

K56 Game System Instructions

Notice:

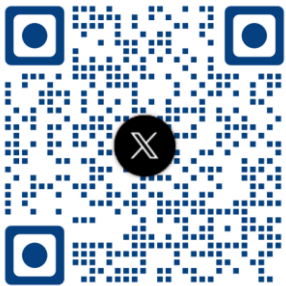

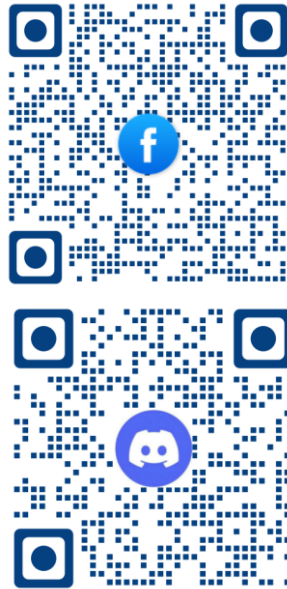

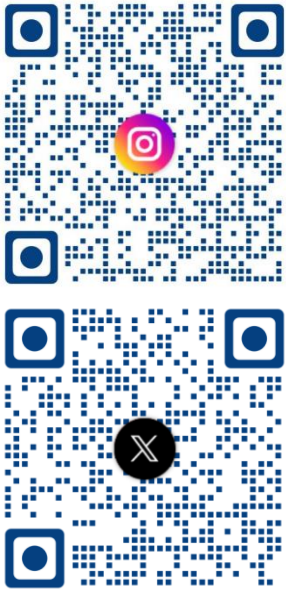

The system needs to be activated for the first time use. Follow the steps in the startup prompts to activate it.

This is a huge system. If you encounter any problems, please contact us and we will provide feedback and make regular corrections based on your problems.

