needle surface and the matte surface together, find the corresponding position on the wall, determine the position, tear off the sticker behind the matte surface, and stick it to the wall (as shown in Figure 3)

Product Introduction:

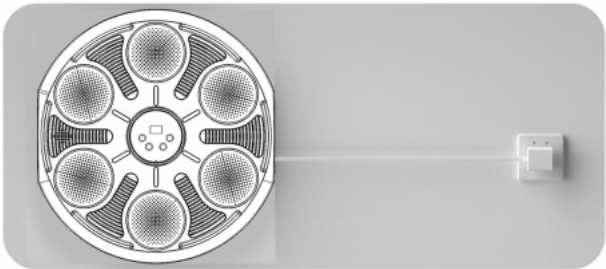

1. **Speed Adjustment:** The device is equipped with 12 speed levels, ranging from H01 to H12, each associated with a distinct frequency of target blinking. The speed progressively increases with the level number, getting faster from H01 to H12.
2. **Mode Selection:** There are 12 preset modes available, identified as P01 to P12. Each mode offers a different pattern regarding the number and position of the blinking targets.
3. **Music Toggle:** To switch between the device's internal music and music streamed via Bluetooth, simply press the "On/off" button while in any mode.
4. **Count Display:** The device can display the count of strikes, with the ability to show numbers ranging from 000 to 999.
5. **Operational Step Optimization:** For a streamlined experience when adjusting the volume or changing modes, users have the option to long-press the "On/off" button. This action will lock the device into performing a single function until the button is released or the operation is completed.

Product Name : Musical Boxing Machine
Product Size : 45*42*6.2 cm
Product NW/GW : 2kg/25kg
Power : 5W Output DC5V--1A(2A) Pin Input 100-240V
Battery Capacity : 2000mA
Working Voltage : 3.TV

1. Do not use until 30 minutes after meal
2. Do not use during pregnancy or menstruation
3. Electronic products cannot be washed with water and can be wiped with a cloth.
4. Charge the machine battery promptly after it runs out of power to prevent battery depletion
5. Stop using immediately if you feel uncomfortable during use.
6. It is recommended to wear a boxing ring when using.
7. It is prohibited to dismantle the product without authorization.

Charging Instructions:

Use power supply equipment (self-provided): Input 100-240V output bC5V--1A(2A) charging through the supplied slave wire link The location close to the wall target. The socket should not be more than 1.5 meters away from the machine interface.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure statement

The device has been evaluatec to meel general RF exposure requirement. The device can be used in porlable exposure condition without restriction.
