LUMINOUS QUICKSAND

LIUP Clip

How It Glows

· Absorbing Light

After exposure to natural light, artificial light, or ultraviolet light, the energy is stored and can be released when in a darker environment. A few minutes of exposure can lead to full saturation.

· Light Emission

In surroundings with lower light intensity than the luminous brightness of the night light quicksand you can observe its beautiful luminous effect. The darker the environment, the better the effect.

Notice

- Best absorption effect under sunlight and strong light (UV)
- Different light intensity and absorption time will result in varying glow duration
- Static electricity may cause sand adhesion inside the shell, which is normal
- Air bubbles inside the shell due to atmospheric pressure are normal and not leakage
- Luminous quicksand is safe, environmentally friendly, non-radioactive, and harmless

Contents

- Bluetooth earphone body L/R x 1
- Charging case x 1
- Data cable x 1
- Product manual x 1
- Replace silicone ear tips x6

Quick Setup

Connecting to Your Phone

- Power On/Off
Power On: Open the charging case (Touch and hold for 10s).
Power Off: Put the earbuds back into the charging case.
- Bluetooth pairing
1. Remove earbuds from charging case for pairing.
2. Go to phone Settings - Bluetooth
Search for "LIUP Clip" - Connect.
3. Once connected, start using the earbuds.

Light Indicators

About us

LIUP* appreciates your choice of our products.

We are a new consumer tech brand driven by the concept of "light" in design.

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

RF Exposure Information

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
