FOR  
Smart Wireless  
BBQ Thermometer

Insert the probes

The device will keep scanning the sockets when its power is switched on. When the sensor is inserted, the LCD will display the temperature value at the corresponding position.

Then insert the probes into the food, make sure the tip of the probe is at the center of the food to get accurate temperature.

Download the APP

Search the keyword "Smart Life" in App Store and various Android app stores.

Or scan the following QR code with your phone.

Download and install the APP for free.

Make sure your phone meets the requirements:

- Apple devices running iOS 10.0 (or watchOS 2.2) and later,
- Compatible device: iPhone iPad iPod touch iWatch.
- Android devices running version 6.0 or later

Power ON/OFF

Press and hold the button for more than 3 seconds when it is in OFF mode. It will be powered on and the LCD display will show "ON" with a beep sound. If you do the same when the device is in ON mode, it will be powered off.

When the probe is not inserted into the device, it will power off automatically.

Pair with your phone

Switch on your device and keep the Bluetooth switch of your phone on.

Launch the app and follow the instructions in the app to pair and activate the device:

- Press the Pairing/Stop Alarm Button (in the top of the device).
- Connected successfully.
- Once paired the device with your phone successfully, you don't need to do the above steps again, unless you change to other phones.

NOTES:

The product automatically configures Bluetooth upon startup and prioritizes connecting to the last memory device. If you want to change devices, it's best to delete them on the app and then pair them again.

Bluetooth reset and connection through APP operation

Enjoy your barbecue time

Choose food and preference for the food where the probe is inserted the app and the device will display its current and target temperature.

When the food is ready, the app and device will alarm.

The user interface of the app may be changed when upgrade. Please follow the instructions in the app.

**FCC Warning:**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**Caution:** Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