KINHANK E-mail: support@kinhank.com

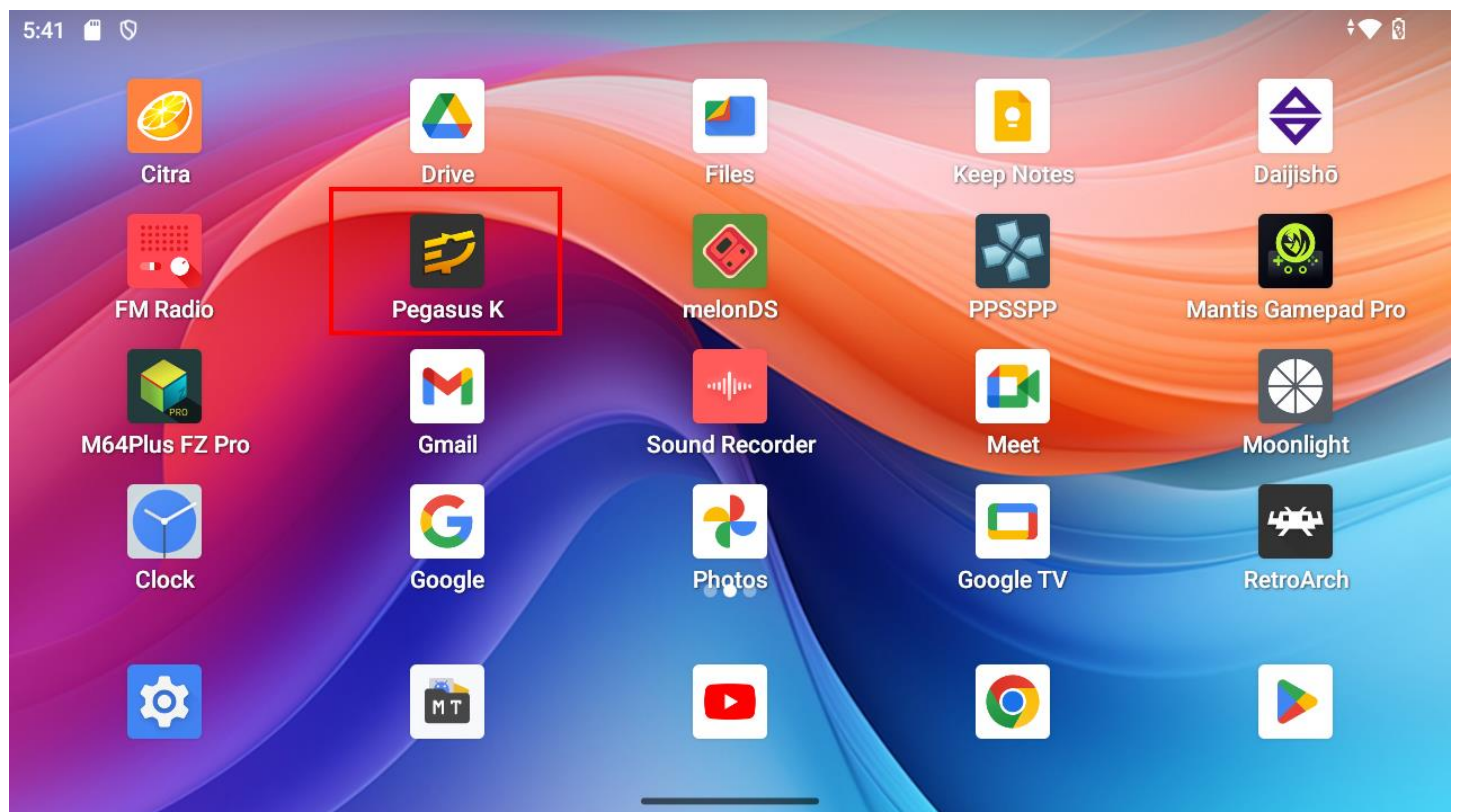

Our after-sales team will provide you with technical support.

How to start the games:

Select "Pegasus K or ES-DE K" to start it, and then enjoy your gaming time.

