Quick Guide

Welcome to use VERTU IRONFLIP

Device Model : VTL-202403

Equipment name : VERTU IRONFLIP 5G Digital Mobile Phone

Manufacturer : Chengdu VERTU Business and Service Management Co., Ltd.

OVERVIEW

Your VERTU IRONFLIP

The User Guide is designed to show you how to work with main features of the VERTU IRONFLIP mobile phone. To get premium privileges and benefits, such as My VERTU, VERTU Life, and Find My VERTU, you need to register a VERTU account.

The images used in the User Guide are for illustrative purposes only and may differ from the precise appearance of the VERTU IRONFLIP phone.

Help and Support

To learn more about your device:

Press use Vertu Life app to contact VERTU.

Refer to the User Guide by visiting website:

Visit the VERTU website at <https://www.vertu.com> to consult the User Guide for the phone.

FCC Caution

§ 15.19 Labelling requirements.

This device complies with part 15 of the Fcc Rules, Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

§ 15.21 Information to user.

Any Changes or modifications not expressly approved by the paty responsible for compliance could void the user's authority to operate the equipment.

§ 15.105 Information to the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference toradio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures :

- Reorient or relocate the receiving antenna.
 - Increase the separation between theequipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help
-

IC Caution

Operations in the 5.15-5.25GHz band are restricted to indoor usage only

English:

This device complies with industry Canada licence-exempt RSS standard(s).

Operation is subject to the following two conditions: (1) This device may not cause interference, and (2) This device must accept any interference, including interference that may cause undesired operation of the device.

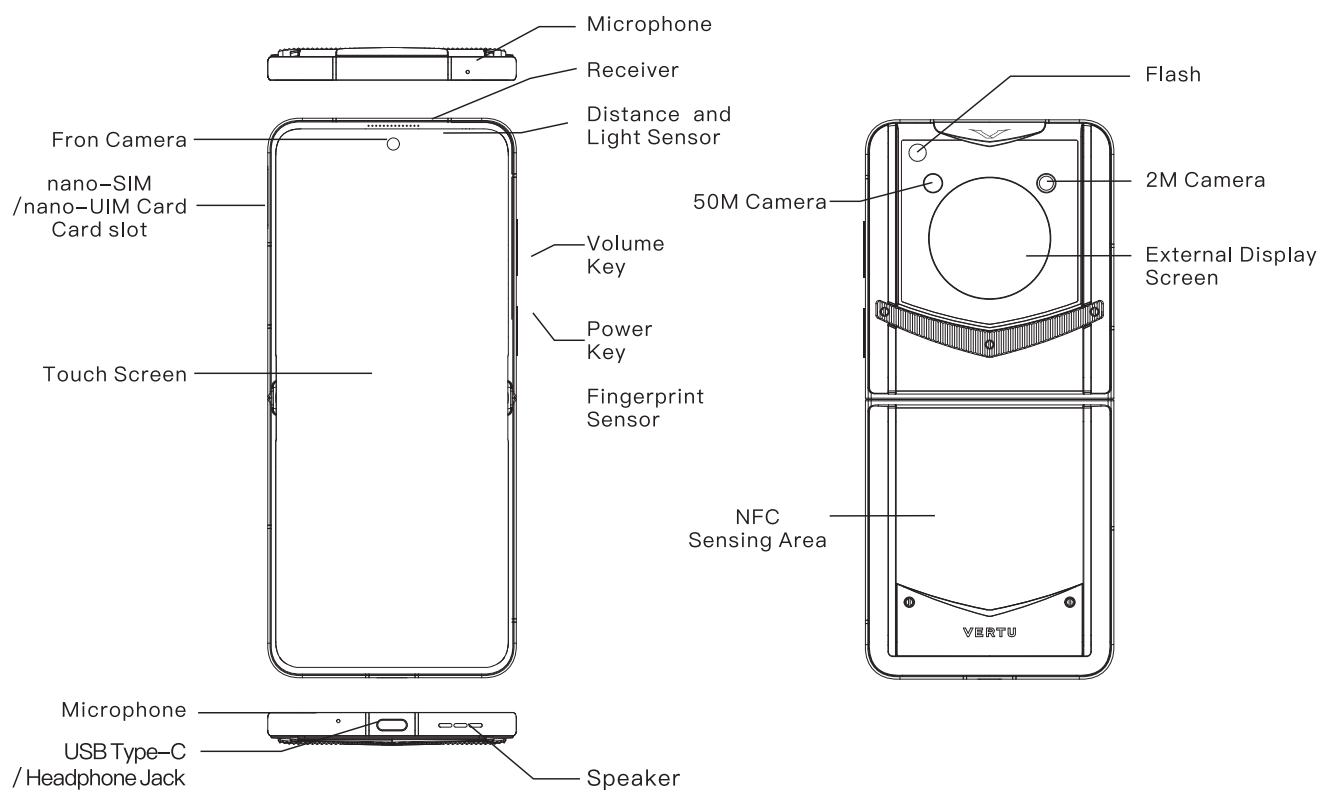

French:

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

(1) l'appareil ne doit pas produire de brouillage, et

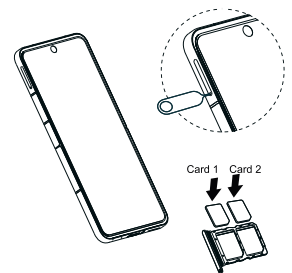

(2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

PRODUCT OVERVIEW

GET STARTED

- Use the ejector pin to remove the card tray as shown, and install the nano-SIM or nano-UIM card.
- This mobile phone supports 2G/3G/4G/5G networks of China Unicom, 2G/4G/5G of China Mobile and China Telecom, and the 5G network of China Broadcasting Corporation.

• Attention!

- If both mobile phone cards are from China Telecom, the secondary card (non-data card) requires VoLTE activation to be used.
- Please consult with your local network operator to learn whether the Volte function is supported.
- Whether SA/ NSA is supported depends on the deployment of the local network operator.

• Warning!

- Please use the supplied ejector pin, and do not use sharp objects as a substitute. The card may not be taken out if non-standard needle is used.
- Please align with the circular center of the cardholder to poke it out to avoid any damage to the phone.
- Please use the standard nano-SIM card/ nano-UIM card provided by the operator. Don't insert cards of other specifications or cut the cards to avoid any damage to the phone .
- Don't insert or take out the card when the phone is connected to external power supply.
- Do not attempt to disassemble the rear cover and battery of the mobile phone. To replace battery, please contact the After-sales Service Center of VERTU.

• Description:

- You may insert or take out the nano-SIM/ nano-UIM card when the mobile phone is on .
 - When the mobile phone needs to be rebooted in the case of errors, you may attempt to tap and hold the Power Button for more than 10 seconds to reboot the mobile phone.
 - In the case of low battery level , the mobile phone may not be turned on even when it is in charging state . In that case, please keep charging the mobile phone for 30 minutes to restore the battery level. If the mobile phone still cannot be turned on after being charged for 30 minutes , please contact the After-Sales Service Center of VERTU.
 - Please use the standard charger and data cable provided by VERTU. Charging with unauthorized charger or data cable may cause battery explosion or damage your phone .
-

• **Caution !**

This product is a foldable phone, with an inward-folding inner screen. Please pay attention to the following:

- The inner screen comes with a pre-applied specialized protective film. Do not remove or apply any other protective films yourself, as it may cause damage to the screen. If it's necessary to replace it, please proceed to the VERTU official authorized customer service center for proper handling.
 - Do not place objects such as cards, coins, or keys on the inner screen while folding the phone, as they may cause damage to the screen.
 - Avoid pressing the inner screen or the camera area on the screen with any hard or sharp objects (like pens or keys), or applying excessive pressure, as this may harm the screen.
 - Do not fold the mobile phone backward to prevent damage.
 - Before storing the phone, it is recommended to fold the phone first to avoid hard or sharp objects that may scratch or damage the inner screen.
 - Slight creases and bending in the folding area of the inner screen, as well as slight sound when the phone is folded or turned over are normal phenomena.
-

