

Quick Setup Guide

Indoor WiFi PT Camera

The content described in this setup guide may be different from the version you are currently using, If you encounter problems that cannot be solved when using this setup guide, please contact our company's technical support or product seller.

Due to product upgrades and other reasons, this guide may be updated from time to time without prior notice.

Set up your Indoor WiFi PT Camera

1. Getting Started

Safety Warning:

- It is recommended that you regularly change your device password and APP account password, Please use a combination of numbers, letters, and special characters for your password.
- We recommend that you regularly update your camera to the latest software and firmware versions to ensure you get the best experience with your camera.

2. Appearance introduction

3. Set up the camera

Connect through the "HUNTVISION" APP

Before the start

Search HUNTVISION APP from App Store(iOS) or Google play(android) to download and install.

HUNTVISION App

In order to ensure a smoother video experience on your smart-phone, it is recommended that your smart-phone meets the following specifications:

- IOS system: version 11 or higher.
- Android: 5.0 or higher, using a device with a graphics processing unit (GPU).

NOTE: For the best experience, please update the APP to the latest version!

4. APP connection

1. Plug the power supply into the camera and wait for a few seconds before the camera makes a beeping sound.

2. Make sure your smartphone is connected to the WiFi network.

(Tip: If your WiFi router is dual-band, you need to connect to a 2.4GHz network-most newer routers have both 2.4GHz and 5GHz channels. For example, select SSID: xxxx_2.4G. If you don't need a computer to view videos, you don't need to connect a network cable. Currently, this function remains unavailable.)

3. Open HUNTVISION app and register an account, or log in (if you already have an account).

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Statement

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance of 20cm the radiator your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.