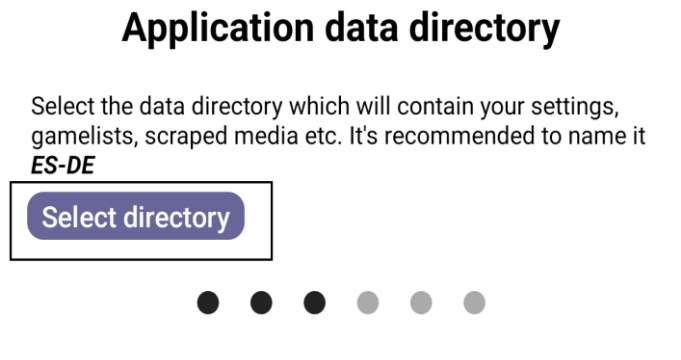

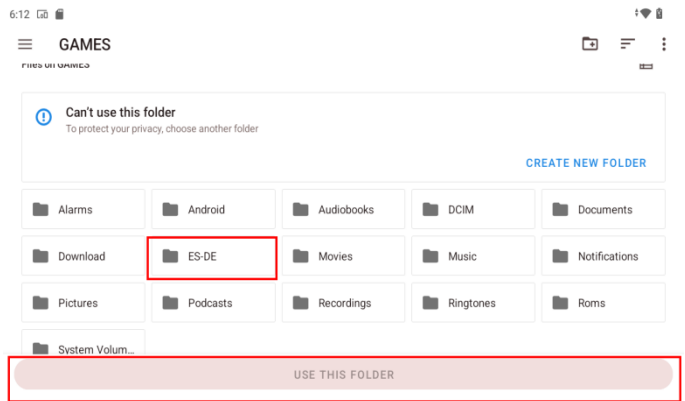

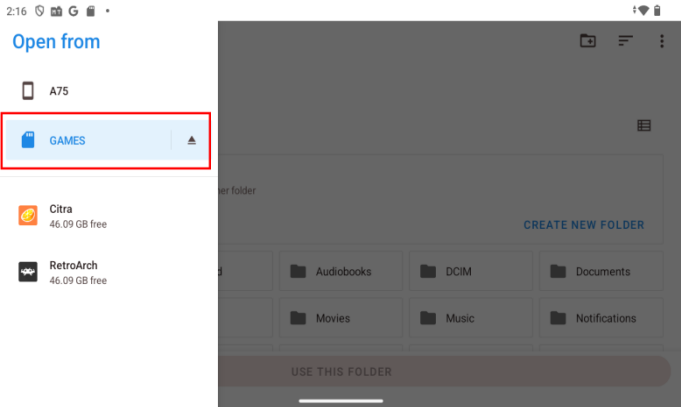

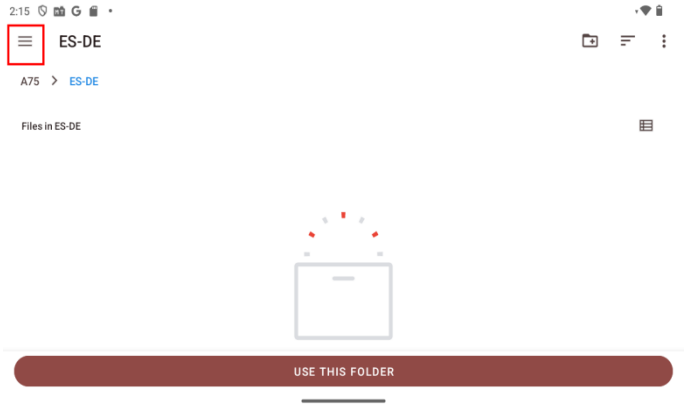

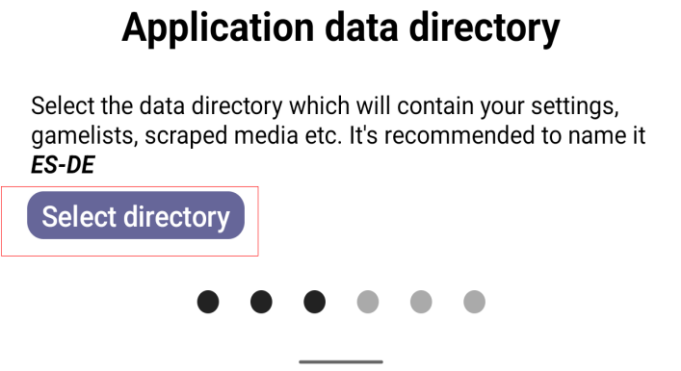

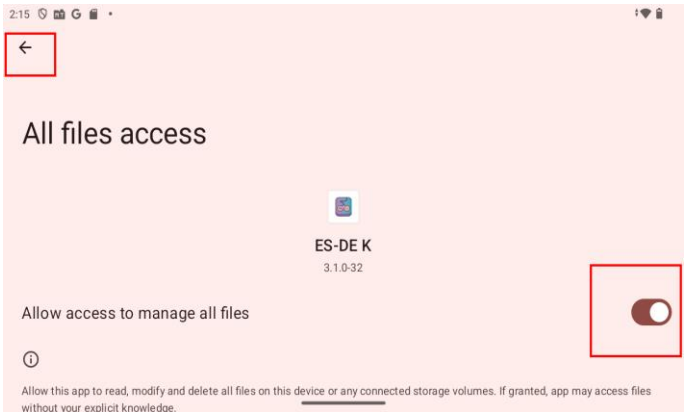

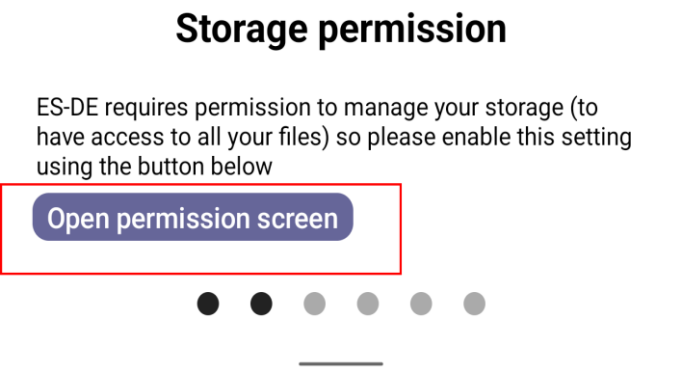

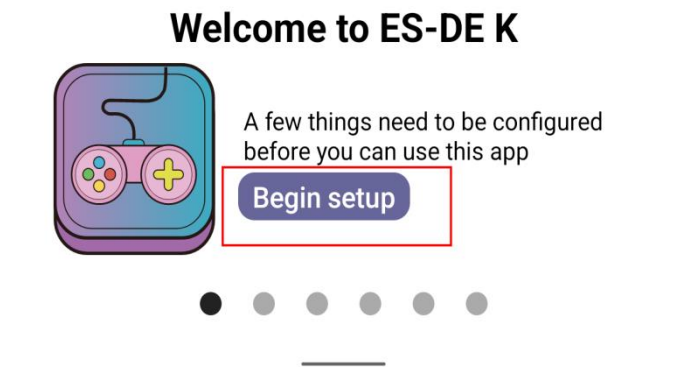

When you open Pegasus K for the first time, a pop-up window will pop up. Just click OK. The pop-up window will not appear again when you open it subsequently.

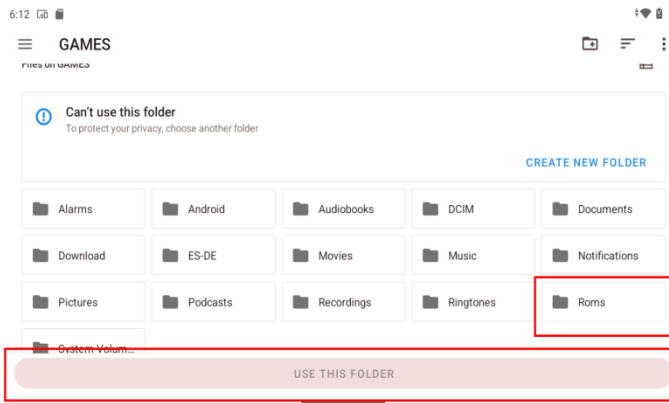

If you use ES DE K to launch the game, you need to add the game path once when you launch it for the first time. You can follow the picture steps to add it, or you can watch the video tutorial of adding the path.