PHONE PROTECTION

General Protection

- Use VERTU IRONFLIP products as described in the documentation. Improper use may affect the performance.
- Do not attempt to disassemble the VERTU IRONFLIP phone. You only need to open SIM card slot. Your VERTU IRONFLIP mobile phone shall be only repaired by service personnel authorized by VERTU.
- Do not use the VERTU IRONFLIP phone roughly or incorrectly.
- Only use the accessories permitted by VERTU.
- The attached charger is only used for charging VERTU IRONFLIP mobile phones. It shall not be used for any other devices , otherwise permanent damage may be caused to the mobile phone, battery or charger .
- Please keep your VERTU IRONFLIP mobile phone and all parts and accessories out of reach of children and pets .
- Please don't make VERTU IRONFLIP mobile phone, battery or accessories in contact with liquid or moisture and dust and dirt.
- Don't expose your VERTU IRONFLIP mobile phone to extreme humidity , otherwise this may cause the battery to temporarily stop working. When the temperature is below the freezing point , its performance will be significantly reduced.
- Don't smear paint or other similar substances on your VERTU IRONFLIP mobile phone .
- Use only a soft, clean cloth to clean your VERTU IRONFLIP phone. Don't use chemicals , detergents , abrasives or any liquids . Clean the camera before use .
- Don't insert any sharp object into speaker or data port.

If the VERTU IRONFLIP mobile phone or any accessory does not work properly, please contact a VERTU dealer.

Imported Leather

Leather, being a natural material, can result in permanent marks or stains due to a variety of circumstances during use.

To prevent this:

1. If your mobile phone gets wet accidentally, dry it using an absorbent soft cloth as soon as possible.
2. Avoid exposing the leather to intense light, high temperatures, and damp conditions, and avoid contact with items and materials that could soil or scratch the surface.
3. VERTU recommends storing the mobile phone in a protective case when not in use.

Leather

The leather used by VERTU artisans is unique, and natural markings are considered a characteristic of quality leather.

All leather cases are susceptible to damage and therefore should be carefully maintained.

Please avoid the following:

1. Contact with water or exposure to humid environments.
2. Contact, friction, or impact with hard surfaces.
3. Exposure to extreme temperature conditions.
4. Contact with oily substances such as hand sweat, cosmetics, and solvents. Severe hand sweat will cause discoloration of leather after being used for a period of time.

Non-precious Metal

The metal components of VERTU products are crafted to high standards and must be well-maintained to preserve their appearance.

Please avoid the following:

1. Contact with chemical substances, such as solvents, alkalis, acids, carbonated drinks, and salt water. If contact occurs, clean promptly with a dry soft cloth.
 2. Contact with sharp objects.
 3. Dropping onto or striking against hard surfaces.
 4. Metal polishing.
-

Precious Metals

Precious metals such as gold and platinum have lower hardness when used as composite materials. Therefore, extra caution should be taken when handling VERTU products that contain such materials.

Gems

Gems are quite hard and durable, but they can still be damaged if not handled properly. For example:

1. A severe impact against a hard surface can fracture the gem or damage its setting, resulting in the gem becoming loose or dislodged.
2. Take care when in contact with other jewelry like diamond rings and diamond earrings, as they can cause damage to the gem or setting.
3. Be mindful not to let threads (particularly artificial silk threads) snag the setting, as this could bend the setting and loosen the gem.
4. It is recommended to store your VERTU mobile phone in its leather case when not in use, especially before placing it in a handbag or other types of luggage.

Sapphire and Ceramics

Sapphire and ceramics are extremely hard materials that are also brittle and can be easily scratched by other hard materials or objects. Additionally, they may also be damaged if dropped.

Please avoid the following:

1. Contact with hard materials, such as diamond jewelry, nail files, grinding tools, and mineral crystals
 2. Dropping the product or colliding with hard surfaces.
 3. Repeatedly rubbing against hard surfaces.
-

SECURITY AND ASSURANCE

Security Text

The sales package may contain a variety of different products and components (hereinafter collectively referred to as "products"), such as a mobile phone with various chargers. The suggested guidelines below are applicable to all products and components. Operating contrary to the guidelines may lead to personal safety and data issues, could damage the product, and may also contravene applicable legal regulations.

Medical Precautions

The operation of any radio transmitting equipment (including wireless telephones) may cause interference with the function of medical equipment without appropriate protection mechanisms. If you are unsure about whether the medical equipment has an appropriate protection mechanism for external radio-frequency energy, consult a doctor or the manufacturer of the medical device.

Medical device manufacturers recommend maintaining a distance of at least 15.3 cm (6 inches) between wireless devices and implanted medical devices (such as pacemakers or implantable cardioverter defibrillators). Personnel using such equipment should also pay attention to:

- Do not put the mobile phone in your chest pocket.
- Place the mobile phone on the ear opposite to the side of the medical equipment.
- If you suspect interference, turn off the mobile phone immediately.
- Follow the guidelines provided by the manufacturer of the implanted medical device.

Consult your healthcare provider if you have any questions about using a wireless device with an implant medical device.

To avoid hearing damage, do not expose yourself to high volume levels for long durations. Your ability to hear external sounds may be affected when using earphones. Do not use earphones in places where they may pose a risk to your personal safety. Use earphones at a moderate volume and don't place the device near your ear when using its speaker.

Shutting off the Mobile Phone in Restricted Areas or Dangerous Areas

Mobile phones should be turned off in areas where their use is prohibited or where they could cause interference or danger, such as near medical devices, fuel, chemicals, or blasting zones.

Use of Airplane Mode When Traveling

Unless you are explicitly asked to turn your phone off, you may choose Airplane (Offline) mode, i.e. you will not be able to make or receive any calls or use other features that require cellular, Wi-Fi or Bluetooth coverage. However, you can still make an emergency call if necessary.

Use inside the Vehicle

Radio signals may affect electronic systems that are not properly installed or shielded in the vehicle, such as electronic fuel injection system, electronic anti-lock braking system, electronic speed control system and airbag system. For more information, please consult the manufacturer of your vehicle or its equipment.

Only qualified service personnel are permitted to install a mobile phone in a vehicle. Improper installation or maintenance can harm the device and may invalidate the warranty. Regular inspections are recommended to ensure all wireless devices in a vehicle are correctly installed and functioning. Do not transport the mobile phone, its components, or accessories in the same cargo compartment with combustible liquids, gases, or flammable and explosive items. Bear in mind that airbags create significant pressure when they deploy; thus, do not place mobile phones or accessories in the vicinity of an airbag.

Keeping Children out of the Product

Please ensure that the product, along with all of its components and accessories, is kept out of reach of children and pets. Failure to do so could result in injury to them and void your warranty.

Driving Safety First

Adhere to all applicable local laws. Always keep both hands free while driving to operate the vehicle. Road safety should always be the first consideration.

Magnetic Field

Keep your mobile phone at a distance from magnets or magnetic fields.

Backup

To ensure the security of your data, keep it in two separate locations such as a mobile phone or personal computer. It is particularly important to back up your data before any repair or replacement, as content and data may be lost during this process.

Battery, Charger and Other Accessories

This product has a built-in battery that is rechargeable but non-removable. Do not attempt to remove the battery, as it may cause damage.

A new battery will achieve maximum efficiency after two to three full charge and discharge cycles. The device's battery can undergo hundreds of charge and discharge cycles but will eventually deplete. If you notice that the device's performance has degraded (e.g., the phone's talk and standby times are significantly below normal levels), replace it with an original VERTU-certified battery (if the battery is removable) or take the associated device to the nearest VERTU-authorized service center (if the battery is not removable).

Always use the battery for its intended purpose. Never use any damaged chargers or batteries. Use only VERTU-certified batteries, and charge them only with VERTU-certified chargers designated for this device.

Using uncertified batteries or chargers could lead to fire, explosion, leakage, or other hazards. Do not connect any incompatible devices to the charger.

When not in use, disconnect the charger from the power socket or any devices. Avoid keeping a fully charged battery connected to the charger as overcharging could shorten its lifespan and pose other safety risks.

