車載メディアUSB-C/Aポート(5V/1A, 5V/2A)

Einbaueinheit USB-C/A-Anschlüsse in Auto (5V/1A, 5V/2A)

Unavailable Types | 対応しない電源アダプター | Nicht unterstützte Adapter

USB-C/A port(5V/1A, 5V/2A)

USB-C/A-Anschluss (5V/1A, 5V/2A)

Build-in Car USB-C/A port(5V/1A, 5V/2A)

車載メディアUSB-C/Aポート(5V/1A, 5V/2A)

Einbaueinheit USB-C/A-Anschlüsse in Auto (5V/1A, 5V/2A)

Note: Make sure a single port power output is <15W. If multiple ports are used simultaneously, the output power may be distributed, resulting in less than 15W per port.

注意: 複数ポート同時使用時は出力が分散し、1ポートあたり15W未満になる恐れがあります。単ポートで15W以上の出力がある電源をご使用ください。

Hinweis: Achten Sie darauf, dass ein einziger Ladeanschluss mindestens 15 W Leistung liefert. Bei gleichzeitiger Nutzung mehrerer Anschlüsse kann sich die Leistung aufteilen, wodurch weniger als 15 W pro Anschluss verfügbar sind.

EN:AirVent Compatibility | JP:フックは対応するまで出し口 | DE:Kompatibilität mit Lüftungsschlitzen

Vertical/horizontal/Grid Air Vent

垂直・水平・格子状の吹き出し口に対応

Vertikale/horizontale/gitterförmige Lüftungsschlitze

Round AirVent

丸型吹き出しタイプに非対応

Runde Lüftungsschlitze (nicht kompatibel)

FAQ

Q: Why does it heat up?

A: 1. In fact, wireless charges charge your phone through magnetic fields and current, so slight heating is normal. Note that if your phone case is too thick or not properly aligned with the magnetic charging position, it will overheat. Additionally, charging at low battery levels (less than 20%) can also cause the phone to heat up.
2. It is normal for the product to heat up slightly during frequent use (such as navigation, gaming, or streaming sessions).

Q: What should I do if the charging speed is slow?

A: 1. The device usually takes 3-4 hours to fully charge.
2. Avoid placing metal accessories, credit cards, or pop sockets between the devices, as they can cause high temperatures and slow down the charging speed.
3. Using the phone while charging can cause it to overheat, which can reduce the charging speed.

Q: What should I do if my phone charges intermittently or does not charge?

A: 1. Check if the magnetic case is too thick and remove any metal or uneven objects.
Note: (1) Please use phone with magnetic phone case(thickness < 5mm). (2) The third-party Magnetic cases may affect wireless charging.
2. Unplug and reset the charging adapter after a few seconds, try replacing the charging cable and plug, and ensure that the power output of the car cigarette lighter socket exceeds 15W. Note that some cigarette lighters may not provide 15W output when using multiple sockets simultaneously.

Package List

1 x MagLeap Wireless Car Charger
1 x Air Vent Mount
1 x User Manual

Specifications

Input 5V=5A, 9V=2.22A
Output 5W, 7.5W, 10W, 15W(Max)

Product Diagram

Wireless Car Charger
1. Charging Coil Position
2. LED
3. USB-C Charging Port
4. X-Not
5. Built-in Cooling Fan

Air Vent Mount
1. Ball Joint
2. Knob
3. Hook

Instructions for Use

1. Install Bracket:
Remove your device support from the back of the wireless charging panel and place it on the ball joint of the air vent mount.
2. Connect the ball joint to the wireless charging panel and tighten the ball joint nut.

Mount on Air Vent:

Insert the air vent mount onto the air outlet blades of your car's air conditioning vent.

Charging or Removing Your Phone:
Our automatic magnetic alignment feature allows you to easily connect and detach your phone.

LED Indicator Status:
1. Power-On: The LED lights up for approximately 20 seconds, then turns off automatically.
2. Standby Mode: The LED remains off.
3. Charging: The LED lights up for approximately 20 seconds, then turns off automatically.
4. Fully Charged: The LED remains off.
5. FOD Detected (Foreign Object Detection, such as metal or magnetic objects): The LED flashes rapidly.
This may indicate the presence of a metal object or an unsupported accessory.

Attention

1. Do not drop, hit, or disassemble the device.
2. To enable phone attachment, ensure your phone has magnetic absorption capability or is equipped with magnetic accessories (e.g. magnetic protective case).
3. Magnets may interfere with the product's magnetic charging or cause malfunctions. To avoid interference with other devices and products, keep magnets away from the product.
4. Ensure your device supports the Qi wireless charging protocol or install a wireless receiver that complies with the Qi standard (not included).
5. For fast charging, use an adapter with a power of more than 18W.
6. Do not use or store the magnetic wireless charger in a high-temperature or humid environment to prevent damage to internal circuits.