Video Link: <https://www.youtube.com/watch?v=zBR4lApO7wI>

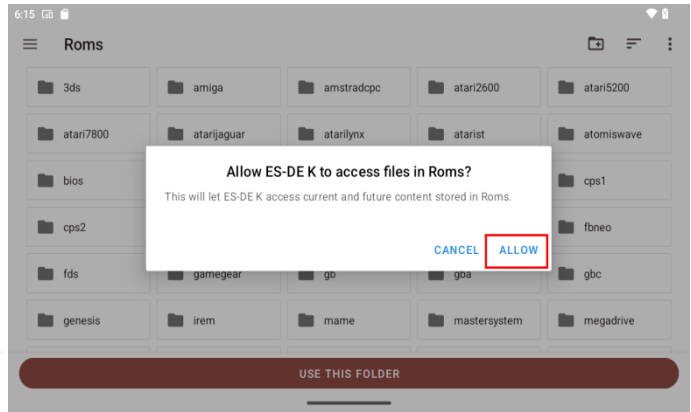

As shown in the figure:

Create system directories?

This will create directories for all supported game systems inside your **ROMs** folder and it will also create **systeminfo.txt** files which contain useful information about each system

Setup complete!

ES-DE has now been configured but you'll need to install your emulators separately. Also be aware that some emulators need to have ROM directory permissions configured as well, or your games will not start

Pegasus and ES-DE K System User Guide:

Pegasus and ES-DE Kthe defaults setting of the controller like this:

PegasusK Gamepad	Effect	ES-DE K Gamepad	Effect
 or 	navigation	 or 	navigation
	select/ <u>ok</u>		select/ <u>ok</u>
	cancel/back		cancel/back
	game details		game details
	filter and search		game details
 L1	previous collection		Add or remove favorites
 R1	next collection	 L1	Game list previous page
 L2	previous page of games	 R1	Game list next page
 R2	next page of games		

The setting of Hotkey:

1. These game systems use RetroArch :

Amiga/Amstracpc/Atari2600/Atari5200/Atari7800/Atarijaguar/Atarilynx/Atarist/Atomiswave/C64/Cave/Coleco vision/CPS1/CPS2/CPS3/Dreamcast/Famicom/Fbneo/Fds/Gamegear/GB/GBA/GBC/Genesis/Irem/MAME/Mastersystem/MegaDrive/MSX/Naomi/NDS/Neogeo/Nes/Nesh/NGP/NGPC/Pcengine/Pokemini/PSX/Saturn/Sega32x/Segacd/Sfc/Sg1000/SNES/Supergrafx/Supervision/Turbografx16/Turbografxcd/Virtualboy/Wonderswan/Wonderswancolor/X68000/Zxspectrum

RetroArch Hotkeys

Hotkey	Select
Menu Toggle	L3 + R3
Quit RetroArch	Select + Start (twice)
Reset Content	Select + B
Fast - Forward (Toggle)	Select + Analog Left
Volume Up	Select + D-pad Up
Volume Down	Select + D-pad Down
Load State	Select + L1
Save State	Select + R1
Next Save State Slot	Select + R2
Previous Save State Slot	Select + L2
Show FPS (Toggle)	Select + Y