Do not modify, alter, or transform the battery, do not attempt to insert foreign objects into the battery, and do not immerse or expose it to water or other liquids. Improper use of the battery may cause fire, explosion, or other hazards. If the device or battery falls (especially onto a hard surface) and you suspect damage, please take it to the nearest VERTU authorized service center for inspection before further use. If the mobile phone's battery has not been used for an extended period, you may need to connect the charger, disconnect it, and then reconnect it to start charging again. If the battery is completely discharged, you will have to wait a few minutes before you can make a call.

Keeping Device Dry

The device is not waterproof, so always keep it dry.

SIM Card, UIM Card

VERTU IRONFLIP is designed to use Nano-SIM card or nano-UIM card.

This mobile phone does not support any other types of SIM cards or UIM cards. Use of incompatible SIM card or UIM card may damage your mobile phone or the card slot.

IMEI Number and Compliance Number

To find the IMEI number, please dial the serial number *#06# on the mobile phone. The 15-digit IMEI code corresponding to the mobile phone will be displayed immediately. Record this code and store it securely, to retrieve it in case the mobile phone is lost or stolen. The IMEI number can also be found on the compliance label (refer to the mobile phone's reference manual for the location of this label).

Camera Flash

Please keep a safe distance when using the camera's flash. Avoid using the camera flash when people or animals are in close proximity.

Do not obstruct the flash when taking photos. Please avoid direct eye exposure to the flashlight to prevent potential vision impairment.

Arousing Private Butler Services

VERTU provides 7*24-hour British private butler services. You can directly arouse the private butler service by pressing the power button and volume up button at the same time, starting an extraordinary life of beauty.

Digital Rights Management (DRM)

When using the mobile phone, you must comply with all laws and respect local customs, as well as the privacy and rights of others, including copyright. Copyright protection prevents you from copying, modifying, or transmitting images, music, and other content.

OS Update

The operating system of this product supports official system updates. It is recommended that you use online upgrades. If a user flashes a third-party ROM system or modifies system files through unauthorized means, this may cause system instability and present security risks. Our company will not provide support or assume any liability for end users in these scenarios.

All your personal information may be removed after a product upgrade; please back up your information before upgrading. Visit <https://www.vertu.com> to view the publicity information of product preset application software.

Specific Precautions for Mobile Phone

Avoid scratching the mobile phone's screen. Do not use pens, pencils, or other sharp objects on the product. It is recommended to use a screen protector to avoid damage to the glass and surface layer.

Do not drop, bump, or rub the mobile phone against hard surfaces. Especially avoid contact with hard objects such as diamond jewelry, nail files, abrasive tools, and sand.

All leather items are susceptible to damage and should therefore be well protected. Therefore, in addition to avoiding extreme temperatures, water, and humid environments, contact with oily substances, cosmetics, and solvents should also be avoided.

This mobile phone is not waterproof and should avoid contact with water, chemicals, and other liquids, including solvents, alkaline solutions, acidic solutions, cola-type beverages, and saltwater. If contact with the aforementioned liquids occurs, promptly wipe with a clean, soft, absorbent cloth.

Protecting Your Mobile Phone from Harmful Content

Your mobile phone may be exposed to viruses or other harmful content. Please take the following precautions:

- Be cautious when opening messages. They may contain malware or other content that could be harmful to your mobile phone or computer.
- Exercise caution when accepting connection requests, browsing the internet, or downloading content.
- Do not accept Bluetooth connections from untrusted sources.
- Only install and use services and software from trusted sources that provide adequate security and protection.
- Install antivirus and other security software on your mobile phone and any connected computers. Use only one antivirus software at a time (using multiple antivirus programs can affect the performance and operation of your mobile phone and/or computer).
- Take appropriate precautions when accessing pre-installed bookmarks and third-party installation links. VERTU doesn't endorse or assume any responsibility for these websites.

Other Servicing and Maintenance

The product in the sales package contains one or more sophisticated electronic devices. Therefore, VERTU strongly recommends that you familiarize yourself with the equipment instructions and these devices. To help you protect your warranty coverage, please follow the aforementioned "security text" and the following instructions:

- Please always use the product as described in the documentation .
 - Your product includes a high-definition screen, camera, and other similar components; therefore, operate it with extra caution to avoid scratches or damage.
 - Do not attempt to remove any fixed in-built battery or memory card.
 - Keep the product free from dust.
 - Do not expose the product to extreme temperatures, as it may temporarily cause the battery to cease functioning. Performance will be noticeably restricted when temperatures fall below the freezing point.
 - Do not misuse or mishandle the product.
 - Do not paint the product.
 - Only use a soft, clean cloth for cleaning the product. Don't use chemicals , detergents , abrasives or any liquids . Clean the camera before use
-

After-sales Service

Only service personnel authorized by VERTU can install or repair the product.

Manufacturer's Limited Warranty

To the extent permitted by applicable law, this limited warranty is in lieu of all other VERTU warranties and responsibilities, whether oral, in writing, by (non-mandatory) statute, in tort or otherwise, including without limitation any implied conditions, warranties or other provisions as to satisfactory quality or fitness for purpose. However, this limited warranty does not exclude or limit: i) your legal rights under applicable law; ii) any rights you have against the seller of the product.

VERTU warrants to you (the purchaser of this product) that, during the warranty period, VERTU or VERTU authorized service companies will service the product in compliance with this limited warranty, or if VERTU decides it is necessary, replace the product (unless otherwise stipulated by law), thus correcting any defects in materials, design, and workmanship of the product, free of charge within a commercially reasonable timeframe.

Warranty Period

The warranty period commences from the date the first end-user purchases the product. Different individual products and components within the complete mobile phone may be subject to varying warranty periods. These varying warranty periods are as follows:

- a. For the mobile phone and its internal fixed battery, the warranty period is twelve (12) months.
 - b. If you do not fall into the category specified in a) regarding the batteries (whether replaceable batteries included in the mobile phone sales package, internal fixed batteries replaced within the warranty period, or batteries sold separately), the warranty period is six (6) months.
 - c. All other electronic accessories not previously mentioned, including: chargers, charging cables, data cables, headphones, Bluetooth headsets, speakers, power banks, carry a warranty of twelve (12) months; all other non-electronic accessories not previously mentioned have a warranty period of six (6) months.
-

How to Obtain Warranty Services

If you wish to make a claim under this limited warranty, please return your product or the affected part(s) (if not the entire product) to a VERTU authorized service company. For more details on how to make a claim, you may call the VERTU Customer Service Center (domestic call charges or additional fees may apply). Information about VERTU authorized service companies and call centers can be obtained from the sales packaging or the local VERTU website.

Any claim under this limited warranty must be notified to VERTU or VERTU authorized service companies within a reasonable time after you become aware of the defect, and in no case later than the end of the warranty period.

When making a claim under this limited warranty, we will require you to provide: a. the product (or affected component) and b. the original proof of purchase, which should clearly list the seller's name and address, the date and place of purchase, the type of product, and the IMEI or other serial numbers.

Non-Warranty Coverage

1. This Limited Warranty does not apply to the user manual or any third-party software, settings, content, data, or links, whether included with the product, downloaded into the product, occurring at any stage of installation, assembly, transport or delivery, or obtained in any manner; these are not warranted. By utilizing third-party application software, you acknowledge and accept that the application software is provided "as-is". VERTU does not warrant that any VERTU software will operate in conjunction with any third-party hardware or software, that the operation of any software will be uninterrupted or error-free, or that any defects in the software can or will be corrected.

2. Given that the SIM cards and cellular networks and/or other networks or systems needed for product operation are provided by thirdparty independent operators, VERTU under this limited warranty is not responsible for the operation, availability, coverage, or services of cellular or other networks or systems. Before the product is repaired or replaced by VERTU or VERTU authorized service companies, the operator may need to unlock the SIM card lock or add additional locks to bind the product to a specific network or operator. Thus, VERTU is not responsible for any repair delays or inability to repair the product due to the operator's delay or failure to unlock a SIM card lock or other locks. In such cases, please first request the operator to unlock your product.

