

Quick Installation Guide

Wireless USB Adapter

Before You Start

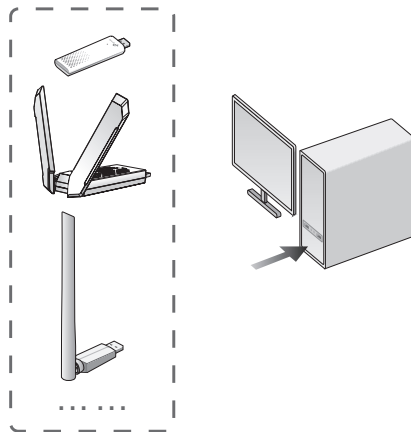

- a. Ensure that your operating system meets the compatibility requirements:
 - Supported operating system: Windows 10/11
 - Supported MLO operating system: Windows 11 (Version 24H2 and later)
- b. Ensure that your Router or Access Point supports the Wi-Fi 7 standard, and the network is using WPA3 encryption.

1 Connect to a Computer

Note:

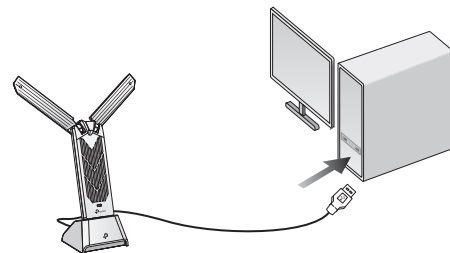

- It is recommended to connect the adapter to a USB 3.0 port.
- If you are experiencing an unstable wireless connection with your adapter, try a different USB port on your computer.

Option 1: Directly

Option 2: Via the USB Cradle (if provided)

Note: For optimal performance, it is recommended to use the provided USB extension cable.

2 Install Driver

- a. Go to My Computer or This PC.
- b. Double-click the TP-Link CD Drive then run **SetupInstall.exe** to install driver.

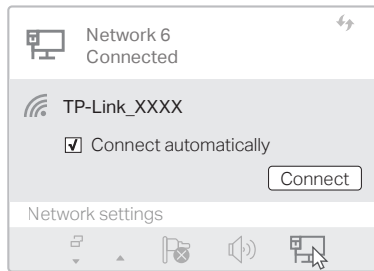

Note:

- If you cannot find the setup program, please download the driver at www.tp-link.com/support. You can also check for new releases and download the latest drivers on this website.
- If an unknown publisher message pops up, select **Yes** to continue.
- If Windows User Account Control requires admin credentials, type user name and password of your Windows administrator account.

3 Join a Wireless Network

- a. Click the network icon on the taskbar (the icon might look like one of these: , , , or ).
- b. Select your Wi-Fi network, click **Connect** and enter the password when prompted.