2. Standalone emulator:

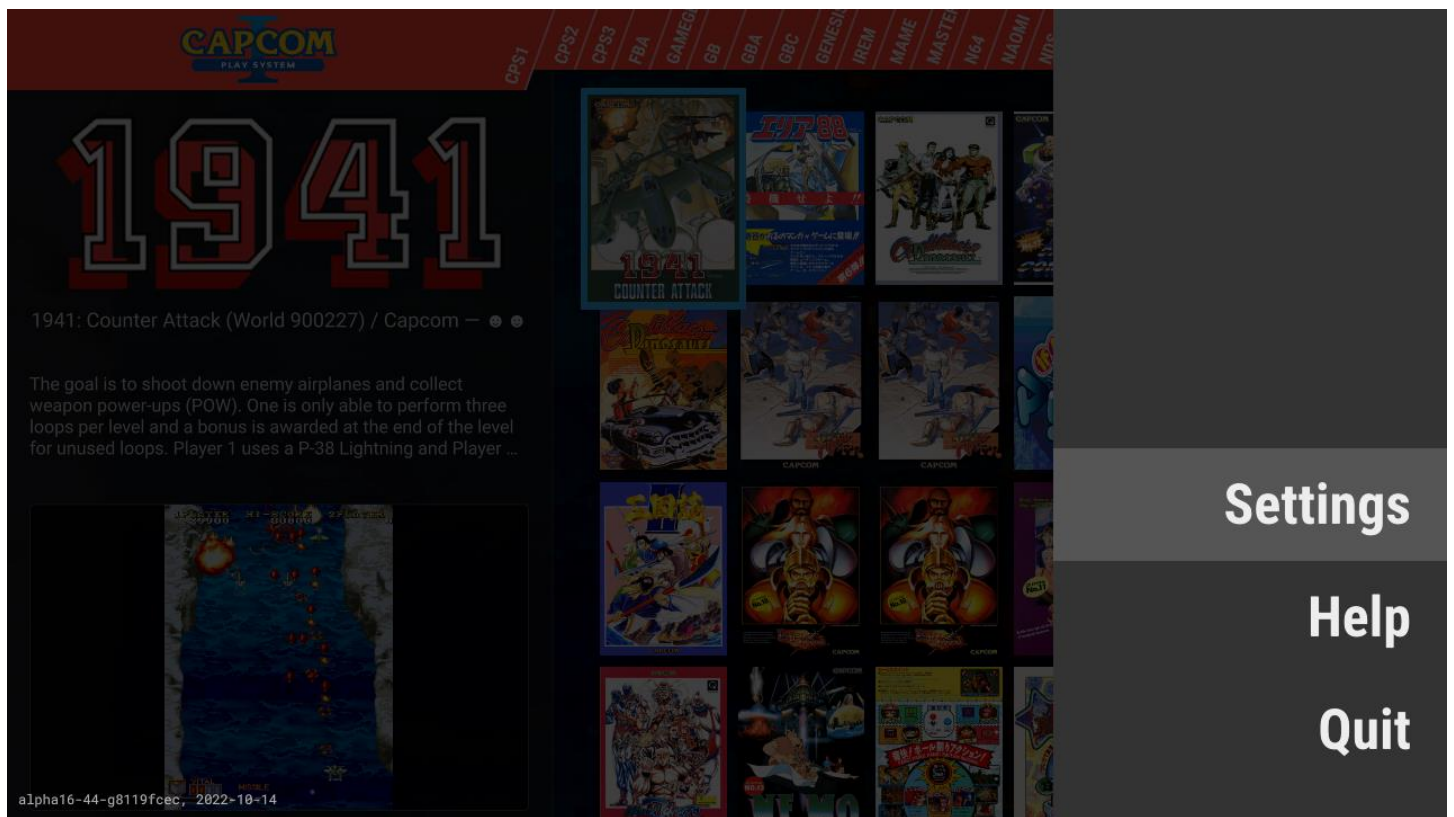

For the 3DS/PSP/PSPMINI emulator, "L2" is the hotkey, press it to get the menu.

For the N64 emulator, "B" is the hotkey, please long- press it to get the menu.

For the NDS emulator, L2 switches the screen order, R2 switches to the large screen, R3 Menu Hotkey

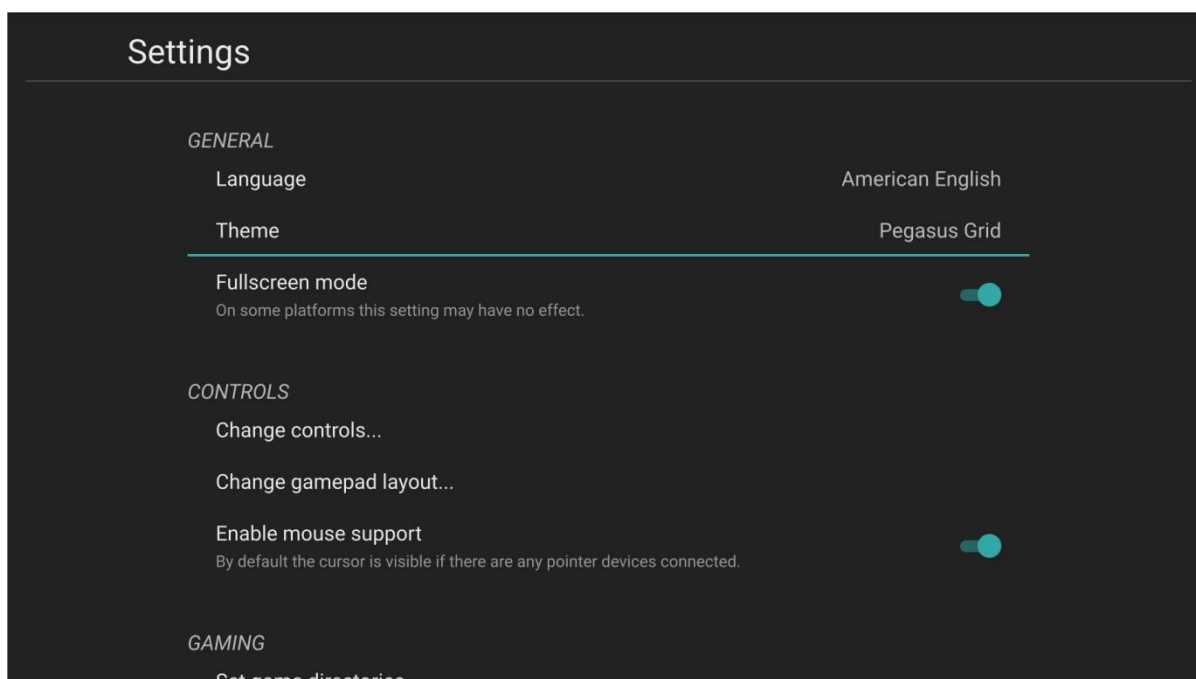

Basic Configuration

You can get to the main menu by pressing the Back button () on your gamepad or by dragging your finger out of the menu panel from the right edge of the screen.