3. This limited warranty does not apply to: a) normal wear and tear (including but not limited to wear of the camera, battery, or display screen); b) defects caused by improper handling (including but not limited to defects caused by sharp objects, bending, compressing, or dropping); c) defects or damage resulting from the misuse of the "product" in violation of the instructions provided by VERTU (such as those stated in the "product's" User Guide); or other actions beyond the reasonable control of VERTU.

4. This limited warranty does not cover defects or so-called defects arising from the product's use or connection with any non-VERTU manufactured or supplied products, accessories, software, and/or services, or from using the product for purposes other than its intended use. If you or a third party unlawfully access services, other accounts, computer systems, or networks, losses may occur due to viruses. Methods of unlawful access may involve hacker attacks, password breaches, or various other techniques.

5. This Limited Warranty does not apply to defects caused by battery short circuits, damage to the battery seal or battery itself, evidence of battery tampering, or defects caused by the use of the battery in non-designated devices. If the product has been disassembled, altered, or repaired by any party other than VERTU authorized service companies, or if it has been repaired with unauthorized spare parts, or if the product's serial number, accessories date code, or IMEI number have been removed, defaced, altered, or made difficult to read for any reason, this limited warranty shall not apply. This determination shall be made by VERTU.

6. This Limited Warranty does not apply if the product has been exposed to moisture, extreme temperatures or environmental conditions (or rapid changes in such conditions), has suffered corrosion or oxidation, or has been affected by food or liquid splashes, or chemicals.

VERTU's Limitation of Liability

This Limited Warranty is your sole and exclusive remedy in the event of a defect in the product, and constitutes VERTU's sole and exclusive liability regarding such defect. To the extent permitted by applicable law, VERTU shall not be liable for the loss, damage, or corruption of data; loss of profits; the product being unfit for use or having faulty functionality; loss of business; loss of contracts; loss of revenue or anticipated savings; increased costs or expenses; or any other indirect, consequential, or special loss or damage. Within the scope permitted by applicable law, VERTU's liability shall be limited to the purchase value of the product.

Other Important Assurance Statements

The availability of products, features, application software, and services may vary by region. For more information, please contact your nearest VERTU brand store or VERTU authorized service company.

The performance of all wireless devices may be affected by interference.

VERTU assumes no liability for any radio or television interference caused by unauthorized modification of the product. Such modifications may invalidate your right to operate the device.

Reverse engineering of software in the product is prohibited to the extent permitted by applicable law. Within the scope outlined by this document, as it includes any limitations on representations, guarantees, damages, and liabilities pertaining to VERTU, such limitations shall apply equally to any representations, guarantees, damages, and liabilities of VERTU's licensors.

In accordance with the provisions set forth under "VERTU's Limitation of Liability," VERTU shall not bear any express or implied liability for any damage or loss incurred due to content or data that is lost or damaged during the maintenance or replacement of the product.

All parts or other devices replaced by VERTU become the property of VERTU. If it is found that a product requiring warranty service is not covered by the terms and conditions of this limited warranty, VERTU and VERTU-authorized service companies reserve the right to charge a fee.

During the repair or replacement of products, VERTU may use new, equivalent to new, or reconditioned parts. The product may contain components, including software, that are applicable to certain countries. If the product has been transshipped from its original destination country or region to other countries or regions, it may contain application software configurations, user interfaces, and/or preset content for the networks of the new country or region, which are not considered defective under this limited warranty.

Legal Information

Go to Settings, and click About Mobile Phone > Legal Information to view the legal information of the product.

Mobile Phone's OS and Software Service Statement

The VERTU service on the mobile phone requires a data connection to send updates to VERTU phones. If a connection cannot be established, these features will be unavailable or have limited use. You need to contact your network service provider to inquire about the availability of data connection for use within the local network and while roaming in other networks.

Some applications on the mobile phone, including the ones mentioned above, may automatically connect to the Internet. To prevent automatic connections, select the appropriate connection settings on the mobile phone, or disable these services while roaming.

VERTU will not be liable for any loss caused by improper use of communication hardware or software not designated by VERTU, or for any security threats arising from custom OS updates. Any attempt to customize the OS may result in the device or applications not functioning properly.

VERTU does not provide any warranty or assume any technical support responsibility for information, materials, documents, third-party software, or other products and services obtained through the mobile phone, nor does it accept any liability for the use of such information, materials, documents or other products and services by the user.

Modifying the mobile phone OS, installing third-party phone ROMs, and downloading, uploading, and installing third-party software programs not designated by VERTU may lead to security threats, performance failures, loss of user data, unavailability of applications, and other anomalies. These actions will result in the loss of the mobile phone's warranty.

Before installing an update on your mobile phone, ensure that the phone can connect to the Internet and that the phone's battery is sufficiently charged (or the phone is connected to a charger before beginning the update).

The use of certificates can significantly reduce risks associated with remote connections and software installations. For enhanced security, certificates must be used properly and must be valid or trusted. The validity of the certificate is limited. If a certificate expires or becomes invalid, check to ensure that the system date and time on the device are correct. Before altering any certificate settings, you must trust the certificate issuer and verify that the certificate belongs to all persons listed.

Networking support is necessary to determine whether a sent message has been received or read. However, this information may be unreliable.

Only compatible devices are capable of receiving and displaying multimedia messages. If the file you insert into a multimedia message is too large for network capacity, the phone may automatically reduce the size of the file. Information is displayed differently across various devices. If your mobile phone can keep in sync with Microsoft Exchange ActiveSync server in a wireless way, the provision of this service does not grant you any rights to enjoy or acquire any Microsoft intellectual properties related to the server software or server devices accessed by the mobile phone, or to the use of Microsoft Exchange ActiveSync beyond the mobile phone.

Buffer memory is the storage location used to temporarily store data on the mobile phone. If you attempt to access or have already accessed confidential information or security services that require passwords, please clear the buffer memory after each use.

The following factors affect the availability and quality of GPS signals: your location, satellite positions, buildings, natural barriers, weather conditions, and adjustments to GPS satellites by the U.S. government. GPS signals may not be available inside buildings or underground. Do not use GPS for precise location measurement, and never rely solely on location information provided by GPS and cellular networks.

Coordinate information is not available for all regions. If the position can be adjusted through the network and GPS, then location information can be attached to images or video clips. If the images or video clips you share have location information attached, anyone viewing these images or video clips might be able to see this location information. You can turn off this geotag in the camera settings.

Some of the location content is generated by third parties, not VERTU. Some content may be inaccurate and only applicable for use locally. Nearly all digital maps are somewhat inaccurate or incomplete. Do not completely rely on maps downloaded onto this device.

Social network services are third-party services. VERTU does not provide them, and they are not available in all countries/regions. Check your privacy settings for the social network services you use, as you may share your location and information with many people. The Terms of Use apply to information in Shared Services, and you should familiarize yourself with the Terms of Use and Service confidentiality practices.

Content protected by Digital Rights Management (DRM) comes with licenses that define your rights to use such content. Certain licenses require a connection to a specific SIM card and only permit access to protected content once the SIM is inserted into the phone.

WLAN and Bluetooth Restrictions

The use of WLAN and Bluetooth technologies may be restricted in some countries/regions. For more information, please consult relevant local authorities.

Product Recycling

If you wish for VERTU to recycle a product that has exceeded its service life, please return the product to the dealer where it was purchased (if known) or send it to VERTU headquarters. Additionally, if you purchased a replacement product from another provider, that provider is obliged to take back the original product and recycle it appropriately.

Do not throw devices with built-in batteries into fire as the batteries may explode.

Export Controls

Products may contain items, technology, or software exported from the United States and other countries under export control laws and regulations.

Specific Absorption Rate (SAR) and Product Safety

Your VERTU mobile phone complies with standards for radiation of radio waves.

Your VERTU phone adheres to the mobile phone radiation guidelines. Your phone is a radio transmitter and receiver.

The phone is designed not to exceed radio wave radiation limits recommended by international guidelines. These guidelines were developed by ICNIRP, an independent scientific organization, and contain safety factors to ensure the safety of people of various ages and physical conditions.

