

QUICK START GUIDE

Magnetic Wireless Car Charger

MT-CW1Q4

Official website: www.minthouz.com
Technical support: support@minthouz.com

INTRODUCTION

This USB-C Car-mounted Magnetic Wireless Charger offers instant charging capabilities, featuring magnetic adsorption that allows for precise phone alignment and immediate charging without the constraints of cables. Its vehicle-mounted tow hook design, 360 degree rotating ball and a wide range of motion ensure comfortable usage and safety of driving while using navigation. The compact and slim design enhances portability. Supporting the Qi charging protocol, QC2.0/3.0, and PD2.0/3.0, it ensures compatibility with a wide range of Apple and Android models.

IN THE BOX

- 1 x Magnetic Wireless Car Charger
- 1 x USB-A to USB-C Cable(1m)
- 1 x Quick Start Guide

- 1 -

OVERVIEW

* This product does not come with a Power Adapter, if you need one, please purchase it separately.

- 2 -

FEATURE

- Special magnetic adsorption design for precise alignment.
- The vehicle-mounted tow hook design enhances safety of driving while using navigation
- Supporting Qi protocol, QC2.0/3.0 and PD2.0/3.0, compatible with various phone models
- Strong magnets provide a solid and secure mount for your phone
- 360-degree rotation ball joint enhances the flexibility of viewing angle and convenience of navigation
- 2-6mm transmission distance, charging your phone easily even with a phone case

LED INDICATORS

One blue LED is used to indicate the charging status.

Status	Indication
Flash	Power on
Off	Standby
Solid on	Charging
Flash	Error

* After powering on, the LED will flash twice. If it doesn't detect a mobile phone for charging, it will be standby mode and the LED will turn off.

* If the LED flashes during the charging process, it indicates an error, usually caused by the detection of foreign objects.

ASSEMBLY

1. Align the Nut with the head of the Ball as shown in the following diagram, and place the Nut onto the bracket.

* Attention: Please look in the direction of the Nut before aligning the Nut with the Head of the Ball.

- 4 -

2. Align the Wireless Charger with the Head of the Ball and firmly insert it between the Nut and the Ball. Then, tighten the Nut as the diagram shown to lock the Wireless Charger.

- 5 -

3. Attach the bracket to the car's air conditioning vent and tighten the nut (on the car mount) as the diagram shown to secure it in place.

4. Connect the USB-C end of the Charging Cable to the Wireless Charger and plug the USB-A end into the car's power outlet.

- 6 -

5. Just placing your phone on the Wireless Charger to use it directly.

- 7 -

SPECIFICATION

Material: ABS Plastic
Dimension: 2.5(Diameter) x 1.3(Thickness) inches
Output: 5W/7.5W/10W/15W(MAX)
Input: 5V/3A, 9V/2A, 12V/1.5A(MAX)
Input Protocol: QC2.0/3.0 and PD2.0/3.0
Charging Protocol: WPC-Qi V1.2.4
Transmission Distance: 2-6mm
Phone Model: iPhone and Android(with a mag-safe case)

ATTENTION

- It is forbidden to insert metal objects between the wireless charging coil and the mobile phone coil during charging, which will cause the metal to generate high temperature and cause a fire.
- If the wireless charger does not charge the mobile phone after connecting the power adapter, please unplug the USB-C Connector from the Power Adapter, then try to restart the wireless charger, or try restarting the phone.
- In order to better fix the mobile phone, we recommend you to remove the phone case, or use a thin phone case.
- In order to charge better, the thickness of the phone case is recommended not to exceed 5mm.
- Please keep out of reach of children.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radiofrequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 20 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.