You can navigate in the menu (and in the whole program in general) using the arrow keys, the directional buttons, the left stick or your mouse and finger. You can select item by pressing the Enter key, the "select button" () or simply clicking/pressing on an item.

On the Settings screen, you can set some general parameters, like the language of the interface or whether you'd like to run in full screen or windowed mode. You can also change the "theme", and the look and feel of the whole program.

How to add games based on the installed emulators /collections:

A) Please download the game on your computer, insert the TF card into the computer, and then copy the ROM to the corresponding ROM folder.

B) Metadata files

A metadata file is a human-readable text file that stores information about the individual games (title, developers, release date, etc.), and groups the games into categories (eg. "Playstation games", etc.). These files can be edited either via a text editor or via the [graphical metadata editor for Pegasus](#). Here is an example (with more details below):

game: Advance Wars

file: Advance Wars (USA).gba

developer: Intelligent Games

Publisher: Nintendo

genre: Strategy

description: This turn-based strategy game hails back to a classic Japanese strategy game titled Famicom Wars. Advance Wars pits players against very computer AI in a number of battles involving submarines, warships, infantry, tanks, helicopters, and other weapons.

release: 2001-09-10

players: 4

rating: 80%

These files are named **metadata.txt**, and Pegasus K will find them automatically.

A metadata file usually starts with a collection entry, for example, a gaming platform, or any other grouping. There are no predefined names, you can use whatever you prefer. In this case, the collection also defines a default launch command for all the games in it.