The guidelines for mobile phone radiation adopt the unit of Specific Absorption Rate (SAR) as a measure. According to the ICNIRP guidelines, the SAR limit is an average absorption of 2.0 watts per kilogram (W/kg) of human tissue for every 10 grams. SAR testing is conducted at standard operating locations, and the phone emits at its highest certified power level across all tested frequency bands.

The actual SAR level of an operating device can be below the maximum value because the device is designed to use only the power required to reach the network. That number varies, depending on a number of factors, such as how close you are to a network base station. The highest SAR value under the ICNIRP guidelines for using the device at the ear is ≤ 2.0 W/kg. Meet the requirements of national standard GB21288–2007.

This phone meets RF exposure guidelines when used in the normal use position against the ear. When a carry case, belt clip, or holder is carried with you, it should not contain metal parts, and should position the phone away from your body at the abovementioned distance.

In order to transmit data files or information, this device requires a high-quality connection to the network. In some cases, the transmission of data files or information may be delayed until such a connection is available. Use of phone accessories and enhancements may result in different SAR values. SAR values may vary depending on the national reporting and testing requirements and the network band.

Instructions for NFC of Micropower Device

1. It conforms to the specific provisions and application scenarios of "Catalogue and Technical Requirements for Micro-power Short Distance Radio Transmission Equipment", antenna type and performance, control, adjustment and switching methods. This NFC functional product is a Class C device defined in Part I of the Catalogue and Technical Requirements for Micro-power Short-Distance Radio Transmission Devices. It can be used as access control card, metro card and bus card.

To turn on/off the NFC function, select Settings > More Connection Setup > NFC.

Antenna type: coil antenna.

Performance: 13.56 MHz near-field magnetic inductive coupling.

Power control: about 1W under normal conditions and about 60mW in low power consumption mode.

2. Do not change the use scenario or conditions, expand the transmission frequency range, increase the transmission power (including installing additional RF power amplifiers), and do not change the transmitting antenna without authorization.

3. No harmful interference shall be caused to other lawful radio stations, and no protection against harmful interference shall be proposed.

4. It shall withstand the interference of industrial, scientific and medical (ISM) application equipment with radiated RF energy or other legal radio station interference.

5. In case of causing harmful interference to other legal radio stations, the use must be stopped immediately, and can only be resumed after taking measures to eliminate the interference.

6. The use of micropower devices within aircraft and in electromagnetic environment protection areas defined by laws, regulations, national provisions and standards, such as radio observatories, meteorological radar stations, satellite ground stations (including TT&C, ranging, receiving, and navigation stations), mixed military-civilian radio stations, airports, etc., must comply with the regulations of electromagnetic environmental protection and relevant sector authorities.

7. The use of all types of model remote controllers is prohibited in areas within a 5000-meter radius centered on the center point of the airport runway.

8. Environmental conditions such as temperature and voltage during the use of micropower devices. The product operates within a temperature range of 0°C ~ 35°C, and the working voltage range is 3.5V ~ 4.4V.

Table of Hazardous Substance Content Status in Product

Toxic and harmful substances or elements							
Component name		Lead	Mercury	Cadmium	Hexavalent chromium	Polybrominated biphenyls (PBB)	Polybrominated diphenyl ethers
Mobile phone	Display screen	×	○	○	○	○	○
	Circuit board	×	○	○	○	○	○
	Batteries	×	○	○	○	○	○
	Enclosures and components	○	○	○	○	○	○
Adapter		×	○	○	○	○	○
Accessories		×	○	○	○	○	○
This form is prepared according to SJ/T 11364 ○ : indicates that the content of the hazardous substance in all homogeneous materials of this component is below the limit specified in GB/T 26572. × : indicates that the content of the hazardous substance in at least one homogeneous material of this component exceeds the limit specified in GB/T 26572.							

Description:

- This table indicates that the model of product supplied by VERTU may contain these substances; however, this information may be continually updated as technology advances.
- The product is marked with “x” because there are no alternative technologies or components available at this stage, and it complies with the national “Administrative Measures for the Restriction of Hazardous Substances in Electrical and Electronic Products” and the “List of Exceptions to the Restricted Substances under the Catalogue for Standard Management.”
- VERTU reserves the right to interpret the definitions of components listed in this table.
The image on the right represents the eco-friendly service life label of this model of the product. Some replaceable components (such as the battery unit module) will have a different eco-friendly service life indicated by a label attached to the product. The eco-friendly service life is only valid when the product operates under the conditions specified in the product manual.

مرحبًا بكم لاستخدام

VERTU IRONFLIP

طراز الجهاز: VTL-202302

اسم الجهاز: الهاتف المحمول الرقمي VERTU IRONFLIP 5G

المُصنِّع: شركة تشنغدو VERTU لإدارة الأعمال والخدمات المحدودة

نظرة عامة

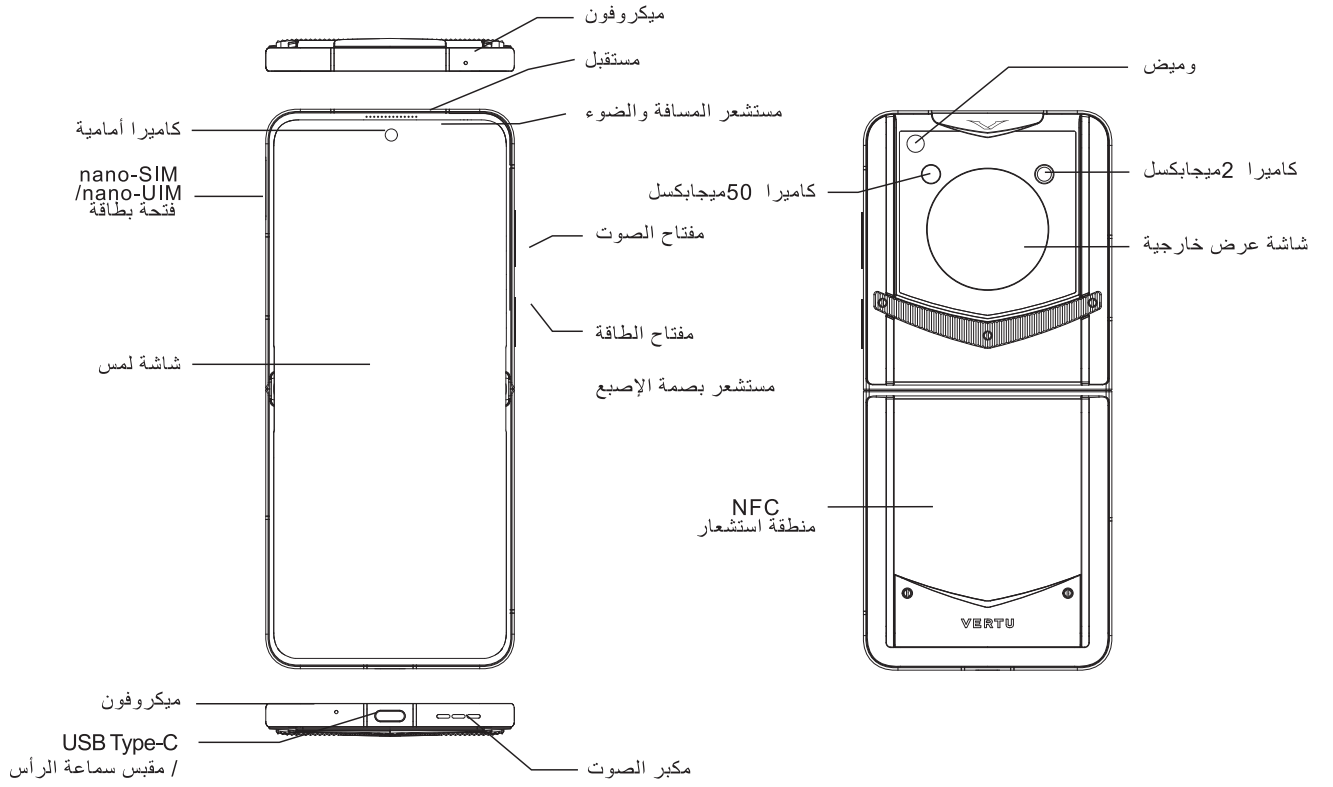

جهاز VERTU IRONFLIP الخاص بك

تم تصميم دليل المستخدم ليوضح لك كيفية التعامل مع الميزات الرئيسية لهاتف المحمول VERTU IRONFLIP. الصور المستخدمة VERTU. يتعين عليك تسجيل حساب ،Find My VERTU، وVERTU Life، وMy VERTU للحصول على الامتيازات والمزايا القيّمة، مثل في دليل المستخدم هي لأغراض توضيحية فقط وقد تختلف عن المظهر الدقيق لهاتف VERTU IRONFLIP.

