

WIRELESS CARPALY
ADAPTER

AI BOX

Warning:

For the safety of you and other road users, as well as to comply with traffic regulations in your country, please do not watch videos while driving.

Tips :

To ensure the compatibility between your car display and the box display, when you connect to the car for the first time, the Android system will automatically restart once during the connection process.

Summary:

This product is applicable to the original factory wired carplay or Android auto functions of your beloved car. This product can convert wired carplay or Android auto to the Android system. In addition, this product also integrates the functions of wireless carplay and Android auto.

Packing list:

1*AI BOX
1*USB cable(type_C to A)
1*USB cable(type_C to C)
1*User manual

Product line connection diagram

(Note: If your car has a type_c interface, please use a (type_C to C) data cable)

Factory
USB-A Port

AI BOX

Specifications:

Operating system	Android 12
processor	Quad Cortex- A53
RAM+ROM	2G+16G
Expandable memory	TF card, up to 256GB
Wi-Fi	Built-in 802.11 a/b/g/n/ac, 2.4G+5G
bluetooth	RTL8733/BT5.2
Power input	5V/1A
Working temperature	-20℃—65℃
dimension	63.5mmx65.5mmx8.5mm

Wiring diagram. Refer to the picture below

USB Type-C (Power)

Network settings:

How to connect the AI box to the network?
Connect to the Wi-Fi network: In the Settings selection of the AI box - Network and Internet - Internet - W-iFi, add an available Wi-Fi network, such as a router or a personal hotspot on your mobile phone, etc.

WiFi connection:

When using this product to watch videos such as YouTube or other software on the car's central control panel, it needs to be connected to Wi-Fi before it can be used

Wireless carplay or Android auto usage method:

carplay Usage Method

(1)Find the RlinK or Auto/carplay logo on the car's central control and click it. Before using your phone to connect to the carplay adapter, please check whether the phone's WIFI and Bluetooth are connected to other wireless devices. If connected, you need to ignore and delete the current WIFI and Bluetooth, and turn on the phone's Bluetooth WIFI switch.

(2)Turn on Bluetooth to search, connect to the Bluetooth name displayed in the lower left corner of the UI interface: for example: AutoBox-XXXX for pairing and connection, and follow the instructions below when relevant prompts appear on the

phone.

(3)After the mobile phone Bluetooth and carplay adapter Bluetooth are successfully matched, please wait for a moment. It should be noted that the mobile phone WIFI only needs to turn on the switch, and no connection operation is required. When the carplay adapter is successfully connected to the mobile phone, the mobile phone and the box's WIFI will automatically establish a connection channel. At this time, the mobile phone Bluetooth will show disconnected, which is a normal phenomenon and no operation is required

(4)If the siri voice function on your phone is not turned on, please turn on the siri voice function on your phone, otherwise the connection will fail.

Troubleshooting:

1.Mobile phone compatibility judgment

(1) This product supports iPhone 8 or above versions of mobile phones, check whether your mobile phone supports it. Check whether the mobile phone system is iOS10 + or above, and you need to upgrade the system to the highest version.

(2) For Android phones, you need to confirm whether the phone has the Android auto function. You need to upgrade the system cabinet to the latest system. Otherwise, you may not be able to use this product.

2. Car-machine compatibility judgment

(1) Check whether the car-machine system has the wired

CarPlay function.

(2) You can check whether your car supports the wired CarPlay function through the official website <https://www.apple.com/ios/carplay/available-models/>.

(3) Connect your iPhone to your car via a data cable to determine whether your car supports wired CarPlay.

3. Troubleshooting for failed connection

(1) Before connecting to Bluetooth, check whether the phone is connected to the Bluetooth and WIFI of other wireless devices. If connected, please ignore and delete it, otherwise it will cause connection failure. Keep Bluetooth off for 5 seconds, and then reconnect Bluetooth.

(2) If the connection is unsuccessful, unplug the box and try again.

4. Other notes

(1) If the phone pops up the "Allow CarPlay" prompt during the connection process, select "Later" and the connection will fail. You need to go to "General" = "CarPlay" on the phone, select "Device Name" = and turn on "CarPlay".

(2) To turn off the CarPlay function, you need to disconnect the Bluetooth and WIFI connections on the phone or unplug the box directly.

(3) If there is a problem with the connection, restart the car host or restore the factory settings of the car host.

(4) After CarPlay is successfully connected, the Bluetooth on the phone will disconnect from this device. This is normal.

(5) If the car cannot automatically connect again, delete the Bluetooth and WIFI of this device from the Bluetooth list and WIFI list of the phone, and then search and connect to the Bluetooth of this device again.

5. Troubleshooting by product indicator lights

(1) After the adapter is powered on, the red indicator light comes on, indicating that the product is connected to the power supply. After a while, the blue light comes on, indicating that the box and the car machine are working normally.

(2) If the indicator light is always red or not on, the product is faulty. Please contact the seller.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm distance between the radiator and your body: Use only the supplied antenna.