How to exit ES-DE K

press the start button on the controller and select QUIT ES-DE

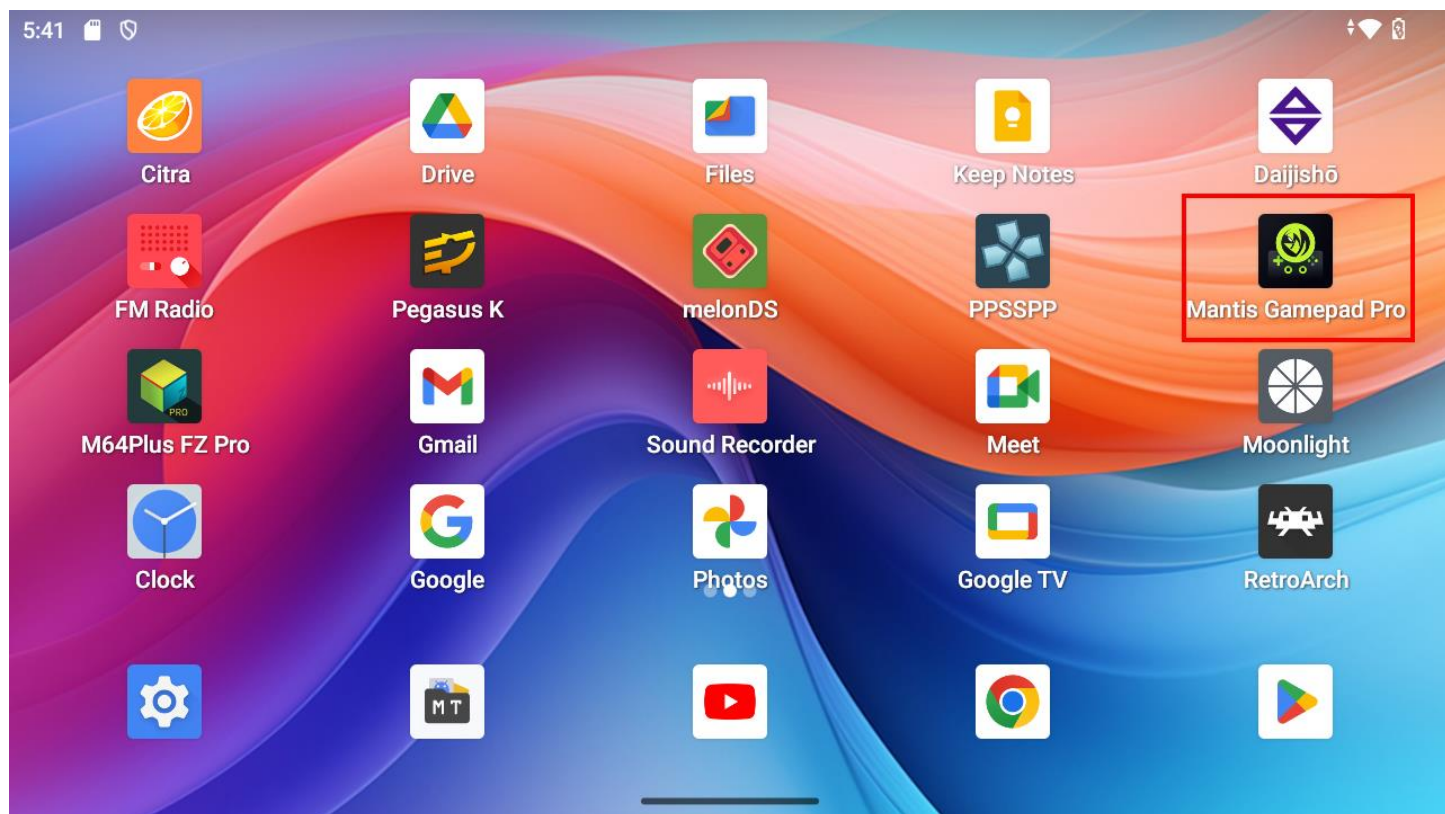

How to add games based on the installed emulators /collections:

Please download the game on your computer, insert the TF card into the computer, and then copy the ROMS file to the corresponding ROM folder of the TF card.

Android Game Key Mapping

Note: Key mapping requires turning on developer options. Go to Settings, About Phone, select Version Number, and keep clicking until you are prompted that developer options are turned on.

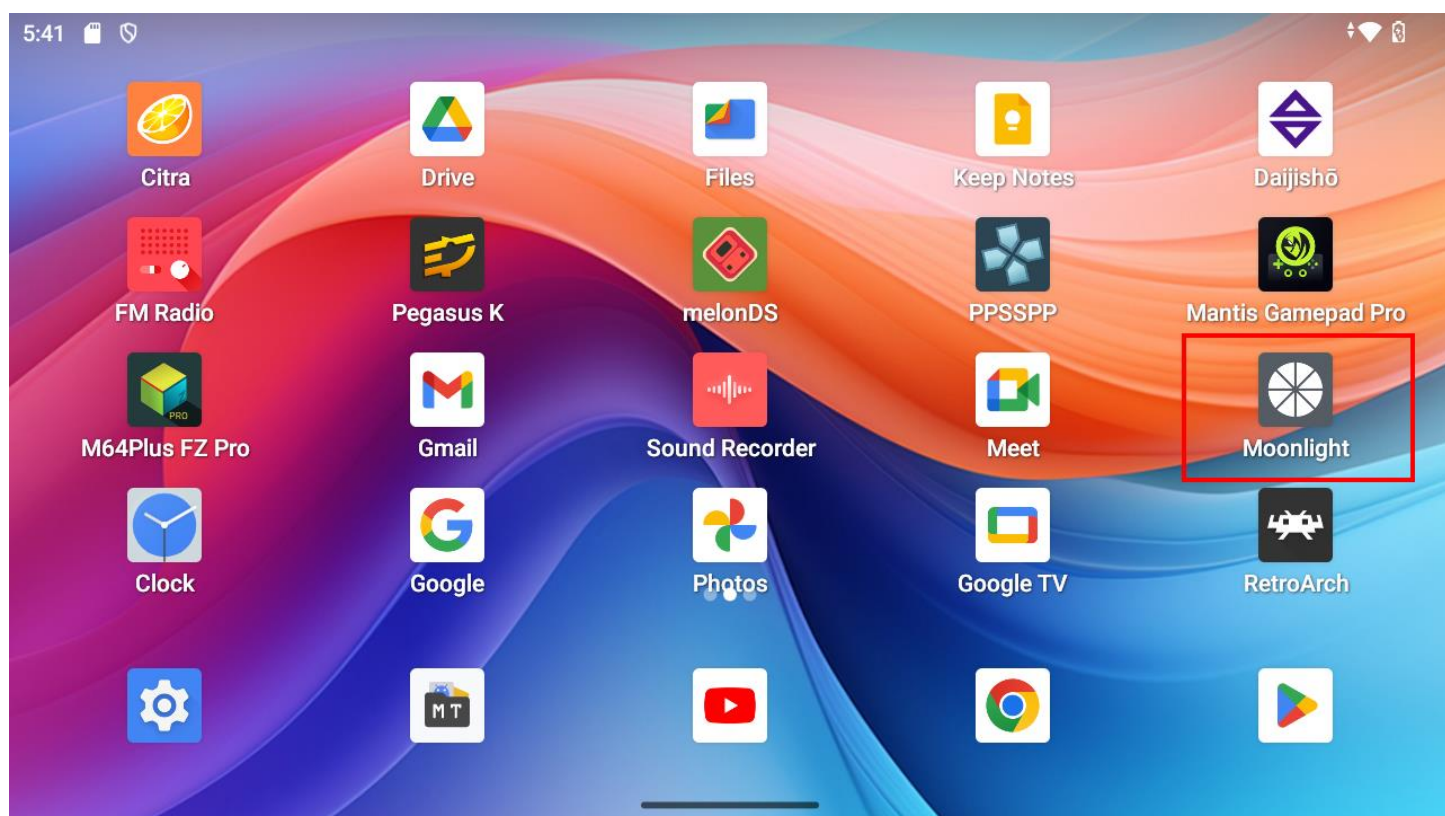

If you want to run Android games and map buttons, you can use Mantis Gamepad pro to map buttons.