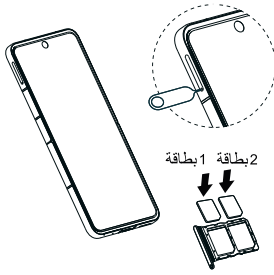

المساعدة والدعم

لمعرفة المزيد عن هاتفك:
اتصل بـ VERTU عبر تطبيق VERTU Life.
راجع دليل المستخدم عبر زيارة الموقع الإلكتروني:
زر موقع VERTU الإلكتروني على <https://www.vertu.com> للاطلاع على دليل المستخدم الخاص بالهاتف.

نظرة عامة على المنتج

البدء

- استخدم دبوس الإخراج لإزالة درج البطاقة كما هو موضح، ثم قم بتركيب بطاقة nano-SIM أو nano-UIM.
- يدعم هذا الهاتف المحمول شبكات 2G/3G/4G/5G لشركة China Unicom، و 2G/4G/5G لشركة China Mobile و China Telecom، وشبكة 5G لشركة China Broadcasting Corporation.

• انتبه!

- إذا كانت كلتا بطاقتي الهاتف المحمول من شركة China Telecom، فإن البطاقة الثانوية (بخلاف بطاقة البيانات) تتطلب تفعيل VoLTE لاستخدامها.
- يرجى استشارة مشغل الشبكة المحلية الخاص بك لمعرفة ما إذا كانت وظيفة VoLTE مدعومة.
- يعتمد دعم SA/NSA على نشر مشغل الشبكة المحلية.

• تحذير!

- يرجى استخدام دبوس الإخراج المرفق، ولا تستخدم أدوات حادة كإدخال. قد لا يتم إخراج البطاقة في حالة استخدام دبوس غير قياسي.
- يرجى المحاذاة مع المركز الدائري لدرج البطاقة لإخراجها لتجنب أي ضرر للهاتف.
- يرجى استخدام بطاقة nano-SIM/بطاقة nano-UIM القياسية المقدمة من قبل المشغل. لا تقم بإدخال بطاقات ذات مواصفات أخرى أو قطع البطاقات لتجنب حدوث أي ضرر للهاتف.
- لا تقم بإدخال البطاقة أو إخراجها عندما يكون الهاتف متصلاً بمصدر طاقة خارجي.
- لا تحاول فك الغطاء الخلفي وبطارية الهاتف المحمول. لاستبدال البطارية، يرجى الاتصال بمركز خدمة ما بعد البيع التابع لشركة VERTU.
- قد تؤدي طبقة الحماية المقوسة فوق الشاشة المنحنية إلى إخراج الغراء الزائد على جانبي الزاوية النصف قطرية اليمنى واليسرى، وقد يؤثر على وظيفة التنقل بالإيماءات، وهو ما لا يمثل عيباً في جودة الهاتف المحمول.

• الوصف:

- يمكنك إدخال أو إخراج بطاقة nano-SIM/nano-UIM عندما يكون الهاتف المحمول قيد التشغيل.
- عندما يلزم إعادة تشغيل الهاتف المحمول في حالة حدوث أخطاء، يمكنك محاولة النقر مع الاستمرار على زر الطاقة لأكثر من 10 ثوان لإعادة تشغيل الهاتف المحمول.
- في حالة انخفاض مستوى البطارية، قد لا يتم تشغيل الهاتف المحمول حتى عندما يكون في حالة الشحن. وفي هذه الحالة، يرجى الاستمرار في شحن الهاتف المحمول لمدة 30 دقيقة لاستعادة مستوى البطارية. إذا استمر تعذر تشغيل الهاتف المحمول بعد شحنه لمدة 30 دقيقة، فيرجى الاتصال بمركز خدمة ما بعد البيع التابع لشركة VERTU.
- برجاء استخدام الشاحن وكابل البيانات القياسيين المقدمين من شركة VERTU. قد يؤدي الشحن باستخدام شاحن أو كابل بيانات غير مصرح به إلى انفجار البطارية أو تلف هاتفك.

• احترس!

- هذا المنتج عبارة عن هاتف قابل للطلي مزود بشاشة داخلية قابلة للطلي للداخل. يرجى الانتباه إلى ما يلي:
- تأتي الشاشة الداخلية مزودة بطبقة حماية متخصصة تم تطبيقها مسبقًا. لا تقم بإزالة أو تطبيق أي طبقات حماية واقية أخرى بنفسك، حيث قد يؤدي ذلك إلى تلف الشاشة. إذا كان من الضروري استبدالها، فيرجى التوجه إلى مركز خدمة العملاء الرسمي المعتمد لشركة VERTU للتعامل معها بشكل سليم.
 - لا تضع أشياء مثل البطاقات أو العملات المعدنية أو المفاتيح على الشاشة الداخلية أثناء طي الهاتف، لأنها قد تسبب تلف الشاشة.
 - تجنب الضغط على الشاشة الداخلية أو منطقة الكاميرا على الشاشة باستخدام أي أشياء صلبة أو حادة (مثل الأقلام أو المفاتيح)، أو الضغط الزائد، لأن ذلك قد يؤدي إلى الإضرار بالشاشة.
 - لا تقم بطي الهاتف المحمول إلى الخلف حتى لا يتلف.
 - قبل تخزين الهاتف، يوصى بطي الهاتف أو لا لتجنب الأشياء الصلبة أو الحادة التي قد تؤدي إلى خدش الشاشة الداخلية أو إتلافها.
 - تعتبر التجاعيد والانحناءات الطفيفة في المنطقة القابلة للطلي بالشاشة الداخلية، بالإضافة إلى صدور صوت طفيف عند طي الهاتف أو فتحه، من الظواهر الطبيعية.

حماية الهاتف

الحماية العامة

- استخدم منتجات VERTU IRONFLIP كما هو موضح في الوثائق. الاستخدام الخاطئ قد يؤثر على الأداء.
- لا تحاول تفكيك هاتف VERTU IRONFLIP. أنت بحاجة لفتح فتحة بطاقة SIM فقط. ينبغي إصلاح هاتف VERTU IRONFLIP المحمول الخاص بك فقط بواسطة موظفي الخدمة المعتمدين من قبل VERTU.
- لا تستخدم هاتف VERTU IRONFLIP بقرسوة أو غير صحيح.
- استخدم فقط الملحقات التي تسمح بها VERTU.
- يُستخدم الشاحن المرفق فقط لشحن هواتف VERTU IRONFLIP المحمولة. ولا يجوز استخدامه مع أي أجهزة أخرى، وإلا فقد يحدث ضرر دائم للهاتف المحمول أو البطارية أو الشاحن.
- يرجى الاحتفاظ بهاتف VERTU IRONFLIP المحمول الخاص بك وجميع أجزائه وملحقاته بعيدًا عن متناول الأطفال والحيوانات الأليفة.
- يرجى عدم جعل الهاتف المحمول أو البطارية أو ملحقات VERTU IRONFLIP تلامس السوائل أو الرطوبة والغبار والأوساخ.
- لا تعرض هاتف VERTU IRONFLIP المحمول الخاص بك للرطوبة الشديدة، وإلا فقد يتسبب ذلك في توقف البطارية عن العمل مؤقتًا. عندما تكون درجة الحرارة أقل من نقطة التجمد، سيتم تقليل أدائه بشكل ملحوظ.
- لا تقم بتلطيخ الطلاء أو أي مواد أخرى مماثلة على هاتف VERTU IRONFLIP المحمول الخاص بك.
- استخدم فقط قطعة قماش ناعمة ونظيفة لتنظيف هاتف VERTU IRONFLIP الخاص بك. لا تستخدم المواد الكيميائية أو المنظفات أو المواد الكاشطة أو أي سوائل. قم بتنظيف الكاميرا قبل الاستخدام.
- لا تقم بإدخال أي جسم حاد في مكبر الصوت أو منفذ البيانات.

