Modular Approval Attestation

We hereby attest that the transmitter module [NCRB54N01VI], FCC ID: [2BH6E-NCRB54N01VI], complies with the modular transmitter requirements of 47 CFR §15.212.

The RF section of the module is shielded, and buffered modulation/data inputs and on-board power supply regulation are implemented to ensure compliance with Part 15 requirements.

The module complies with the antenna requirements of §§15.203 and 15.204 and was tested in a stand-alone configuration in accordance with §15.212.

Due to the small size of the module, it is impracticable to affix a permanent FCC ID label on the module.

The FCC ID is therefore provided in the user manual and on the product packaging, in accordance with KDB 784748 D01 Section 3.

Appropriate installation instructions are provided to ensure proper identification of the module. The module complies with all applicable FCC operating requirements and RF exposure requirements specified in §§1.1307, 1.1310, 2.1091, and 2.1093.
