

Device Model

M200d

- Please read this manual carefully before using the product.
- The products, accessories, user interfaces and other illustrations in this manual are schematic diagrams for reference only.
- Due to the update and upgrade of the product, the actual product and the diagram may be slightly different, please refer to the actual product.

Product Introduction

Bind device 1

Step 1: Install and register the Molink App

Scan QR code to download MoLink app
Open the Molink app
login using Facebook or Google account

Bind device 2

Step 2: Turn on the device

The device automatical turn on with first charging.
It takes about 3 hours to fully charge.

Bind device 3

Step 3: Scan QR code and binding devices

Click on the Scan QR Code button
Scan QR code and binding devices to settings

FCC Statement
Changes or modifications not expressly approved by the party responsible for compliance could void

the user’s authority to operate the equipment.

This device complies with part 15 of the FCC rules. Operation is subject to the following two

conditions: (1) this device may not cause harmful interference, and (2) this device must

accept any

interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection

against harmful interference in a residential installation. This equipment generates uses and can

radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is

no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined

by turning the equipment off and on, the user is

encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help important

announcement

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

This transmitter must not be co-located or operating in conjunction with any other

antenna or transmitter.

Instructions for use

Step 1: Put device into leather case

Instructions for use

Step 2: Thread the straps through the buckle on the silicone sleeve

Instructions for use

Step 3: Secure the device to the collar with a strap

Product Data

Size 66mm * 30mm * 18mm

GNSS chip GPS GLONASS BeiDou/Compass Galileo QZSS

Ambient Temperature -20°C – +70°C

SIM card Nano SIM card holder

Battery 3.85V/790mAh

I/O interface Magnetic suction charging

Sensor 3D G-Sensor

Shell material PC material, injection molding, spraying

Voltage 3.5–4.2V

Charging current Charging 5V 500mAh

GPS positioning accuracy Within 10 meters

WIFI positioning accuracy Within 50 meters
