Project introduction

1. Brief introduction of the project

Number of project antennas	Machine type
one	WIFI tablet
Machine shell material: 10.1 inch metal shell.	

2. Brief description of antenna

Antenna number	name	Operating band /MHZ	Material/structure
one	WIFI&BT&5Gwifi&WiFi6	2400MHz/2500MHz&5.8GHz&WiFi6	FPC

Antenna layout

WIFI antenna S11

Measured distance of BT antenna

Measured effect	
Model number	one
testing environment	Suowode research and development center
testing equipment	Huawei AM08
Test distance	> 10m

WIFI&BT antenna efficiency

Passive Test For 2.4Gwifi

Measured picture of WIFI antenna signal strength (data)

Test location: R&D office of our company.

Test time: 10: 00 -11: 30.

Test distance: 10m-15m.

Signal strength: -41dBm to -31dBm

Environmental treatment and assembly instructions

The original machine environment treatment has not been changed;

Note: 1. This report is based on the actual debugging and testing of the debugging prototype, including environmental treatment, antenna position and assembly position of various devices.

Can not be changed at will;

2. If there is any change in the materials used in the prototype, it needs to be reported to our company in time for re-verification;

3. List of sensitive devices:

TP (material, coating, wiring, etc.)

Screen (amplifier circuit, LED, cable design, etc.)

Shell material (antenna assembly mode, structural interference, shell material, antenna position height and area, etc.) motherboard (motherboard conduction, RF circuit matching, PA, diplexer, filter, LNA, power supply circuit, etc.)

Camera, battery, motor, MIC, fingerprint identification module, etc.

4. Because the number of debugging prototypes is small or only one, some probabilistic problems can't be completely found out. It is suggested that the problems (such as flashing screen, speaker noise, TP jump, black screen crash, signal diving, etc.) should be investigated in small batches before mass production.

技术要求:

1. 打*为重点尺寸;
2. 尺寸符合图纸要求;
3. 焊点无虚焊、假焊。要求圆润、饱满。
4. 网分测试通过(出现指定波形)。
5. 线形尺寸未注公差按照SJ/T 10628 1995 6级, 公差值由上下偏差均分;
