Product Installation

06

Recommend Height

1. When installing the bathroom mirror, please first pick up the bathroom mirror and confirm the best installation height for marking, then punch for installation
2. Make sure your face is in the middle of the mirror for a better image.

Wiring Method

Method 1

Extend the line of the bathroom mirror from the grooves on the side and plug it in to use.

To reduce the risk of strangulation, the flexible cable connected to this luminaire must be fixed on the wall when the cable is in the hand region

Method 2

1. Wiring must be installed by qualified electricians
2. Please use insulating tape to protect the wires

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Statement

To maintain compliance with FCC'S RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm between the radiator and your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.

Watt Range:36W

Output Voltage:DC12V

Waterproof Rating:IP56

LED Light Temperature:3000k to 6000k

Operating Temperature:-30°Cto75°C

CRI:≥80RA

Product Certification:CE

Input Voltage:AC100-240V

Service Life:>20000HRS

Frequency: 50Hz/60Hz