إذا كان هاتف VERTU IRONFLIP المحمول أو أي ملحق لا يعمل بشكل صحيح، فيرجى الاتصال بموزع VERTU.

الجلود المستوردة

الجلد، كونه مادة طبيعية، يمكن أن يؤدي إلى علامات أو بقع دائمة بسبب مجموعة متنوعة من الظروف أثناء الاستخدام. لمنع هذا:

1. إذا تعرض هاتفك المحمول للبلل بطريق الخطأ، فجففه باستخدام قطعة قماش ناعمة ماصة للسوائل في أسرع وقت ممكن.
2. تجنب تعريض الجلد للإضاءة الشديدة ودرجات الحرارة المرتفعة والظروف الرطبة، وتجنب ملامسة العناصر والمواد التي قد تتسبب في اتساخ الجلد أو خدش السطح.
3. توصي شركة VERTU بتخزين الهاتف المحمول في حافظة واقية أثناء عدم استخدامه.

الجلد

الجلد الذي يستخدمه حرفيو VERTU فريد من نوعه، وتعتبر العلامات الطبيعية من سمات الجلود عالية الجودة. جميع الحافظات الجلدية معرضة للتلف ولذلك يجب صيانتها بعناية. يرجى تجنب ما يلي:

1. ملامسة الماء أو التعرض للبيئات الرطبة.
2. التلامس أو الاحتكاك أو الاصطدام بالأسطح الصلبة.
3. التعرض لظروف درجات الحرارة القصوى.
4. ملامسة المواد الزيتية مثل عرق اليد ومستحضرات التجميل والمذيبات. تعرق اليد الشديد سيؤدي إلى تغير لون الجلد بعد استخدامه لفترة من الوقت.

المعادن غير الثمينة

صُنِعت المكونات المعدنية لمنتجات VERTU وفقًا لمعايير عالية ويجب صيانتها جيدًا للحفاظ على مظهرها. يرجى تجنب ما يلي:

1. ملامسة المواد الكيميائية، مثل المذيبات والقلويات والأحماض والمشروبات الغازية والمياه المالحة. في حالة حدوث تلامس مع هذه المواد، قم بالتنظيف على الفور بقطعة قماش ناعمة وجافة.
2. الاتصال بالأشياء الحادة.
3. السقوط على الأسطح الصلبة أو الاصطدام بها.
4. تلميع المعادن.

المعادن الثمينة

تتمتع المعادن الثمينة مثل الذهب والبلاتين بصلابة أقل عند استخدامها كمواد مركبة. ولذلك، يجب توخي مزيد من الحذر عند التعامل مع منتجات VERTU التي تحتوي على مثل هذه المواد.

الأحجار الكريمة

الأحجار الكريمة صلبة ومتينة للغاية، لكنها قد تتعرض للتلف إذا لم يتم التعامل معها بشكل صحيح. على سبيل المثال:

- يمكن أن يؤدي التأثير الشديد على سطح صلب إلى كسر الحجر الكريم أو إتلاف ترصيعه، مما يؤدي إلى تفكك الحجر الكريم أو إزاحتها. 2. تoux الحذر عند ملامسة المجوهرات الأخرى مثل خواتم الماس وأقراط الماس، لأنها يمكن أن تسبب ضررًا للحجر الكريم أو الترصيع. 3. انتبه إلى عدم السماح للخيط (خاصةً خيوط الحرير الصناعي) بإعاقة الترصيع، لأن ذلك قد يؤدي إلى ثني الترصيع وتفكك الحجر الكريم. 4. يوصى بتخزين هاتف VERTU المحمول الخاص بك في حافظته الجلدية عندما لا يكون قيد الاستخدام، خاصة قبل وضعه في حقيبة اليد أو أي نوع آخر من الأمتعة.

الياقوت والسيراميك

يعتبر الياقوت والسيراميك من المواد الصلبة للغاية، كما أنها سهلة الكسر ويمكن خدشها بسهولة بواسطة مواد أو أشياء صلبة أخرى. بالإضافة إلى ذلك، قد تتضرر أيضًا في حالة سقوطها. يرجى تجنب ما يلي:

- التلامس مع المواد الصلبة، مثل المجوهرات الماسية، ومبارد الأظافر، وأدوات الطحن، والبلورات المعدنية. 2. سقوط المنتج أو اصطدامه بالأسطح الصلبة. 3. فرك متكرر على الأسطح الصلبة.

الأمان والضمان

نص الأمان

قد تحتوي عبوة المبيعات على مجموعة متنوعة من المنتجات والمكونات المختلفة (يشار إليها فيما بعد مجتمعة باسم "المنتجات")، مثل الهاتف المحمول المزود بشواحن مختلفة. تنطبق الإرشادات المقترحة أدناه على كافة المنتجات والمكونات. قد يؤدي التشغيل بما يتعارض مع الإرشادات إلى حدوث مشكلات تتعلق بالسلامة الشخصية والبيانات، وقد يؤدي إلى تلف المنتج، وقد يتعارض أيضًا مع اللوائح القانونية المطبقة.

الاحتياطات الطبية

قد يتسبب تشغيل أي جهاز إرسال لاسلكي (بما في ذلك الهواتف اللاسلكية) في حدوث تداخل مع وظيفة المعدات الطبية دون آليات الحماية المناسبة. إذا لم تكن متأكدًا مما إذا كانت المعدات الطبية تتمتع بألية حماية مناسبة لطاقة الترددات الراديوية الخارجية، فاستشر الطبيب أو الشركة المصنعة للجهاز الطبي.

توصي الشركات المصنعة للأجهزة الطبية بالحفاظ على مسافة لا تقل عن 15.3 سم (6 بوصات) بين الأجهزة اللاسلكية والأجهزة الطبية المزروعة (مثل أجهزة تنظيم ضربات القلب أو أجهزة تنظيم ضربات القلب القابلة للزرع). يجب أيضًا على الأفراد الذين يستخدمون هذه المعدات الانتباه إلى ما يلي:

- عدم وضع الهاتف المحمول في جيب الصدر.
 - وضع الهاتف المحمول على الأذن المقابلة لجانب المعدات الطبية.
 - إذا كنت تشك في وجود تداخل، قم بإيقاف تشغيل الهاتف المحمول على الفور.
 - اتبع الإرشادات المقدمة من قبل الشركة المصنعة للجهاز الطبي المزروع.
- استشر مقدم الرعاية الصحية الخاص بك إذا كانت لديك أي أسئلة حول استخدام جهاز لاسلكي مع جهاز طبي مزروع.

لتجنب الإضرار بالسمع، لا تعرض نفسك لمستويات صوت عالية لفترات طويلة. قد تتأثر قدرتك على سماع الأصوات الخارجية عند استخدام سماعات الأذن. لا تستخدم سماعات الأذن في الأماكن التي قد تشكل فيها خطرًا على سلامتك الشخصية. استخدم سماعات الأذن بمستوى صوت معتدل ولا تضع الجهاز بالقرب من أذنك أثناء استخدام مكبر الصوت الخاص به.

إغلاق الهاتف المحمول في المناطق المحظورة أو المناطق الخطرة

يجب إيقاف تشغيل الهواتف المحمولة في المناطق التي يُحظر فيها استخدامها أو حيث يمكن أن تسبب تداخلًا أو خطرًا، مثل الأجهزة الطبية القريبة أو الوقود أو المواد الكيميائية أو مناطق التفجيرات.