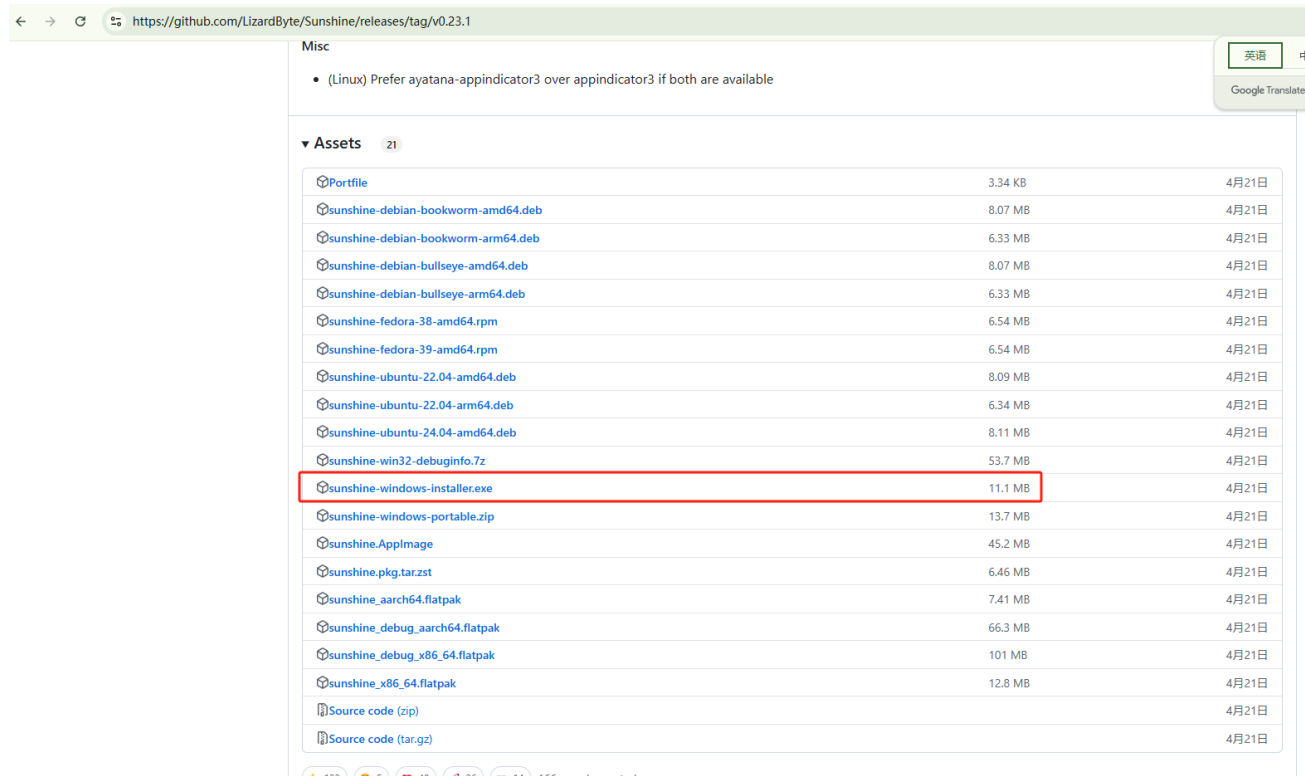

Open the Mantis Gamepad pro application, click to start MantisBuddy, activate the application according to the prompts, add the game after activation, start the game for mapping, and you can use it after the mapping is completed,

How to Stream Your PC Games

Note: When streaming, please make sure your devices are in the same LAN and the network status is good. You can stream using SteamLink or Moonlight, or download other tools to stream.

Using Moonlight streaming requires downloading a server on your computer, Download address:
<https://github.com/LizardByte/Sunshine/releases/tag/v0.23.1>

The screenshot shows the GitHub release page for LizardByte/Sunshine v0.23.1. The page is in English, as indicated by the language selector in the top right corner. The 'Assets' section is expanded, showing a list of 21 files. The file 'sunshine-windows-installer.exe' is highlighted with a red box. The table below lists the assets:

Asset	Size	Downloaded

After downloading, install and open it on the computer. For the first time use, you need to register an account and log in. After registration, open it on the handheld device and pair it with the computer. If your computer opens with an error message, click Advanced Setup to continue access. You can also stream your PC using Steam Link. Just open the Steam client on your PC and matchmake. You can also use other methods you know to stream

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
