

Smart Camera

D8 V1.1

Read carefully before using the device and keep it for subsequent use.

Power supply types

E27 socket power supply:
After installing the socket, screw the camera into the socket.

*Note: Do not use the Socket and Type-C power supply simultaneously, otherwise it may damage the device.

Download

Search for "V380 Pro" in the APP Store or scan the QR code below to download and install the V380 Pro APP.

Scan the QR code to download V380 Pro APP

Reset the camera

1. Power on the camera. (For 4G camera, please ensure the SIM card has been inserted into the camera before power on.)
2. Press and hold the reset button for several seconds, the camera will prompt "Reset completed".

Add camera

1. Open the APP to register your account and log in.
2. Click the "+" icon and scan the QR code on the device.
3. Follow the APP instructions to confirm the default network configuration method.

Wi-Fi camera: bluetooth connection

1. Turn on your phone's Bluetooth and connect your phone to 2.4GHz Wi-Fi first.
2. Confirm the connected Wi-Fi and enter the password.

3. If the QR code on the device is damaged, swipe up on the scanning interface to select "Wi-Fi Camera"->"Bluetooth connection".
4. Connect to a 2.4GHz Wi-Fi and select the device's Bluetooth. Enter the four-digit numbers prompted by the device to bind the device.

5. After the device prompts "Network connected" - "Bind successfully, camera ready", it means that the device has connected to the network and is successfully added.

Wi-Fi camera: AP hotspot connection

1. Click "+" in the upper right corner, swipe up the bottom and select "Wi-Fi Camera" - "AP hotspot connection".

2. Select the Wi-Fi that the device needs to connect to, and enter the correct password.
(For iOS, if you want to connect to other Wi-Fi, please connect your mobile phone to the Wi-Fi you need and then return to the APP to refresh)
3. Connect to the hotspot of the device based on APP instructions.

Note: You can find the corresponding ID on the device body tag which is for the hotspot's name.

4. Enter the four-digit numbers prompted by the voice of the device in turn to add the device.
5. After the device prompts "Network connected" - "Bind successfully, camera ready", it means that the device has connected to the network and is successfully added.

Device settings

To change the device's hotspot password, go to the "Settings" page and select "Device network management" to update the password. (*For CPE devices only)

*Initial SSID of the CPE device: HSC_CPE_ID
Default password: 12345678

Attentions

- Concerning Micro SD card recording, when the recording capacity reaches the upper limit, the earliest recording file of the recording event will be automatically overwritten.
- Long-term use in the unconventional environment (high temperature, high humidity, the large amount of dust or smoke, etc.) may damage the camera.
- V380 Pro APP and device firmware will be updated from time to time. For your best experience, please update the APP and upgrade the device firmware in time.
- Please comply with all applicable laws and regulations. The use of this camera for any illegal activities is strictly prohibited.

RF exposure statement

This equipment complies with the FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator and any part of your body. This equipment meets the exemption from the routine evaluation limits in section 4.5 of RSS-102. It should be installed and operated with a minimum distance of 20cm between the radiator and any part of your body.

Cet équipement est conforme à l'exemption des limites d'évaluation habituelle de la section 4.5 de la norme RSS-102. Il doit être installé et utilisé à une distance minimale de 20 cm entre le radiateur et toute partie de votre corps.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

IC WARNING

This device contains licence-exempt transmitter(s) that comply with Innovation, Science and Economic Development Canada’s licence-exempt RSS(s). Operation is subject to the following two conditions:

- (1) This device may not cause interference.
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

L’émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d’Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L’exploitation est autorisée aux deux conditions suivantes:

1. L’appareil ne doit pas produire de brouillage;
2. L’appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d’en compromettre le fonctionnement.