استخدام وضع الطيران عند السفر

ما لم يُطلب منك صراحة إيقاف تشغيل هاتفك، يمكنك اختيار وضع الطيران (غير متصل)، أي أنك لن تتمكن من إجراء أو استقبال أي مكالمات أو استخدام ميزات أخرى تتطلب تغطية خلوية أو Wi-Fi أو بلوتوث. ومع ذلك، لا يزال بإمكانك إجراء مكالمات طوارئ إذا لزم الأمر.

الاستخدام داخل السيارة

قد تؤثر إشارات الراديو على الأنظمة الإلكترونية التي لم يتم تثبيتها أو حمايتها بشكل صحيح في السيارة، مثل نظام حقن الوقود الإلكتروني، ونظام المكابح الإلكترونية المانعة للانغلاق، ونظام التحكم الإلكتروني في السرعة، ونظام الوسادة الهوائية. لمزيد من المعلومات، يرجى استشارة الشركة المصنّعة لسيارتك أو معداتنا.

يُسمح فقط لموظفي الخدمة المؤهلين بتركيب هاتف محمول في السيارة. قد يؤدي التثبيت أو الصيانة غير الصحيحة إلى الإضرار بالجهاز وقد يؤدي إلى إبطال الضمان. يوصى بإجراء عمليات فحص منتظمة للتأكد من تركيب جميع الأجهزة اللاسلكية في السيارة وتشغيلها بشكل صحيح. لا تنقل الهاتف المحمول أو مكوناته أو ملحقاته في نفس مقصورة الحمولة مع وجود سائل أو غازات قابلة للاشتعال أو مواد قابلة للاشتعال أو متفجرة. ضع في اعتبارك أن الوسائد الهوائية تشكل ضغطًا كبيرًا عند انتفاخها؛ وبالتالي، لا تضع الهواتف المحمولة أو ملحقاتها بجوار الوسادة الهوائية.

إبقاء الأطفال بعيدًا عن المنتج

يرجى التأكد من أن المنتج وجميع مكوناته وملحقاته بعيدًا عن متناول الأطفال والحيوانات الأليفة. قد يؤدي عدم القيام بذلك إلى تعرضهم للإصابة وإبطال الضمان الخاص بك.

سلامة القيادة أولاً

التزم بجميع القوانين المحلية المطبقة. أبقى كلتا يديك حرتين دائمًا أثناء القيادة لتشغيل السيارة. يجب أن تكون السلامة على الطريق هي الاعتبار الأول دائمًا.

الحقل المغناطيسي

حافظ على هاتفك المحمول بعيدًا عن المغناطيس أو المجالات المغناطيسية.

النسخ الاحتياطي

لضمان أمان بياناتك، احتفظ بها في مكانين منفصلين مثل الهاتف المحمول أو الكمبيوتر الشخصي. من المهم بشكل خاص عمل نسخة احتياطية من بياناتك قبل أي إصلاح أو استبدال، حيث قد يتم فقدان المحتوى والبيانات أثناء هذه العملية.

البطارية والشاحن والملحقات الأخرى

يحتوي هذا المنتج على بطارية مدمجة قابلة لإعادة الشحن ولكنها غير قابلة للإزالة. لا تحاول إزالة البطارية، فقد يؤدي ذلك إلى تلفها. ستحقق البطارية الجديدة أقصى قدر من الكفاءة بعد دورتين أو ثلاث دورات كاملة من الشحن والتفريغ. يمكن أن تخضع بطارية الجهاز لمئات من دورات الشحن والتفريغ ولكنها ستستنفد في النهاية. إذا لاحظت أن أداء الجهاز قد انخفض (على سبيل المثال، أصبحت أوقات التحدث واستعداد الهاتف أقل بكثير من المستويات العادية)، فاستبدلها ببطارية أصلية معتمدة من (VERTU إذا كانت البطارية قابلة للإزالة) أو اصطحب الجهاز المرتبط إلى أقرب مركز خدمة معتمد من (VERTU إذا كانت البطارية غير قابلة للإزالة).

استخدم البطارية دائمًا للغرض المقصود منها. لا تستخدم أبدًا أي أجهزة شحن أو بطاريات تالفة. استخدم فقط البطاريات المعتمدة من VERTU، واشحنها فقط باستخدام أجهزة الشحن المعتمدة من VERTU المخصصة لهذا الجهاز.

قد يؤدي استخدام بطاريات أو أجهزة شحن غير معتمدة إلى نشوب حريق أو انفجار أو تسرب أو مخاطر أخرى. لا تقم بتوصيل أي أجهزة غير متوافقة بالشاحن.

عند عدم الاستخدام، افصل الشاحن من مقبس الطاقة أو أي جهاز. تجنب الاحتفاظ ببطارية مشحونة بالكامل متصلة بالشاحن لأن الشحن الزائد قد يؤدي إلى تقصير عمرها الافتراضي ويشكل مخاطر أخرى على السلامة.

لا تقم بتعديل البطارية أو تغييرها أو تحويلها، ولا تحاول إدخال أجسام غريبة في البطارية، ولا تغمرها أو تعرضها للماء أو السوائل الأخرى. قد يؤدي الاستخدام غير الصحيح للبطارية إلى حدوث حريق أو انفجار أو مخاطر أخرى. إذا سقط الجهاز أو البطارية (خاصة على سطح صلب) وانتابك الشك في حدوث ضرر، فيرجى أخذه إلى أقرب مركز خدمة معتمد من VERTU لفحصه قبل استخدامه مرة أخرى. إذا لم يتم استخدام بطارية الهاتف المحمول لفترة طويلة، فقد تحتاج إلى توصيل الشاحن وفصله ثم إعادة توصيله لبدء الشحن مرة أخرى. إذا كانت البطارية فارغة تمامًا، فسيحتاج عليك الانتظار بضع دقائق قبل أن تتمكن من إجراء مكالمة.

الحفاظ على الجهاز جافًا

الجهاز ليس مقاومًا للماء، لذا أبقيه جافًا دائمًا.

بطاقة SIM، بطاقة UIM

تم تصميم VERTU IRONFLIP لاستخدام بطاقة Nano-SIM أو بطاقة nano-UIM. لا يدعم هذا الهاتف المحمول أي أنواع أخرى من بطاقات SIM أو بطاقات UIM. قد يؤدي استخدام بطاقة SIM أو بطاقة UIM غير المتوافقة إلى إتلاف هاتفك المحمول أو فتحة البطاقة.

رقم IMEI ورقم الامتثال

لإيجاد رقم IMEI، يرجى طلب الرقم المسلسل #06* على الهاتف المحمول. سيتم عرض رمز IMEI المكون من 15 رقمًا والمتوافق مع الهاتف المحمول على الفور. قم بتسجيل هذا الرمز وتخزينه بشكل آمن، لاسترجاعه في حالة فقدان الهاتف المحمول أو سرقته. يمكن أيضًا العثور على رقم IMEI على ملصق الامتثال (راجع الدليل المرجعي للهاتف المحمول لمعرفة موقع هذا الملصق).

وميض الكاميرا

يرجى الحفاظ على مسافة آمنة عند استخدام وميض الكاميرا. تجنب استخدام وميض الكاميرا عندما يكون الأشخاص أو الحيوانات على مقربة منك. لا تقم بإعاقة الوميض عند التقاط الصور. يرجى تجنب تعريض العين للمصباح اليدوي مباشرة لمنع احتمال ضعف الرؤية.

استدعاء خدمات الخادم الشخصي الخاص

توفر VERTU خدمات الخادم الشخصي البريطاني الخاص على مدار 24 ساعة طوال أيام الأسبوع. يمكنك استدعاء خدمة الخادم الشخصي مباشرة عن طريق الضغط على زر الطاقة وزر رفع الصوت في نفس الوقت، لتبدأ حياة غير عادية من الجمال.

إدارة الحقوق الرقمية (DRM)

أثناء استخدام الهاتف المحمول، يجب عليك الالتزام بجميع القوانين واحترام العادات المحلية، فضلاً عن خصوصية وحقوق الآخرين، بما في ذلك حقوق الطبع والنشر. تمنعك حماية حقوق الطبع والنشر من نسخ أو تعديل أو نقل الصور والموسيقى والمحتويات الأخرى.
